**A Narrative of the Expedition to Botany Bay** Watkin Tench, 2013-09-26 An account published in 1789 of the voyage of the First Fleet to Australia by a sailor on the expedition.

The Road to Botany Bay Paul Carter, 2013-11-30 The Road to Botany Bay, first published in 1987 and considered a classic in the field of cultural and historical geography, examines the poetic constitution of colonial society. Through a far-reaching exploration of Australia's mapping, narrative description, early urbanism, and bush mythology, Paul Carter exposes the mythopoetic mechanisms of empire. A powerfully written account of the ways in which language, history, and geography influenced the territorial theater of nineteenth-century imperialism, the book is also a call to think, write, and live differently.

**Botany Bay** Charles Bernard Nordhoff, James Norman Hall, 2018-09-05 An interesting historical novel by the authors of *Mutiny on the Bounty*. The novel describes the life of the Hugh Tallant, as told by himself. Hugh Tallant, an American, is convicted in London of highway robbery and as such exported as a convict to New South Wales, Australia, as part of the First Fleet. The story shows its readers the hardship of the convicts who arrived on the First Fleet, as well as the even worse conditions endured by the convicts of the Second Fleet. Because the historical data is given as part of a fictional story, the book makes both an interesting and pleasant read

**A Narrative of the Expedition to Botany-Bay** Watkin Tench, 2020-09-28 The expedition on which he is engaged has excited much curiosity, and given birth to many speculations, respecting the consequences to arise from it. While men continue to think freely, they will judge variously. Some have been sanguine enough to foresee the most beneficial effects to the Parent State, from the Colony we are endeavouring to establish; and some have not been wanting to pronounce the scheme big with folly, impolicy, and ruin. Which of these predictions will be completed, I leave to the decision of the public. I cannot, however, dismiss the subject without expressing a hope, that the candid and liberal of each opinion, induced by the humane and benevolent intention in which it originated, will unite in waiting the result of a fair trial to an experiment, no less new in its design, than difficult in its execution. As this publication enters the world with the name of the author, candour will, he trusts, induce its readers to believe, that no consideration could weigh with him in an endeavour to mislead them. Facts are related simply as they happened, and when opinions are hazarded, they are such as, he hopes, patient inquiry, and deliberate decision, will be found to have authorised. For the most part he has spoken from actual observation; and in those places where the relations of others have been unavoidably adopted. He has been careful to search for the truth, and repress that spirit of exaggeration which is almost ever the effect of novelty on ignorance. The nautical part of the work is comprized in as few pages as possible. By the professional part of my readers this will be deemed judicious; and the rest will not, I believe, be dissatisfied at its brevity. I beg leave, however, to say of the astronomical calculations, that they may be depended on with the greatest degree of security, as they were communicated by an officer, who was furnished with instruments, and commissioned by the Board of Longitude, to make observations during the voyage, and in the southern hemisphere. An unpractised writer is generally anxious to bespeak public attention, and to

solicit public indulgence. Except on professional subjects, military men are, perhaps, too fearful of critical censure. For the present narrative no other apology is attempted, than the intentions of its author, who has endeavoured not only to satisfy present curiosity, but to point out to future adventurers, the favourable, as well as adverse circumstances which will attend their settling here. The candid, it is hoped, will overlook the inaccuracies of this imperfect sketch, drawn amidst the complicated duties of the service in which the Author is engaged, and make due allowance for the want of opportunity of gaining more extensive information.

**Botany Bay and the First Fleet** Alan Frost, 2019-06-04 Now in one definitive volume, *Botany Bay and the First Fleet* is a full, authentic account of the beginnings of modern Australia. In 1787 a convoy of eleven ships, carrying about 1400 people, set out from England for Botany Bay, on the east coast of New South Wales. In deciding on Botany Bay, British authorities hoped not only to rid Britain of its excess criminals, but also to gain a key strategic outpost and take control of valuable natural resources. According to the conventional account, it was a shambolic affair: under-prepared, poorly equipped and ill-disciplined. Here, Alan Frost debunks these myths, and shows that the voyage was in fact meticulously planned – reflecting its importance to Britain's imperial and commercial ambitions. In his examination of the ships, passengers and preparation, Frost reveals the hopes and schemes of those who engineered the voyage, and the experiences of those who made it. The culmination of thirty-five years' study of previously neglected archives, *Botany Bay and the First Fleet* offers new and surprising insights into how Australia came to be.

*Botany Bay* Maria Nugent, 2005-07-01 Botany Bay is renowned as the site of Captain Cook's first landing on the east coast of New Holland in 1770, infamous as the place chosen by the British as a dumping ground for convicts, and celebrated as the birthplace of Australia. In this remarkable history, Maria Nugent takes her readers on a journey to find what lies behind, beneath and beyond these familiar associations. Drawing on stories, objects, images, memories and the landscape itself, she collects the threads of other pasts to weave a rich, compelling and often surprising account. Local meanings jostle with national mythologies, Aboriginal remembrance disturbs white forgetting, the natural environment struggles for survival amid the smokestacks. In the process, Botany Bay becomes a site for meditating on questions of history, myth, memory and politics in Australia. *Botany Bay: where histories meet* explores the role both Aboriginal and non-Aboriginal history-making plays in creating and sustaining local and national communities.
