Carefully selected by an international panel of experts and arranged in a uniquely structured sequence to highlight thought-provoking contrasts and similarities, this stunning compilation of botanically themed images includes iconic work by celebrated artists, photographers, scientists, and botanical illustrators, as well as rare and previously unpublished images.

**Botanical Sketchbook** Mary Ann Scott, Margaret Stevens, 2015-03-05 This is the story of one woman's journey from amateur painter to botanical artist, told through the sketchbooks and paintings she produced for the Distance Learning Diploma Course run by the Society of Botanical Artists. This book is both a showcase of Mary Ann Scott's work and a record of her achievements, including first-hand

accounts of the joys and challenges she faced as she progressed. It contains work from every assignment she undertook, from her first attempts at drawing a tulip to the triumphant paintings she made for her diploma portfolio. Along the way are delicate floral compositions, juicy fruit and vegetables, botanical dissections, and her adventures out in the field. Margaret Stevens's comments on each assignments are also included, giving an insight into the assessment process and an all-round view of Mary Ann's successes and (very rare) failures. The book ends with a glorious selection of Mary Ann's ongoing work as a botanical artist.

**Botanical Art from the Golden Age of Scientific Discovery** Anna

Laurent,2016-10-24 Throughout the nineteenth and twentieth centuries, wall charts were a familiar classroom component, displaying scientific images at a

large scale, in full color. But it's only now that they've been superseded as a teaching tool that we have begun to realize something their ubiquity hid: they are stunning examples of botanical art at its finest. This beautifully illustrated oversized book gives the humble wall chart its due, reproducing more than two hundred of them in dazzling full color. Each wall chart is accompanied by captions that offer accessible information about the species featured, the scientists and botanical illustrators who created it, and any particularly interesting or innovative features the chart displays. And gardeners will be pleased to discover useful information about plant anatomy and morphology and species differences. We see lilies and tulips, gourds, aquatic plants, legumes, poisonous plants, and carnivorous plants, all presented in exquisite, larger-than-life detail. A unique fusion of art, science, and education, the wall charts gathered here offer a glimpse into a wonderful scientific heritage and are sure to thrill naturalists, gardeners, and artists alike.
