Her Silhouette, Drawn in Water Vylar Kaftan, 2019-05-21 Nebula Award-winning author Vylar Kaftan weaves a dark tale of loss, regret, love, and revenge in the novella, *Her Silhouette, Drawn in Water*. Tense and gripping.—Ann Leckie A moving tribute to the power within us all.—Nancy Kress All Bee has ever known is darkness. She doesn't remember the crime she committed that landed her in the cold, twisting caverns of the prison planet Colel-Cab with only fellow prisoner Chela for company. Chela says that they're telepaths and mass-murderers; that they belong here, too dangerous to ever be free. Bee has no reason to doubt her—until she hears the voice of another telepath, one who has answers, and can open her eyes to an entirely different truth. Representing Scientific Knowledge Chaomei Chen, Min Song, 2017-11-25 This book is written for anyone who is interested in how a field of research evolves and the fundamental role of understanding uncertainties involved in different levels of analysis, ranging from macroscopic views to meso- and microscopic ones. We introduce a series of computational and visual analytic techniques, from research areas such as text mining, deep learning, information visualization and science mapping, such that readers can apply these tools to the study of a subject matter of their choice. In addition, we set the diverse set of methods in an integrative context, that draws upon

insights from philosophical, sociological, and evolutionary theories of what drives the advances of science, such that the readers of the book can guide their own research with their enriched theoretical foundations. Scientific knowledge is complex. A subject matter is typically built on its own set of concepts, theories, methodologies and findings, discovered by generations of researchers and practitioners. Scientific knowledge, as known to the scientific community as a whole, experiences constant changes. Some changes are long-lasting, whereas others may be short lived. How can we keep abreast of the state of the art as science advances? How can we effectively and precisely convey the status of the current science to the general public as well as scientists across different disciplines? The study of scientific knowledge in general has been overwhelmingly focused on scientific knowledge per se. In contrast, the status of scientific knowledge at various levels of granularity has been largely overlooked. This book aims to highlight the role of uncertainties, in developing a better understanding of the status of scientific knowledge at a particular time, and how its status evolves over the course of the development of research. Furthermore, we demonstrate how the knowledge of the types of uncertainties associated with scientific claims serves as an integral and critical part of our domain expertise.

Cities for the New Millennium Marcial Echenique, Andrew Saint, 2014-04-04
Cities for the New Millennium is the outcome of a joint conference held in Salford in July 2000 by the Royal Institute of British Architects and the University of Cambridge's Department of Architecture. It tackles these questions in the light of the Urban Task Force's report about the future of Britain's cities and communities, but sets them in an international and historical context. Professionals - architects, engineers and developers as well as academics from different countries and disciplines here lavish their expertise on issues of transportation, density, land use, risk and energy saving; others present urban-scale buildings or landscapes that have been judged inspirational or inventive. This book, therefore, is not just about theories of urbanism. It reveals how co-operation and debate between different parties and professions can illuminate the creative kind of urban development we should be aiming for.

Rust Red Peter Latz, 2022-06-10 In den 90er Jahren entwickelte der Landschaftsarchitekt Peter Latz mit seinem Team einen Park jenseits aller modischen Trends. Mit Bildern, Skizzen, Plänen und Erläuterungen bietet der Band Einblicke in 12 Jahre des Planens und Realisierens und eröffnet dem Leser die faszinierende Welt, die der Industrie folgt. Der Landschaftspark Duisburg-Nord ist eines der international bemerkenswertesten Beispiele, wie mit Hinterlassenschaften der Industrie intelligent und ansprechend umgegangen werden kann. Die Vision für den Park ist im Wesentlichen losgelöst von einer Leitidee der Gartenkunst, der Ästhetisierung land- und forstwirtschaftlicher Organisationsmuster. An ihre Stelle rückt das informationsreiche Geflecht urbaner Infrastruktur und Industrie. Peter Latz legt in diesem Buch sein Wissen und seine Erfahrungen zu diesem einmaligen Projekt umfassend dar. Beiträge namhafter Beteiligter ergänzen den Blick von unterschiedlicher Warte.

