Blue Guard Jody Wallace,2020-10-13 Two operatives, two sides, same mission: if they choose to accept each other.Cornelius Blue is a dragon and tracker, not a diplomat. A deadly interruption of the Blue Guard Trials, which should have begun an era of exploration for Cornelius's nation, threatens to crush his dreams of exploring his home world. So what's he doing in Magic, New Mexico, attempting to convince a dubious city council that his planet, Tarakona, should be allowed an embassy? Why is he playing statesman when he should be investigating the catastrophe? Zuri Kaleo is a spy and wizard, not a seductress. And she should be, secretly, deciphering the disaster of the trials as well. But no, her king reassigned her to Magic, New Mexico, to sweet-talk a stubborn blue dragon out of building an embassy on Earth. Because an embassy there-as well as Cornelius's thirst for exploring Tarakona itself-might reveal the biggest secret Tarakona has ever known.When Zuri discovers another spy was sent to disrupt the Blue Guard Trials, questions beg for answers. Surely no one was meant to die, were they? The Pirate King wouldn't have ordered that, would he? If only Neil was her teammate instead of her enemy, they could discover the truth together. And perhaps find each other in the process.NOTE: This novella is the companion to DB Sieders' Blue Streak which is chock-a-block full of romance, gnomes, but not romance with gnomes, and adventure.

A Deep Blue Sounding Donald B. Hutton,2000 The U.S. Coast Guard Cutter Cape Solace mysteriously sinks while on patrol off the coast of Florida, taking 26 crewmembers to a deep water grave. At the same time, Coast Guard Intelligence Agent Brad Thomas surfaces from a deep cover sting operation in New York City netting two Coasties involved in smuggling for the mob. A Marine Board of Inquiry investigation yields no answers in the Cape Solace sinking and the New York sting is covered up. What is happening to America's lifesavers, the quiet service? That's what Agent Brad Thomas, his life destroyed by the sinking of a second Coast Guard cutter, sets out to discover on a deadly path of vengeance and redemption that leads from gritty Miami streets to the innermost corners of power in Washington. A Deep Blue Sounding is the first novel in a trilogy by Donald Hutton, a 16-year veteran of the U.S. Coast Guard. The remaining two novels, Cossackie and The Deputy Inspector General, are underway.

Brazilian Jiu-Jitsu BJ Penn,Erich Krauss,Dave Camarillo,Glen Cordoza,2009-08-10 BJ PENN-UFC World Champion, Jiu-Jitsu World Champion, and best-selling author of Mixed Martial Arts: The Book of Knowledge-sheds new light on the sport of Brazilian Jiu-Jitsu with this unprecedented examination of the closed guard. Through step-by-step color photographs and descriptive narrative, Penn shares his elaborate system for gaining control of your opponent's body while fighting off your back, and then unleashes more than eight fight-ending submissions. He divulges his most vicious strangleholds, including collar chokes, arm chokes, and triangle chokes. He demonstrates how to apply bone-breaking pressure to your opponent's wrist, elbow, and shoulder using his most ruthless straight arm bars, inverted arm bars, kimura locks, Americana locks, and omaplata locks. And to ensure your offense never gets shut down, Penn unveils your opponent's most common submission defenses, and then teaches you how to capitalize on that defense by transitioning into secondary submissions and a host of sweeps. Detailing dozens of ways to chain your attacks together to form fluid combinations, this book leaves no stone unturned. Whether you are new to the grappling arts or an experienced practitioner, Brazilian Jiu-Jitsu: The Closed Guard will take your game to the next level.

The Long Blue Line Disrupted: USS Serpens (AK-97) and the Largest Loss of Life in US Coast Guard History Douglas E. Campbell,Robert G. Breen,2019-09-11 The story of USS Serpens (AK-97) is an important chapter in Coast Guard history - the most tragic loss of life in the more than 220 years of Coast Guard service to the United States. Contained within these pages is the official ship's War Diary along with some 200 personal letters sent from Serpens' crew to their friends and loved ones waiting for them to return home. On 29 January 1945, while sitting off Guadalcanal, Serpens exploded. Of the roughly 250 crew and Army stevedores on board at the time, only two Coastguardsmen survived. While this is the story of ship and crew, the final chapter still needs to be written - the awarding of the Purple Heart. It was awarded, the two who survived and several families of those killed received them, and then through misstep or miscommunication, the medal was rescinded. This is not acceptable.

Blue Technologies U S House of Representatives,U S Coast Guard,U S Government,2019-06-30 Blue technology is a term that describes a wide swath of technologies and systems that support, sustain, and integrate the U.S. and global ocean economy. Accordingly, systems and technologies such as autonomous vehicles, sensors (both remote and in situ), ocean observation platforms, and hydrographic services, among many others fall under the term. The integration of advanced blue technologies could improve operational efficiencies and the Coast Guard's mission performance, as well as MDA. Emerging maritime technologies may contribute to enhanced operational flexibility, improved understanding of the maritime environment, and optimal deployment and use of conventional Coast Guard assets (e.g., cutters, aircraft, small boats, etc.).The Coast Guard performs 11 official statutory missions including search and rescue, aids to navigation, law enforcement, and interdiction of illegal drugs. These missions have direct and significant impacts on commerce, property, and life in the United States. In 2017, the Coast Guard rescued or assisted nearly 12,000 people in response to the aftermath of hurricanes Harvey, Irma, and Maria. The Coast Guard's missions not only support disaster relief, but are also essential to supporting the U.S. economy through its regulation, oversight, and enforcement of the U.S. Maritime Transportation System (MTS). The MTS remains is integral to the country's commerce, carrying 73.5 percent by weight and 46.6 percent by value of U.S. international merchandise. In 2017 as a specific example, the Coast Guard's domestic icebreakers conducted more than 5,300 hours of icebreaking to facilitate the movement of \$1.5 billion of cargoes through ice-impeded waters of the Great Lakes and Eastern Seaboard. Maritime Domain Awareness (MDA), which is the effective understanding of the global maritime domain that could impact the security, safety, economy, or environment of the United States, is an important component critical to the Coast Guard's mission performance. As one of the military sea services, the Coast Guard gathers and distributes MDA information to other governmental and non-governmental partner agencies as it conducts each of the 11 official missions within a multi-layered security framework.Congress continues to be interested in the Coast Guard's successful adoption and integration of new and emerging technologies. In

