Blohm & Voss Hans Georg Prager,1977

Aircraft of the Luftwaffe, 1935Ð1945 Jean-Denis G.G. Lepage,2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Luftwaffe Emergency Fighters Robert Forsyth,2017-06-29 In late 1944, the German Air Ministry organised what it called an 'Emergency Fighter Competition' intended to produce designs for quick-to-build yet technically and tactically effective jet fighter aircraft capable of tackling the anticipated arrival of the B-29 Superfortress over Europe, as well as the British Mosquito and US P-38 Lightning which were appearing in ever greater numbers. Thus was born a cutting-edge, highly sophisticated series of aircraft including the futuristic and elegant Focke-Wulf Ta 183; the extraordinary Blohm und Voss P.212, and the state-of-the-art Messerschmitt P.1101 series. Armed with heavy cannon and the latest air-to-air rockets and missiles, these were designed to inflict carnage on American bomber formations at high speed. Using stunning three-view illustrations of each prototype along with full colour artwork, aviation expert Robert Forsyth traces the history of the extraordinary aircraft of the 'Emergency Fighter Competition', Hitler's last throw of the dice in the air war against the Allies.

Spoils of War Aidan Dodson,Serena Cant,2020-03-30 While a large number of books have dealt with the navies and war at sea during the World Wars, the immediate aftermaths have generally received only minimal coverage. However, the fates of defeated navies are of enormous interest from a number of perspectives. These include the relative priorities of the victorious powers, acquisition and testing of ex-enemy materiel and the intended future capabilities of those ex-enemy navies that were to be allowed to continue to exist. This new book traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders through to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. In doing this, much use is made of material drawn from archival, and in some cases archaeological, sources, some of which has never previously been used. Through these, a wide range of long-standing myths are busted, and some badly distorted modern views and assessments of events in the wake of the conflicts put right. The fascinating narrative will be accompanied by tabulated lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These will include key dates in their careers and their ultimate fates. This highly original book, drawing on archaeological evidence as well as archival sources, and including numerous photographs will become an essential reference tool for all those interested in the naval history of the two World Wars.

Propaganda Postcards of the Luftwaffe James Wilson,2007-03-30 Propaganda Postcards of the Luftwaffe focuses on the efforts of the powerful Nazi propaganda machine to promote the technical achievements and might of the then newly created German airforce. The Luftwaffe had been announced to the world in March 1935, despite the restrictions contained in the Versailles Treaty signed after the First World War denying Germany the right to develop military aircraft. All major aircraft types used by the Luftwaffe together with many lesser known, obscure and secondary types are represented in this book. There is a section covering the main figures of the Luftwaffe and the leading aces who flew the aircraft. The German Air and Propaganda ministries worked together and, using professional photographers produced quality images, which were then made available to the general public in an attempt to inspire the nation and create strong moral.
