*Last of the Flying Clippers* M. D. Klaás, 1998 Finally, over 50 years after her last flight with Pan American Airways, the complete story of the famed, Boeing-built, B-314 flying Clipper ship has been written. Author M.D. Klaás, historian and writer of Pan Am's early flying boat era during the 1930s and 1940s, has put together historical accounts of America's greatest - and the world's largest - commercial airplane of the 1930s and early 1940s. It covers the multiple reasons for the plane's conception, stages of construction, testing, delivery flights, christenings, inaugural operations, established records, World War II special missions' histories, post-war services and the individual demise accounts surrounding each of the twelve models built specifically for Pan Am. The history of sales to and operations with British Overseas Airways (B.O.A.C.) - now British Airways - is also included in in-depth coverage.

**Air Force One** Nicholas A Veronico, 2018-03 Featuring over sixty years of noted presidential travel through the air, Air Force One features never-before-seen photography and updates the story through 2017.

**In the Event of a Water Landing** Michael G. Walling, 2010 In the Event of a Water Landing At 8:15 A.M. on October 14, 1947, Chuck Martin, the 26-year-old pilot of the Boeing 314 flying boat named Bermuda Sky Queen, attempted to do what had never been done before - land an 88,000 pound aircraft in thirty-five-foot high seas. The lives of sixty-eight passengers and crew on board depended on his ability. A mile away was the 327-foot US Coast Guard Cutter George M. Bibb. The cutter's crew watched as the plane descended. If Sky Queen survived the landing, getting the passengers to safety would be their job. Nine years later and half a world away, Captain Richard Ogg, flying the Pan American Airways Stratocruiser Sovereign of the Skies, was forced ditch the aircraft along with its forty-three passengers and crew. The Coast Guard was nearby. Manning Ocean Station November was the US Coast Guard Cutter Pontchartrain. Once more, rescuing the survivors would be in their hands. In the Event of a Water Landing tells for the first time the full stories of the Bermuda Sky Queen and Sovereign of the Skies rescues, the only two completely successful open ocean ditchings in Commercial Aviation history. These two stories encompass many facets of ditchings: bad weather, engine failure, horrific sea conditions, and indomitable courage in the face of death. Between these two are tales of other ditchings as well as the journey we humans have undertaken from the beginning of transoceanic flight to today. Using the voices of passengers, flight crew, and those who rescued them, an amazing tale unfolds. Their vivid memories, interspersed with contemporary news reports, serve to flesh out the unemotional entries from official investigations. These ditchings and rescues embody the hopes, fears, and courage of people facing death hundreds of miles from land and the audacity of the men who risked their own lives to save them.

**Pan American World Airways** Laura J. Hoffman with retired Pan Am Captain Duyane A. Hoffman, 2015 In 1927, American entrepreneur Juan T. Trippe founded what would later become Pan American World Airways, one of the world's most prominent airlines of the 20th century. From the very first airmail flight flown from Key West to Cuba, Trippe provided leadership and innovation that put Pan Am at the top of the commercial airline industry. His global pioneering spirit expanded the world's reach for the masses while at the same time provided the most glamorous of air-travel experiences. The rise and fall of an American empire is examined in this full-color postcard history of Pan Am.

*Flying Boats* Charles Woodley, 2018-08-10 Flying Boats: Air Travel in the Golden Age sets out to do justice to a time of glamorous, unhurried air travel, unrecognisable to most of today's air travellers, but sorely missed by some. During the 1930s, long-distance air travel was the preserve of the flying boat, which transported well-heeled passengers in ocean-liner style and comfort across the oceans. But then the Second World War came, and things changed. Suddenly, landplanes were more efficient, and in abundance: long concrete runways had been constructed during the war that could be used by a new generation of large transport aircraft; and endless developments in aircraft meant they could fly faster and for further distances. Commercial flying boat services resumed, but their days would be

numbered.