the 115TH Congress, versions of the Coast Guard Authorization Act of 2017 introduced in the House (H.R. 2518) and in the Senate (S. 1129) included a section requiring the Coast Guard to enter into an arrangement with the National Academy of Sciences (Academy). This arrangement would allow the Academy to prepare an assessment of existing and emerging unmanned technologies that could be used by the Coast Guard. The assessment will analyze how the use of new and emerging MDA technologies can assist the Coast Guard to carry out its missions at lower costs, expand the scope and range of the Coast Guard's MDA, use its personnel and assets more efficiently, and identify adjustments in any Coast Guard policies, procedures, and protocols to incorporate these new systems and technologies. This compilation includes a reproduction of the 2019 Worldwide Threat Assessment of the U.S. Intelligence Community.

Our Enemies in Blue Kristian Williams, 2015-08-17 Let's begin with the basics: violence is an inherent part of policing. The police represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent. Using media reports alone, the Cato Institute's last annual study listed nearly seven thousand victims of police misconduct in the United States. But such stories of police brutality only scratch the surface of a national epidemic. Every year, tens of thousands are framed, blackmailed, beaten, sexually assaulted, or killed by cops. Hundreds of millions of dollars are spent on civil judgments and settlements annually. Individual lives, families, and communities are destroyed. In this extensively revised and updated edition of his seminal study of policing in the United States, Kristian Williams shows that police brutality isn't an anomaly, but is built into the very meaning of law enforcement in the United States. From antebellum slave patrols to today's unarmed youth being gunned down in the streets, peace keepers have always used force to shape behavior, repress dissent, and defend the powerful. Our Enemies in Blue is a well-researched page-turner that both makes historical sense of this legalized social pathology and maps out possible alternatives. Kristian Williams is the author of several books, including American Methods: Torture and the Logic of Domination. He co-edited Life During Wartime: Resisting Counterinsurgency, and lives in Portland, Oregon.

Blue Water and Rocky Lights Lawrence Gustave Desmond, 2012 Blue Water and Rocky Lights takes you back to a Coast Guard that would hardly be recognizable today with officer candidate school at the Coast Guard Academy, and cutters of World War II or older vintage. Lawrence G. Desmond, a junior officer aboard the cutters Mclane and Avoyel, tells a historic story sprinkled with anecdotes and good humor. It's illustrated with color and B-W photos of shipboard life, crew members, rescues, and photographic documentation of the exceptional seamanship required to supply St. George Reef lighthouse in the often treacherous seas off the coast of northern California.

Red Buoys, Blue Dolphins Ralph E Danbert, 2013-06-10 In the cold waters off the coast of northwestern Washington, the Cold War rages on. The USS Ohio, a newly refitted Trident ballistic missile submarine based in Bangor, Washington, is a source of great curiosity to the Russian military. If their intelligence is to be believed, the US Navy now possesses the technical ability to render its fleet invisible. When a scuba diver is killed in the waters that US Coast Guard Commander Matthew Reynolds patrols, Reynolds finds himself caught up in a war of international intrigue. Tanya Andrushyn, a specialist from the US Navy's satellite intelligence operation in Hawaii, is called in to investigate. Just how did the Russians manage to plant deep-water spy buoys in the waters of the Strait of Juan de Fuca without being spotted? A group of specialists and their secret team of trained dolphins are also brought in to neutralize the sono-buoys. When one of the dolphins gets trapped on the ocean floor, however, Andrushyn and her team must make an impossible choice: sacrifice the animal and risk detection or risk her own life to rescue it. To even attempt such an operation, they risk disclosing the existence of top-secret underwater breathing-unit technology. She makes her decision ... and soon finds herself in need of rescue. Andrushyn suspects the sono-buoys are uploading data via satellites, so she and Reynolds try to trick the equipment into sending misinformation instead. The race is on to complete the modifications before their plan is discovered.

Security Guard Manual ,
Rescue Warriors David Helvarg, 2009-05-12 Since its founding more than two hundred years ago, the United States Coast Guard has rescued over a million people. On any given day, Coasties respond to 125 distress calls and save over a dozen lives. Yet despite having more than 50,000 active-duty and reserve members on every ocean and on our nation's coasts, great lakes, and rivers, most of us know very little about this often neglected but crucial branch of the military. In Rescue Warriors, award-winning journalist David Helvarg brings us into the daily lives of Coasties, filled with a salty maritime mix of altruism and adrenaline, as well as dozens of death-defying rescues at sea and on hurricane-ravaged shores. Helvarg spent two years with the men and women of the Coast Guard, from the halls of their academy in New London, Connecticut, to the frigid, storm-tossed waters of Alaska's Bering Sea, to the northern Persian Gulf, where they currently guard Iraqi oil terminals. The result is a masterpiece of adventure reporting--the definitive book on America's forgotten heroes.
