NATO and Warsaw Pact Armoured Fighting Vehicles of the Cold War Michael Green,2024-01-30 While tanks were the most recognized armored vehicles during the Cold War, NATO and Warsaw Pact (WP) armies fielded a wide array of armored fighting vehicles (AFVs). These included armored cars, armored personnel carriers (APCs), anti-aircraft vehicles and self propelled artillery. Over the Cold War years nations both progressively developed series of AFVs and introduced entirely new ranges. APCs, vital to all frontline units, evolved from machine gun-armed battlefield taxis such as the US M113 and Soviet BTR-60 series into sophisticated infantry fighting vehicles. The Soviet BMP-1, US Bradley M2/M3, West German Marder and British Warrior and CVR series were classic examples of the latter, with numerous variants. The Soviet BRDM-2 series was the most numerous armored car. The British Army fielded the Saladin, Ferret and Fox and the German Army introduced the eight-wheeled Luchs and tracked SPZ11-2 Kurz. Early anti-aircraft vehicles, such as the American M42 with two 40mm Bofors, were superseded by the formidable Soviet ZSU-23-4 Shilka and the West German Gepard with radar-guided guns. This authoritative and superbly illustrated book covers the full range of AFVs in service with NATO and WP armies over the four decades of the Cold War. It will be an invaluable addition to the libraries of the expert and layman alike.

"Ironsides" Harold A. Skaarup,2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

U.S. Marine Corps School Of Infantry SOI Complete Training Materials Jeffrey Jones, 2017-10-19 Over 1,400 pages covering the following primary topics: URBAN OPERATIONS BREACHING DEMOLITIONS ANTI-ARMOR WARFARE WEAPONS TRAINING, MAINTENANCE & MARKSMANSHIP MACHINE GUNS PATROLLING INFANTRY TACTICS AND TECHNIQUES NBC COMMUNICATIONS MORTARS ... and more Following Recruit Training, the School of Infantry is the second stage of training for all Infantry Military Occupational Specialty (MOS) Enlisted Marines and marks the transition from entry-level Marines to combat-ready Marines. At SOI, Marines who have recently graduated from recruit training continue their education and training to become more proficient in the fundamentals of being a rifleman. Marines with a Military Occupational Specialty (MOS) of infantry are trained at the Infantry Training Battalion (ITB), while all non-infantry Marines are trained at the Marine Combat Training Battalion (MCT). There are two Schools of Infantry: Camp Geiger located in North Carolina and Camp Pendleton in California. The primary role of the School of Infantry is to ensure, first and foremost, that every Marine is a rifleman. All Marine Corps assets exist to support the rifleman on the ground, and every Marine is prepared to do whatever it takes to ensure the safety of the Marines to their left and right. Regardless of MOS, the ITB mission ensures every Marine has the capability to fulfill his or her duties while operating in a combat environment.

Tank Battles of the Cold War, 1948-1991 Anthony Tucker-Jones, 2021-06-30 As Anthony Tucker-Jones shows in this highly illustrated, wide-ranging history, for most of the Cold War the tank retained its pre-eminence on the battlefield. The Arab-Israeli wars witnessed some of the biggest tank battles of all time, and tanks played key roles in conflicts in Korea, Vietnam and Afghanistan as well as in the Iran-Iraq War and the wars fought between India and Pakistan. But then in the mid-1960s anti-tank weapons became ever deadlier and the Mechanised Infantry Fighting Vehicle (MIFV), which was designed to support infantry and fight tanks, emerged and the heyday of the tank was over. Chapters cover each major phase in the evolution of the tank and of tank warfare during the period, from the battles fought in the late 1940s and 1950s with Second World War armoured vehicles like the T-34 and the Sherman, through to the designs common in the 1960s and 1970s like the T-55, Centurion, Challenger and M60 Patton, to the confrontation between the M1 Abrams and the T-72 during the Gulf War in 1991. Technical and design developments are important elements throughout the story, but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare.

Mission Thomas Wyckoff LTC, US Army (Ret.), 2018-11-03 Mission A Cold War Remembrance By: Thomas Wyckoff LTC, US Army (Ret.) For fifty years following World War II, the US Military Liaison Mission (USMLM) to the Soviet Forces in East Germany was one of the premier intelligence collection organizations in the Cold War struggle between the United States and the Soviet Union. Operating "behind the lines" with excellent access to front line Soviet Forces in East Germany, the officers and non-commissioned officers of the allied Military Liaison Missions conducted continuous, close-up monitoring of the most powerful ground and air forces of the Soviet Union: those directly confronting NATO forces along the inter-German border. The author was a USMLM liaison officer for four years (1982-1986). He conducted 165 missions into East Germany, performing close surveillance of the nineteen Soviet divisions located there. Mission is a personal recollection of those surveillance activities. It is a close-up view of an organization that, for fifty years, stood on the cutting edge of the struggle between the United States and the Soviet Union
