The Counts of Laval Malcolm Walsby,2007 The Lavals were one of the most important families in late medieval France, rising to a position of unsurpassed eminence by the mid sixteenth century when all was put at risk by the dual challenges of dynastic failure and the Reformation. This monograph offers a fresh look at several of the critical questions facing historians of late medieval and early modern France. It re-examines the patronage of a rising and enterprising family and provides a new insight into the nature of noble Protestantism. It also considers the events of wars of religion in western France from the perspective of a noble leadership that simultaneously played a vital role in sustaining the cause and undermining it.

Convent Theatre in Early Modern Italy Elissa B. Weaver, 2002-04-04 This book is a study of convent theatre in Italy, an all-female tradition. Widespread in the early modern period, but virtually forgotten today, this activity produced a number of talented dramatists and works worthy of remembrance. Convent authors, actresses and audiences, especially in Tuscan houses, the plays written and produced, and what these reveal about the lives of convent women, are the focus of this book. Beginning with the earliest known performances of miracle and mystery plays (sacre rappresentazioni) in the late fifteenth century, the book follows the development in the convents at the turn of the sixteenth century of spiritual comedy and of a variety of dramatic forms in the seventeenth century. Convent theatre both reflected the high level of literacy among convent women and contributed to it, and it attested to the continuing close contact between the secular world and the convents - even in the Post Tridentine period.

Receptions of Hellenism in Early Modern Europe Natasha Constantinidou, Han Lamers, 2019-11-21 This volume, edited by Natasha Constantinidou and Han Lamers, investigates modes of receiving and responding to Greeks, Greece, and Greek in early modern Europe (15th-17th centuries). The book's 17 detailed studies illuminate the reception of Greek culture (the classical, Byzantine, and even post-Byzantine traditions), the Greek language (ancient, vernacular, and 'humanist'), as well as the people

claiming, or being assigned, Greek identities during this period in different geographical and cultural contexts. 0Discussing subjects as diverse as, for example, Greek studies and the Reformation, artistic interchange between Greek East and Latin West, networks of communication in the Greek diaspora, and the ramifications of Greek antiquarianism, the book aims at encouraging a more concerted debate about the role of Hellenism in early modern Europe that goes beyond disciplinary boundaries, and opening ways towards a more over-arching understanding of this multifaceted cultural phenomenon. 0.

Fictions narratives en prose de l'âge baroque Frank Greiner, Jean-Claude Arnould, 2007

Traité de Chirurgie David A. Trotter, 2011-12-07 Editio princeps de la traduction en afr. du traité sur la chirurgie d'Albucasis (ms. BNF fr. 1318), avec introduction et glossaire. Ce texte, inédit et ignoré, a une triple importance: il s'agit d'un des tout premiers textes chirurgiques en français (c. 1270); ensuite, la traduction remonte (par l'intermédiaire d'une traduction latine) à l'arabe; enfin, en tant qu'exemple de la prose non-littéraire lorraine du Moyen Age. La Chirurgie renferme non seulement

de nombreux exemples de mots techniques médicaux en français, mais aussi une quantité importante d'arabismes qui n'ont pas été relevés ailleurs. Editio princeps der afrz. Albucasis-Übersetzung der Hs. BNF fr. 1318, mit Einleitung und Glossar. Dieser bisher vernachlässigte Text ist zuerst als einer der frühesten volkssprachlichen Chirurgie-Texte des Mittelalters (ca. 1270) wichtig; aber auch, weil die Albucasis-Version aus dem Arabischen (via einer mittellateinischen Redaktion) übersetzt wurde; und als Beispiel der altlothringischen Fachprosa. Der stark dialektgefärbte Text bietet nicht nur zahlreiche Erstbelege von medizinischen Fachwörtern im Französischen, sondern auch eine Vielzahl von bisher nicht belegten Arabismen.
