Ch-47 Chinook in Action David Doyle,2018-02-14 The Boeing Vertol CH-47 Chinook heavy-lift helicopter has become an icon. Its tandem, contra-rotating rotors whirling above an aluminum fuselage punctuated by round porthole windows make this battlefield beast easily recognizable. Its status is owed to its long service life of more than 55 years. Experts predict its longevity will ultimately reach a century of service for heavy lift and use as a flying bus to deliver troops to the fight. This all-new volume explores the development and the U.S. military service of 13 models of Chinook from 1958 to date. Included is extensive coverage of the CH-47's use in Vietnam through Desert Storm and into current operations in Iraq and Afghanistan. Additional coverage is provided of the helicopters use during various disaster relief efforts in the United States and around the world. More than 160 archival color photos, augmented by 48 vintage black and white images and numerous line drawings, present a clear and concise illustrated history of this iconic helicopter.

The Final Mission of Extortion 17 Ed Darack,2017-09-19 On August 6, 2011, a U.S. Army CH-47D Chinook helicopter approached a landing zone in Afghanistan 40 miles southwest of Kabul. The helicopter, call sign Extortion 17, was on a mission to reinforce American and coalition special operations troops. It would never return. Insurgents fired at the Chinook, severed one of its rear rotor blades, and brought it crashing to the ground. All 38 onboard perished instantly in the single greatest moment of sacrifice for Americans in the war in Afghanistan. Those killed were some of the U.S.'s most highly trained and battle-honed commandos, including 15 men from the Gold Squadron of the Naval Special Warfare Development Group, known popularly as SEAL Team 6, which had raided a Pakistan compound and killed Osama bin Laden just three months earlier. The downing of Extortion 17 spurred a number of conspiracy theories, such as the idea that the shootdown was revenge for bin Laden's death. In *The Final Mission of Extortion 17*, Ed Darack debunks this theory and others and uncovers the truth behind this mysterious tragedy. His account of the brave pilots, crew, and passengers of Extortion 17 and the events of that fateful day is interwoven into a rich, complex narrative that also discusses modern joint combat operations, the history of the Afghan war to that date, U.S. helicopter use in Afghanistan, and the new and evolving military technologies and tactics being developed to mitigate such tragedies now and in the future. Canadian Warplanes Harold A. Skaarup,2009-11 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the

major examples in addition to the serial numbers assigned to Canadian service aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canada's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canada's Warplane survivors.

United States Military Helicopters Michael Green, 2017-10-30 The helicopter came on the scene too late to play other than a minor role in the Second World War but by the Korean conflict the Bell H-13 Sioux, OH-23 Raven, and Sikorsky H-19 Chickasaw were in service. It was in Vietnam that the US military helicopters really came into their own and the best known were the Bell UH-1 Iroquois (known as the Huey), the Boeing CH-47 Chinook, and the massive CH-53 Mojave. The USAF combat search and rescue Jolly Green Giant was indispensable. Attack helicopters have evolved from the early Huey Cobra or Snake and the Boeing AH-64 Apache in the late 80s to when the Sikorsky UH-60 series became the military general purpose chopper. All these formidable aircraft and many more are covered in detail in this superbly illustrated and comprehensive book.

Vietnam by Chinook Edward Corlew, 2020-11-10 Like many other young men during the Vietnam War, Ed Corlew enlisted in hopes of having some influence regarding assignment--safety and training. Instead he found himself in the dangerous door gunner position and, soon after, the crew chief aboard a CH-47 Chinook, 15 miles from the DMZ in 1967 and 1968. Assigned to the famed 1st Cavalry Division, Corlew was shot down three times: in the Battle of Hue, the Battle of Quang Tri, and the A Shau Valley. This memoir began both as a journal and as counselor-recommended therapy for PTSD. He earned four bronze service stars for his service (an estimated 1000 flying hours) during the war's bloodiest year, enduring enemy mortar and rocket attacks. Engaging, frank, and full of action, Corlew describes his many combat experiences as well as the emotional effects--all through the lens of his Christian faith.

US Army AH-1 Cobra Units in Vietnam Jonathan Bernstein, 2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

The Mull of Kintyre Review Mull of Kintyre Review, 2011-07-13 The Review team were appointed to examine all available evidence relating to the findings of the RAF Board of Inquiry in the fatal accident on 2 June 1994 in which RAF Chinook helicopter ZD576 crashed on the Mull of Kintyre, killing all 29 on board. The accident resulted in one of the worst peacetime accident and dealt a severe blow to the services and agencies of which the

passengers were important members. The investigating Board were unable to determine a definite cause of the accident despite detailed analysis. They, however, concluded that the most probable cause was the selection by the pilots of an inappropriate rate of climb which was insufficient to enable them to safely overfly the high ground of the Mull of Kintyre. The finding has been and remains controversial. The unfairness to deceased aircrew in disciplinary procedures was recognised and the Air Force Board has accepted the introduction of a provision which created a very high standard of proof in relation to findings of negligence. Because of the absence of a cockpit recorder and flight data recorder it cannot be known what was going on in the cockpit in the moments before the crash. The Reviewing Officers' approach to this gap in the evidence was to apply to both pilots what amounted to a presumption of negligence which was inconsistent with the standard of proof. In conclusion this Review recommends that the findings of pilot negligence be set aside; that the Ministry of Defence should consider offering an apology the pilots' families; and that the Ministry of Defence should reconsider its policy and procedures for the transport of personnel

The Night Stalkers Michael J. Durant, Steven Hartov, Robert L. Johnson, 2006-12-28 From the New York Times bestselling authors of In the Company of Heroes comes a thrilling account of military aviation for history buffs and "for those who love vivid tales of battlefield heroics" (Publishers Weekly). In the world of covert warfare, Special Operations pilots are notoriously close-lipped about what they do. They don't talk about their missions to anyone outside their small community. But now, Michael J. Durant and Steven Hartov shed fascinating light on the mysterious elite commandos known as SOAR (Special Operations Aviation Regiment) and take readers into a shadowy world of combat they have only imagined.
