Ch-47 Chinook in Action David Doyle,2018-02-14 The Boeing Vertol CH-47 Chinook heavy-lift helicopter has become an icon. Its tandem, contra-rotating rotors whirling above an aluminum fuselage punctuated by round porthole windows make this battlefield beast easily recognizable. Its status is owed to its long service life of more than 55 years. Experts predict its longevity will ultimately reach a century of service for heavy lift and use as a flying bus to deliver troops to the fight. This all-new volume explores the development and the U.S. military service of 13 models of Chinook from 1958 to date. Included is extensive coverage of the CH-47's use in Vietnam through Desert Storm and into current operations in Iraq and Afghanistan. Additional coverage is provided of the helicopters use during various disaster relief efforts in the United States and around the world. More than 160 archival color photos, augmented by 48 vintage black and white images and numerous line drawings, present a clear and concise illustrated history of this iconic helicopter.

The Final Mission of Extortion 17 Ed Darack,2017-09-19 On August 6, 2011, a U.S. Army CH-47D Chinook helicopter approached a landing zone in Afghanistan 40 miles southwest of Kabul. The helicopter, call sign Extortion 17, was on a mission to reinforce American and coalition special operations troops. It would never return. Insurgents fired at the Chinook, severed one of its rear rotor blades, and brought it crashing to the ground. All 38 onboard perished instantly in the single greatest moment of sacrifice for Americans in the war in Afghanistan. Those killed were some of the U.S.'s most highly trained and battle-honed commandos, including 15 men from the Gold Squadron of the Naval Special Warfare Development Group, known popularly as SEAL Team 6, which had raided a Pakistan compound and killed Osama bin Laden just three months earlier. The downing of Extortion 17 spurred a number of conspiracy theories, such as the idea that the shootdown was revenge for bin Laden's death. In *The Final Mission of Extortion 17*, Ed Darack debunks this theory and others and uncovers the truth behind this mysterious tragedy. His account of the brave pilots, crew, and passengers of Extortion 17 and the events of that fateful day is interwoven into a rich, complex narrative that also discusses modern joint combat operations, the history of the Afghan war to that date, U.S. helicopter use in Afghanistan, and the new and evolving military technologies and tactics being developed to mitigate such tragedies now and in the future. This Is the Ch-47 Chinook Loraine D. Nunley,2016-05-13 The CH-47 Chinook aircraft is one of the most reliable and efficient transport helicopters in the world. Its ability to fly fast and transport heavy loads in many different climates and wind conditions make it

an invaluable part of military transport aircraft. This book is intended to introduce children to this important helicopter through striking photographs. Adults may also find themselves fascinated by the remarkable capabilities of this machine.

ABC's of Military Helicopters David Blanchard,2013-10-03 ABC's of Military Helicopters explores the path of rotary wing combat vehicles from the earliest past to futuristic concepts. Done in the style of a children's ABC book, with a unique vehicle selected for each letter, and its technical data and historical over view listed side by side ABC's of Military Helicopters is great for history, military and aviation enthusiasts of all ages.

Call Sign Extortion 17 Don Brown,2015-05-29 On August 6, 2011—three months after members of Navy SEAL Team Six killed Osama Bin Laden—Taliban forces took down a United States helicopter, call sign “Extortion 17.” The attack killed the Air National guard crew, seven unidentified members of the Afghan military, and seventeen members of Navy SEAL Team Six—warrior brothers from the same Team had killed Osama Bin Laden just ninety days prior. Don Brown, a former U.S. Navy JAG officer stationed at the Pentagon and a former Special Assistant United States Attorney, re-creates the wartime action, tells the life stories of the elite warriors our nation lost on that day, and tears apart the official military explanation of the incident contained in the infamous Colt Report, which reveals either gross incompetence or a massive cover-up. Call Sign Extortion 17 focuses on a series of key factors pointing to a conspiracy, including the inexplicable disappearance of the black box, autopsy evidence arbitrarily destroyed, the failure to acknowledge reports of Taliban infiltration into the Afghan military, and the Taliban's vengeful campaign of targeting SEAL Team Six after U.S. government officials revealed that the elite fighting unit was responsible for killing Bin Laden. Were the seven Afghani soldiers aboard that helicopter really undercover Taliban who either maneuvered the chopper within easy range of being shot down or blew it up from within? Through a serious examination of the evidence, and the lack thereof, Brown tackles the issues of the case as only an experienced military prosecutor can.

