*BMC 1100 and 1300* James Taylor,2015-07-31 The British Motor Corporation's 1100 and 1300 model range was amongst the most successful in the Corporation's history, selling more than 2.1 million of all types between its introduction in 1962 and its demise in 1974. World-wide, it was sold under eight different marque names and in two-door saloon, four-door saloon, two-door estate, and five-door hatchback forms - and very nearly as a van as well. In Britain, it was the country's best-selling car between 1962 and 1971, being beaten just once (in 1967) by the Ford Cortina. BMC 1100 and 1300 looks at the design and development of a model range that at the time confirmed BMC as a pioneer of new automotive ideas and had a profound impact on other manufacturers. It covers not only the full standard model range, but special conversions, cars built abroad, and owning and running the cars today. Superbly illustrated with 150 colour photographs.

*Catalogue of Books Printed in the XVth Century now in the British Library (BMC). Part XIII: Hebraica* ,2021-10-25 The Catalogue of Books Printed in the XVth Century Now in the British Museum (British Library), generally referred to as BMC, is a monument in the history of the book. BMC followed on from the rearrangement of the Museum's incunabula begun by Robert Proctor on the basis of the comprehensive survey of printing types and presses of the fifteenth century that he had published in 1898 as an 'Index' of the incunabula in the Museum and the Bodleian Library. The Index represented a working-out of the system he had developed for the identification of printers of the incunabula period on the basis of typographical material. The volumes of BMC extend Proctor's principles by providing full descriptions of the incunabula in the collections of the British Museum and making revisions where necessary. The first part appeared in 1908, prepared by A.W. Pollard after Proctor's death in 1903. The most recent part was published in 1985.

Exploring Body-Mind Centering Gil Wright Miller, Pat Ethridge, Kate Tarlow Morgan,2011-01-25 Exploring Body-Mind Centering features 35 essays on Body-Mind Centering (BMC), an experiential practice based on the application of anatomical, physiological, psychophysical, and developmental principles. Using the work of BMC founder Bonnie Bainbridge Cohen as a springboard, the book showcases diverse situations—from medical illness to blocked creativity—in which this discipline is applied with transformative results. Exploring Body-Mind Centering is divided into three sections, preceded by an introduction framing BMC as a pathway to becoming aware of relationships that exist throughout the body and mind and using that awareness to act. The first section lays the groundwork for this process, with real-life experiences and exercises that encourage readers to interact with the text. Section two contains valuable case stories describing the experiences of BMC students and practitioners as they work with clients. Section three shows how BMC can be integrated with other disciplines and practices that include the arts, medicine, and yoga. The book concludes with a biography of Cohen, a profile of the School for Body-Mind Centering, and a history of BMC.

**A Decade of the Berkeley Math Circle** Zvezdelina Stankova, Tom Rike,2015-02-03 Many mathematicians have been drawn to mathematics through their experience with math circles. The Berkeley Math Circle (BMC) started in 1998 as one of the very first math circles in the U.S. Over the last decade and a half, 100 instructors--university professors, business tycoons, high school teachers, and more--have shared their passion for mathematics by delivering over 800 BMC sessions on the UC Berkeley campus every week during the school year. This second volume of the book series is based on a dozen of these sessions, encompassing a variety of

enticing and stimulating mathematical topics, some new and some continuing from Volume I: from dismantling Rubik's Cube and randomly putting it back together to solving it with the power of group theory; from raising knot-eating machines and letting Alexander the Great cut the Gordian Knot to breaking through knot theory via the Jones polynomial; from entering a seemingly hopeless infinite raffle to becoming friendly with multiplicative functions in the land of Dirichlet, Möbius, and Euler; from leading an army of jumping fleas in an old problem from the International Mathematical Olympiads to improving our own essay-writing strategies; from searching for optimal paths on a hot summer day to questioning whether Archimedes was on his way to discovering trigonometry 2000 years ago Do some of these scenarios sound bizarre, having never before been associated with mathematics? Mathematicians love having fun while doing serious mathematics and that love is what this book intends to share with the reader. Whether at a beginner, an intermediate, or an advanced level, anyone can find a place here to be provoked to think deeply and to be inspired to create. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).