Soldier's Reverie Charles D. Stokes, 2018-11-08 Soldier's Reverie takes you on multiple journeys—each one a story of its own and each one intertwined with another. Whether it's being conned by smooth ladies of the night or

isolated and fighting for your life, the story paints a vivid portrait and drops you right in the middle of it. You will feel the sweltering tropical heat and experience the chill of the monsoon rains and know more about the garrison soldiers, McNamara's 100,000, black marketers, mamans, business girls, recon soldiers, the "too often caught in the middle" Vietnamese villages, and the Viet Cong. As their lives evolve and stories intertwine, war touches all of them—from a middle school dropout becoming a recon team tail gunner and from a goose herder becoming a lethal Viet Cong tracker.

Emergency Mobilization for Postattack Reorganization William Morle Brown, 1968 The report emphasizes the dangers to eventual reconstruction that are posed by the disorganization inevitably following a nuclear war. What can go wrong in this reorganization period is examined by the use of scenarios and analogy. It is then suggested that during the crisis period preceding a nuclear war a number of useful actions enhancing the chance of postattack recovery should be undertaken as part of an emergency mobilization for civil defense. This mobilization might instigate actions which would help U.S. society to negotiate the reorganization period successfully. The problems of creating such countermeasures appear to be formidable but possible if: (a) the usable warning provided by the crisis is of sufficient duration (several weeks or more); and (b) the pre-planning for the mobilization action is completed in advance of the need. (Author).

Dismantlings Matt Tierney, 2019-12-15 For the master's tools, the poet Audre Lorde wrote, will never dismantle the master's house. *Dismantlings* is a study of literary, political, and philosophical critiques of the utopian claims about technology in the Long Seventies, the decade and a half before 1980. Following Alice Hilton's 1963 admonition that the coming years would bring humanity to a crossroads—machines for HUMAN BEINGS or human beings for THE MACHINE—Matt Tierney explores wide-ranging ideas from science fiction, avant-garde literatures, feminist and anti-racist activism, and indigenous eco-philosophy that may yet challenge machines of war, control, and oppression. *Dismantlings* opposes the language of technological idealism with radical thought of the Long Seventies, from Lorde and Hilton to Samuel R. Delany and Ursula K. Le Guin to Huey P. Newton, John Mohawk, and many others. This counter-lexicon retrieves seven terms for the contemporary critique of technology: Luddism, a verbal and material combat against exploitative machines; communion, a kind of togetherness that stands apart from communication networks; cyberculture, a historical conjunction of automation with racist and militarist machines; distortion, a transformative mode of reading and writing; revolutionary suicide, a willful submission to the risk of political engagement; liberation technology, a synthesis of appropriate

technology and liberation theology; and thanatopography, a mapping of planetary technological ethics after Auschwitz and Hiroshima. Dismantlings restores revolutionary language of the radical Long Seventies for reuse in the digital present against emergent technologies of exploitation, subjugation, and death.

Blessed Dr. Sherri A. Young,2020-01-27 Blessed is a journey about love, loss and the growth and rebuilding of a Christian family whose home was decimated by an explosion and narrowly escaped with their lives by only 7 minutes. They survived with literally only the clothes on their backs. This story is how they dealt with the aftermath and tried to piece their lives back together through the support of their family, friends, and their faith in God.

Practical Bomb Scene Investigation James T. Thurman,2017-04-07 Now in its Third Edition, Practical Bomb Scene Investigation explores the investigative process that improvised explosive device (IED) specialists undertake at the scene of an explosion. Providing easy-to-understand, step-by-step procedures for managing and processing a bomb scene, it enables investigators to find the evidence and then make sense of what is found. The book is not only a roadmap on how to find and collect evidence and assess the scene, but also provides instruction on identifying the bombmaker's signature through latent print, DNA, explosive residue, metallurgical, and toolmark examination and

forensic analysis.

Follow Your Bliss Donald Hodder, 2017-12-19 Dr. Donald Hodder has woven tales of joy and sorrow, humour and fulfillment into this compelling memoir. He practised family medicine for over forty-five years, all of it in his native Newfoundland. During his career, he kept many notebooks detailing his experiences. These became the foundation for this book. In studied prose and lilting verse, with integrity and compassion, he interlaces autobiographical material with social commentary on people and happenings in his life. He witnessed a broad spectrum of human conditions: the mundane, the miraculous, the physical, the psychological, and the social. He feels immensely honoured to have shared in the most intimate aspects of daily life with thousands of patients for so long. He is, at times, absolutely serious, skillfully witty, and hilariously funny. You are invited to sit at his table of memories and be entertained, enlightened, and enriched. Enjoy!
