A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant, 2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Cold War Armored Fighting Vehicles George Bradford, 2010-10-21 Technical artist and military historian George Bradford covers the Cold War, from the end of World War II through 1990.

Tank Battles of the Cold War, 1948-1991 Anthony Tucker-Jones, 2021-06-30 As Anthony Tucker-Jones shows in this highly illustrated, wide-ranging history, for most of the Cold War the tank retained its pre-eminence on the battlefield. The Arab-Israeli wars witnessed some of the biggest tank battles of all time, and tanks played key roles in conflicts in Korea, Vietnam and Afghanistan as well as in the Iran-Iraq War and the wars fought between India and Pakistan. But then in the mid-1960s anti-tank weapons became ever deadlier and the Mechanised Infantry Fighting Vehicle (MIFV), which was designed to support infantry and fight tanks, emerged and the heyday of the tank was over. Chapters cover each major phase in the evolution of the tank and of tank warfare during the period, from the battles fought in the late 1940s and 1950s with Second World War armoured vehicles like the T-34 and the Sherman, through to the designs common in the 1960s and 1970s like the T-55, Centurion, Challenger and M60 Patton, to the confrontation between the M1 Abrams and the T-72 during the Gulf War in 1991. Technical and design developments are important elements throughout the story, but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare.

Soviet Cold War Weaponry Anthony Tucker-Jones, 2015-05-20 The T-54, T-62 and T-72 main battle tanks along with the personnel carriers, assault guns, self-propelled guns and anti-tank missiles that are illustrated in this photographic history represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War. Although the superpowers never came to blows, the 'Cold War' was far from cold, as numerous 'hot' proxy wars were fought in Africa and the Middle East, and these conflicts employed the Soviet weaponry that is shown in action in the colour and black-and-white photographs selected for this book. Between the 1950s and 1980s Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War. They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service. Much of this Soviet weaponry has achieved almost iconic status and, despite its age, remains in service with armies, guerrilla forces and terrorist organizations around the world today. It is also of enduring interest to collectors, re-enactors and modellers who are fascinated by the military equipment of the late twentieth century.

"Ironsides" Harold A. Skaarup, 2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have

had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

Weapons and Equipment of the Warsaw Pact Russell Phillips,2018-10-10 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly turned hot? This ebook box set contains the first three books of the *Weapons and Equipment of the Warsaw Pact* series: *Tanks and Combat Vehicles of the Warsaw Pact*, *Combat Engineering Equipment of the Warsaw Pact*, and *Artillery of the Warsaw Pact*.

NATO and Warsaw Pact Armoured Fighting Vehicles of the Cold War Michael Green,2024-01-30 While tanks were the most recognized armored vehicles during the Cold War, NATO and Warsaw Pact (WP) armies fielded a wide array of armored fighting vehicles (AFVs). These included armored cars, armored personnel carriers (APCs), anti-aircraft vehicles and self propelled artillery. Over the Cold War years nations both progressively developed series of AFVs and introduced entirely new ranges. APCs, vital to all frontline units, evolved from machine gun-armed battlefield taxis such as the US M113 and Soviet BTR-60 series into sophisticated infantry fighting vehicles. The Soviet BMP-1, US Bradley M2/M3, West German Marder and British Warrior and CVR series were classic examples of the latter, with numerous variants. The Soviet BRDM-2 series was the most numerous armored car. The British Army fielded the Saladin, Ferret and Fox and the German Army introduced the eight-wheeled Luchs and tracked SPZ11-2 Kurz. Early anti-aircraft vehicles, such as the American M42 with two 40mm Bofors, were superseded by the formidable Soviet ZSU-23-4 Shilka and the West German Gepard with radar-guided guns. This authoritative and superbly illustrated book covers the full range of AFVs in service with NATO and WP armies over the four decades of the Cold War. It will be an invaluable addition to the libraries of the expert and layman alike.

Tanks and Combat Vehicles of the Warsaw Pact Russell Phillips,2017-08-22 When East and West survived on a knife-edge between peace and war, both sides were busy preparing themselves for military action. But what exactly would NATO's troops have faced if the Cold War had suddenly

turned hot? Tanks and Combat Vehicles of the Warsaw Pact is a fascinating reference book looking at the wide variety of combat vehicles which were poised and ready for action throughout the long years of military stand-off. Led by the Soviet Union, the nations which formed the Warsaw Pact were as innovative as they were prepared and these deadly war machines had the potential to change the course of world history forever. Find out more about these combat vehicles from how they worked to what they would have been capable of if they had been used in military action against NATO. Tanks and Combat Vehicles of the Warsaw Pact details more than 100 military vehicles from the 2P26 Baby Carriage - a compact Soviet off-road vehicle mounted with anti-tank missiles - to the T-80U main battle tank, in service from 1985 onwards.