**The Aviation History** Relly Victoria Petrescu, Florian Ion Petrescu, 2013-02 According to Aulus Gellius, Archytas, the Ancient Greek philosopher, mathematician, astronomer, statesman, and strategist, was reputed to have designed and built, around 400 BC, the first artificial, self-propelled flying device, a bird-shaped model propelled by a jet of what was probably steam, said to have actually flown some 200 metres. This machine, which its inventor called The Pigeon, may have been suspended on a wire or pivot for its flight. The 9th century Muslim Berber inventor, Abbas Ibn Firnas's glider is considered by John Harding to be the first attempt at heavier-than-air flight in aviation history. In 1010 AD an English monk, Eilmer of Malmesbury purportedly piloted a primitive gliding craft from the tower of Malmesbury Abbey. Eilmer was said to have flown over 200 yards (180 m) before landing, breaking both his legs. He later remarked that the only reason he did not fly further was because he forgot to give it a tail, and he was about to add one when his concerned Abbot forbade him any further experiments. Bartolomeu de Gusmão, Brazil and Portugal, an experimenter with early airship designs. In 1709 demonstrated a small airship model before the Portuguese court, but never succeeded with a full-scale model. Pilâtre de Rozier, Paris, France, first trip by a human in a free-flying balloon (the Montgolfière), built by Joseph-Michel and Jacques-Étienne Montgolfier, . 9 km covered in 25 minutes on October 15, 1783. (see Le Globe below for first unmanned flight, 2 months earlier) Professor Jacques Charles and Les Frères Robert, two French brothers, Anne-Jean and Nicolas-Louis, variously shared three milestones of pioneering flight: Le Globe, the first unmanned hydrogen gas balloon flew on 26 August 1783. On 1 December 1783 La Charlière piloted by Jacques Charles and Nicolas-Louis Robert made the first manned hydrogen balloon flight. In 1951, the Lockheed XFV-1 and the Convair XFY tailsitters were both designed around the Allison YT40 turboprop engine drivin

**Night Over Water** Ken Follett, 2011-06-04 Set during the outbreak of the Second World War, Night Over Water is about a perilous journey across the Atlantic to escape Britain, from the number one bestseller and master of the historical thriller, Ken Follett. The Eve of War Britain has just declared war against Nazi Germany. In Southampton, the world's most luxurious airliner, the Pan American Clipper, takes off on its final flight to neutral New York – a haven for those fleeing the conflict. A Disparate Group Flees The passengers aboard the plane each have their own reasons for leaving Britain. Amongst them are an English aristocrat fleeing with his family and a fortune in jewels; a German scientist running away from the Nazis; a murderer returning under FBI escort; a wife escaping her controlling husband; and a devious thief determined to keep his spoils. A Journey into Danger Trapped on the plane, with only their fellow passengers for company, their journey over the Atlantic becomes increasingly fraught. Especially when it becomes apparent a plot is unfolding that may endanger all of their lives . . .

**Wings** Tom D Crouch, 2004-11-09 The Invention of the Airplane ushered in the modern age. Tom D. Crouch chronicles how conquest of the skies shifted the way people travel, wage war, and perceive the promise of life. From balloons and kites to passenger jets, from stealth fighters to interplanetary rockets, Crouch tells how the enthusiasm of amateurs spawned an industry that now determines the rise and fall of nations. Achievements have been breathtaking, and yet this is not a tale of unalloyed progress. Blind alleys ended in debt and failure; bitter disappointment and stark terror exacted a price for technical progress. In the end, there is no more fascinating cast of characters than those who wrote history in the sky and, in living a dream, forever changed the world. Book jacket.

**American Flying Boats and Amphibious Aircraft** E.R. Johnson, 2016-03-29 This work is a comprehensive, heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States. It is divided into three chronological sections: the early era (1912-1928), the golden era (1928-1945), and the post-war era (1945-present), with historical

overviews of each period. Within each section, individual aircraft types are listed in alphabetical order by manufacturer or builder, with historical background, technical specifications, drawings, and one or more photographs. Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage.