United States Military Helicopters Michael Green,2017-10-30 The helicopter came on the scene too late to play other than a minor role in the Second World War but by the Korean conflict the Bell H-13 Sioux, OH-23 Raven, and Sikorsky H-19 Chickasaw were in service.It was in Vietnam that the US military helicopters really came into their own and the best known were the Bell UH-1 Iriquois (known as the Huey), the Boeing CH-47 Chinook, and the massive CH-37 Mojave. The USAF combat search and rescue Jolly Green Giant was indispensable.Attack helicopters have evolved from the early Huey Cobra or Snake and the Boeing AH-64 Apache in the late 80s to when the Sikorsky UH-60 series became the military general purpose chopper.All these formidable aircraft and many more are covered in detail in this superbly illustrated and comprehensive book.

United States Army Aviation Digest ,1964

Canadian Warplanes Harold A. Skaarup,2009-11 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been flown by members of the Canadian Air Force, Royal Canadian Air Force, Royal Canadian Navy, Canadian Army and the present-day Canadian Forces. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active Canadian squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to Canadian service aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians

throughout Canada and overseas. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Canada's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Canada's Warplane survivors.

Success Stories, 2001

Vietnam by Chinook Edward Corlew, 2020-11-10 Like many other young men during the Vietnam War, Ed Corlew enlisted in hopes of having some influence regarding assignment--safety and training. Instead he found himself in the dangerous door gunner position and, soon after, the crew chief aboard a CH-47 Chinook, 15 miles from the DMZ in 1967 and 1968. Assigned to the famed 1st Cavalry Division, Corlew was shot down three times: in the Battle of Hue, the Battle of Quang Tri, and the A Shau Valley. This memoir began both as a journal and as counselor-recommended therapy for PTSD. He earned four bronze service stars for his service (an estimated 1000 flying hours) during the war's bloodiest year, enduring enemy mortar and rocket attacks. Engaging, frank, and full of action, Corlew describes his many combat experiences as well as the emotional effects--all through the lens of his Christian faith.

Modern Air Power Michael Heatley, 1991 Comprehensive account of helicopter development and deployment since 1945.

Optimizing Small Multi-Rotor Unmanned Aircraft Stephen D. Prior, 2018-09-18 This design guide was written to capture the author's practical experience of designing, building and testing multi-rotor drone systems over the past decade. The lack of one single source of useful information meant that the past 10 years has been a steep learning curve, a lot of self-tuition and many trial and error tests. Lessons learnt the hard way are not always the best way to learn. This book will be useful for the amateur drone pilot who wants to build their own system from first principles, as well as the academic researcher investigating novel design concepts and future drone applications.

UH-1 Huey Gunship vs NVA/VC Forces Peter E. Davies, 2021-08-19 Often described as the US Army's aerial jeep the UH-1 Iroquois ('Huey') was the general-purpose vehicle that provided mobility in a hostile jungle environment which made rapid troop movement extremely challenging by any other means. Hueys airlifted troops, evacuated casualties, rescued downed pilots, transported cargo externally and enabled rapid transit of commanders in the field. Although 'vertical aviation' had only become a practical reality during the Korean War helicopters evolved rapidly in the decade before Vietnam and by 1965 the US Army and US Marines relied on them as primary combat tools. This was principally because North Vietnam's armed forces had long experience of jungle operations, camouflage and evasion. Generally avoiding set-piece pitched battles they relied on rapid, frequent strikes and withdrew using routes that were generally inaccessible to US vehicles. They commonly relied on darkness and bad weather to make their moves, often rendering them immune to conventional air attack. Gunship helicopters, sometimes equipped with Firefly searchlights and early night vision light intensifiers, were more able to track and attack the enemy. Innovative tactics were required for this unfamiliar combat scenario and for a US Army that was more prepared for conventional operations in a European-type setting. One of the most valuable new initiatives was the UH-1C 'Huey Hog' or 'Frog' gunship, conceived in 1960 and offering more power and agility than the UH-1B that pioneered gunship use in combat. Heavily armed with guns and rockets and easily transportable by air these helicopters became available in large numbers and they became a major problem for the insurgent forces throughout the war. Covering fascinating details of the innovations in tactics and combat introduced by gunship helicopters, this book offers an analysis of their adaptability and usefulness in a variety of

operations, while exploring the insurgent forces' responses to the advent of 'vertical aviation'.

The Night Stalkers Michael J. Durant, Steven Hartov, Robert L. Johnson, 2006-12-28 From the New York Times bestselling authors of *In the Company of Heroes* comes a thrilling account of military aviation for history buffs and “for those who love vivid tales of battlefield heroics” (Publishers Weekly). In the world of covert warfare, Special Operations pilots are notoriously close-lipped about what they do. They don’t talk about their missions to anyone outside their small community. But now, Michael J. Durant and Steven Hartov shed fascinating light on the mysterious elite commandos known as SOAR (Special Operations Aviation Regiment) and take readers into a shadowy world of combat they have only imagined.
