Ken Alibek, Stephen Handelman

Biohazard Ken Alibek, Stephen Handelman, 2014-03-05 “Read and be amazed. . . . An important and fascinating look into a terrifying world of which we were blissfully unaware.”—Robin Cook, author of *Contagion* Anthrax. Smallpox. Incurable and horrifying Ebola-related fevers. For two decades, while a fearful world prepared for nuclear winter, an elite team of Russian bioweaponers began to till a new killing field: a bleak tract sown with powerful seeds of mass destruction—by doctors who had committed themselves to creating a biological Armageddon. *Biohazard* is the never-before-told story of Russia’s darkest, deadliest, and most closely guarded Cold War secret. No one knows more about Russia’s astounding experiments with biowarfare than Ken Alibek. Now the mastermind behind Russia’s germ warfare effort reveals two decades of shocking breakthroughs . . . how Moscow’s leading scientists actually reengineered hazardous microbes to make them even more virulent . . . the secrets behind the discovery of an invisible, untraceable new class of biological agents just right for use in political assassinations . . . the startling story behind Russia’s attempt to turn a sample of the AIDS virus into the ultimate bioweapon. And in a chilling work of real-world intrigue, *Biohazard* offers us all a rare glimpse into a shadowy scientific underworld where doctors manufacture mass destruction, where witnesses to errors are silenced forever, and where ground zero is closer than we ever dared believe. Praise for *Biohazard* “Harrowing . . . richly descriptive . . . [an] absorbing account.”—The New York Times Book Review “Remarkable . . . terrifying revelations . . . [Ken Alibek’s] overall message is ignored at great national peril.”—Newsday

Biohazard, the Hot Zone and Beyond Peter Brookesmith,1997 Humanity has always lived with, and sometimes barely survived, plagues, pestilence, and epidemics. Today, horrors such as the Black Death, which wiped out almost half the population of Europe in the fourteenth century, seem like distant nightmares. Improved public health, vaccination, and new drugs have driven many diseases from large parts of the world. At the same time, diseases once under control are beginning to resist antibiotics, and super-resistant superbugs have been found in hospital wards. The threat of AIDS hangs over a whole generation. Nations large and small are genetically engineering biological weapons whose security is far from sure. These are just some of the biological perils we now face. Could a new age of plague and pestilence be about to dawn?--From publisher description.

How he got it - and the ensuing struggle to keep it for the benefit of mankind - makes David the target of a relentless pursuit by men who are desperate to get their hands on the formula, come what may - so they can exploit it for their own sinister purposes. To his dismay, David learns that the science he helped develop has been hijacked and manipulated to fulfill the ambitions of the politically powerful CUE factor. When it comes to writing the definitive history of the worst plague in the history of the world, BIOHAZARD RED may be looked upon as the blueprint of how it happened. But what you're started - that's simply genocide! What in hell are you trying to do? Wipe out half the world's population? Selectively? David Turner from BioHazard Red The subject matter is of vital importance to the world today. I think it may be among the most important books I have read in some time. Dale Olson

Sunscreens--biohazard Elizabeth Plourde,2011-06-21 This book brings together the latest medical research confirming what the author has found to be the truth about sunscreens. Most sunscreen chemicals are either estrogen-like or act as thyroid disruptors, which impact the body's ecosystem. These chemicals are flooding our water supply and oceans causing damage to their ecosystems. It has been proven that 97% of American's have these chemicals in their bloodstreams

whether they use sunscreen, or not! Sunscreens have been said to have a potential to protect us from skin cancers. However, since sunscreens have hit the market - skin cancers have risen each year while most other cancer incident rates are currently declining. It is time to take a look at what we are doing to our bodies and ecosystems. The author has done the research so the public can make informed choices about what they put on their bodies. What we have been doing may not have been a good choice because it was not an informed choice.

Biohazard Symbol Book Songbird Songbird Publications,2018-08-14 BIO HORROR THEME JOURNAL Not your average, everyday notebook. This ominous looking, scary book is heavily scratched and decayed looking on the outside. The interior has a similar aged appearance. Pages are light enough so writing is viewable, are lined, and have darker grunge style vignette around the edges. This journal makes an excellent tabletop Halloween decoration. Also makes a unique gift for anyone who loves horror movies and books, especially in the bio horror genre. Can be used as an everyday notebook albeit with a lot of creep factor. 6X9 inch, 108 pages, lightly lined, matte (paper) softcover, quality materials and binding
