Gold, Silver & Bronze from Mughal India Mark Zebrowski, 1997 Metalwork has always been to India what ceramics are to China. During the fabled Mughal age, the craftsmen of the Sultans and Rajahs of India produced an astonishing variety of objects in gold and gold enamel, silver, brass, bronze, gilt copper and the Deccani alloy known as bidri. The finest of these are among the most striking and poetic utilitarian wares ever made, in addition to being of the most outstanding technical refinement. This, the first book on the metalwork of Mughal India, illustrates all the great surviving objects, the majority of which have never been published before and are unknown to the western connoisseur.--Jacket.

Weapons and Warfare [2 volumes] Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history, beginning with clubs and maces; through crossbows, swords, and gunpowder; up to the hypersonic railgun, lasers, and robotic weapons under development today. *Weapons and Warfare* is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history. In addition to providing basic factual information, this encyclopedia will delve into the greater historical context and significance of each weapon. The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history. The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods, ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

The India Museum Revisited Arthur MacGregor, 2023-10-05 The museum of the

East India Company formed, for a large part of the nineteenth century, one of the sights of London. In recent years, little has been remembered of it beyond its mere existence, while an assumed negative role has been widely attributed to it on the basis of its position at the heart of one of Britain's arch-colonialist enterprises. Extensively illustrated, *The India Museum Revisited* provides a full examination of the museum's founding manifesto and evolving ambitions. It surveys the contents of its multi-faceted collections – with respect to materials, their manufacture and original functions on the Indian sub-continent – as well as the collectors who gathered them and the manner in which they were mobilized to various ends within the museum. From this integrated treatment of documentary and material sources, a more accurate, rounded and nuanced picture emerges of an institution that contributed in major ways, over a period of 80 years, to the representation of India for a European audience, not only in Britain but through the museum's involvement in the international exposition movement to audiences on the continent and beyond.

Brass Baja Gregory Booth, 2017-05-25 Anyone who has seen a wedding procession in northern India would have heard and seen the band of professional musicians accompanying the procession. Surrounded by bright lamps and dressed in uniforms reminiscent of military finery, these are the men who herald the arrival of the groom. In spite of the singing, dancing, and the ornately clad gathering of family and friends in the procession, it is the band that is often its most noticeable element. This book is a detailed and colourful study of India's wedding bands. It argues that while music performed by the wedding bands helps generate emotions of ecstasy and joy, the bandsmen who play it are in the fringes of the social events they herald. Musically and socially, and by birth and profession, bandsmen at weddings are ascribed low social status. Booth's analysis of bands and bandsmen is rich in symbolism and facts surrounding South Asia's complex and diverse musical history. He explains the band trade as a syncretic component of popular culture constructed during the nineteenth and twentieth centuries in both colonial and independent India. This book tells stories of change witnessed in Indian wedding processions and bands over time. The relationship of musical traditions to the colonial past and India's culture, as also the metaphorical association between musical and cultural changes are also explored.
