Building Sustainable Competitive Advantage Dharendra Kumar,2016-03-03 In Building Sustainable Competitive Advantage Dharendra Kumar shows how the Enterprise Excellence (EE) philosophy is a holistic approach for leading an enterprise to total excellence. It does this by focussing on achieving sustainable significant growth in revenue and profitability, reducing the business cycle time, strategically managing the enterprise risk and focusing on the needs of the customer. There may be various organizations within an enterprise but they must all focus on meeting or exceeding customer needs. Therefore, EE is an integrated approach affecting every employee, every functional area and strategy within the organization. Enterprise risk must be identified, assessed and prioritized; developing a growth strategy proposal which leadership has to execute in order to achieve goals. As business leaders spearhead the efforts, they must minimize, monitor and control the probability and/or impact of unfortunate events and maximize the realization of opportunities. The achievements in Enterprise Excellence can range from greater cost efficiencies, improved market perceptions, fundamental changes to markets, to new product and service offerings. There may also be significant upgrades in skills, technology, and business strategies. The scope of Enterprise Excellence can also range from operations activities, to business functions, to overall organization and to the enterprise as a whole. Building Sustainable Competitive Advantage is a comprehensive reference book for practising professionals, teaching faculty, and students alike.