**America Goes Hawaiian** Geoff Alexander, 2018-12-31 How did Hawaiian and Polynesian culture come to dramatically alter American music, fashion and decor, as well as ideas about race, in less than a century? It began with mainland hula and musical performances in the late 19th century, rose dramatically as millions shipped to Hawaii during the Pacific War, then made big leap with the advent of low-cost air travel. By the end of the 1950s, mainlanders were hosting tiki parties, listening to exotic music, lazing on rattan furniture in Hawaiian shirts and, of course, surfing. Increasingly, they were marrying people outside of their own racial groups as well. The author describes how this cultural conquest came about and the people and events that led to it.

*High Hulls* Charles R. G. Bain ,2018-11-27 For a time, the flying boat was seen as the way of the future. These aircraft, so strange and foreign to the modern mind, once criss-crossed the world and fulfilled essential military roles. In his latest book for Fonthill, Charles Bain looks at the golden age of the flying boat, when these sometimes strange and often beautiful vessels spanned the globe. These vessels-a combination of ship and airplane-found themselves working as patrol aircraft, passenger aircraft, transports, and even as combat aircraft. This volume contains their stories, from memorable aircraft such as the Short Sunderland and Boeing 314 Clipper, to the craft that roamed the Pacific Theatre of the Second World War, to forgotten giants from Saunders-Roe and even strange jet fighters that once landed like ducks. It even includes the flying boat that has not let time get in the way of doing its job-the Martin Mars. Each of these aircraft has a story worthy of the telling, and often a memorable role to play in the history of aviation. `High Hulls' delves deeply into a long-vanished part of aviation's golden age.

*Ken Follett and the Triumph of Suspense* Carlos Ramet, 2014-11-28 Ken Follett wrote his first international bestseller, *Eye of the Needle*, when he was 25 years old. He has since been one of the most consistent international best-selling authors, with approximately 130 million copies of his books sold worldwide. His manifold influences on the thriller genre includes the pioneering use of strong female characters in espionage stories and the development of the historical thriller as a new form of novel, exemplified by *Winter of the World* (2012). This book is an investigation of Follett's development as an author, and of the craft of writing and the negotiation of serious versus popular literary value, from his earliest short stories and screenplays through his mature thrillers and entertainment fiction. Unpublished materials are also considered, including his notes, business and personal correspondence, unpublished drafts, journal entries and outlines. Follett's dramatic shift to writing historical fiction may be his most enduring legacy.

*Pan Am at War* Mark Cotta Vaz, John H. Hill, 2019-02-12 Pan Am at War chronicles the airline's historic role in advancing aviation and serving America's national interest before and during World War II. From its inception, Pan American Airways operated as the "wings of democracy," spanning six continents and placing the country at the leading edge of international aviation. At the same time, it was clandestinely helping to fight America's wars. Utilizing government documents, declassified Freedom of Information Act material, and company documents, the authors have uncovered stories of Pan Am's stunning role as an instrument of American might: The airline's role in building air bases in Latin America and countering Axis interests that threatened the Panama Canal Creating transatlantic and trans-Africa supply lines for sending Lend-Lease equipment to Britain Cooperation with Chiang Kai-shek and the Chinese nationalist government to pioneer the dangerous "Hump" route over the Himalayas The dangerous seventeen-thousand-mile journey that took President Roosevelt to the high-stakes Casablanca Conference with Winston Churchill The daring flight that delivered uranium for the

atomic bomb. Filled with larger-than-life characters, and revelations of the vision and technology it took to dominate the skies, Pan Am at War provides a gripping unknown history of the American Century.

**The World's Most Significant and Magnificent Aircraft** David Thurston, 2000-07-21  
Beginning with the earliest pre-flight designs, The World's Most Significant and Magnificent Aircraft provides exciting details of each plane's engineering, design, and flight accomplishments. Illustrated with pre-production diagrams and historical photos, the book is divided into seven parts representing the major stages of airplane development in a chronological order.
