Political Philosophy and Taxation Robert F. van Brederode, 2022-06-02 This book explores how taxation is related to the role of the state and its relationship with its constituents, the concept of private property rights, the concepts of societal fairness and justice, and the battle between the individual and the collective. This book appeals to students and scholars who want to know how philosophers in the past and present think about taxation, and how their thinking has developed through cross-influencing. There exists no comprehensive study providing such an overview. This book is a foundational study on the philosophical justification of taxation (qualitative aspect) and the normative qualifications required of tax law to constitute tax that is just and fair (distributive or quantitative aspect). The latter includes evaluation of what type of tax is morally correct or acceptable to realize distributive justice. This book covers periods from the Enlightenment era until the present. The philosophers are grouped together in schools of thought and each chapter except for chapter 1 and chapter 13, are is dedicated to a specific philosophical school. Moreover, this book aims to provide an overview of each school of thinking and the individual philosophers, including placing them in the context of their times. The book has particular importance as the study of taxation is an underdeveloped area of political and legal philosophy.

John de Witt, Grand Pensionary of Holland, 1625-1672 Herbert Harvey Rowen, 2015-03-08 Known to his contemporaries for his sharpness of mind, strength of purpose, fortitude, and good humor, John de Witt was a brilliant leader whose career ended in a death of horror rarely paralleled in history. Herbert Rowen's biography embraces all aspects of De Witt's political, intellectual, and personal life, including his role as a mathematician admired by Newton, an unphilosophical Cartesian, and a political thinker. The author describes De Witt's youth, Dutch society of his day, and his central part in the domestic and foreign politics of the Dutch Republic from 1651 to 1672. He puts De Witt's relation to the House of Orange in a new light, more subtle than in the traditional history. He also examines in detail De Witt's system of government as councilor pensionary of Holland. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Ethics and Taxation Robert F. van Brederode, 2019-11-02 This book does not present a single philosophical approach to taxation and ethics, but instead demonstrates the divergence in opinions and approaches using a framework consisting of three broad categories: tax policy and design of tax law; ethical standards for tax advisors and taxpayers; and tax law enforcement. In turn, the book addresses a number of moral questions in connection with taxes, concerning such topics as: • the nature of government • the relation between government (the state) and its subjects or citizens • the moral justification of taxes • the link between property and taxation • tax planning, evasion and avoidance • corporate social responsibility • the use of coercive power in collecting taxes and enforcing tax laws • ethical standards for tax advisors • tax payer rights • the balance between individual rights to liberty and privacy, and government compliance and information requirements • the moral justification underlying the efforts of legislators and policymakers to restructure society and steer individual and corporate behavior.

Jordan and the Unseelies Patti Van Brederode, 2017-04-03 One boring mid-summer day, Jordan accompanies his unconventional Aunt Lizzy to Fairywood Farm. He gets more than he expects when he sets off to explore the farm, and finds a very special wolf that is injured and stuck in a hunter's trap. Will Jordan find help in time? Will he find the strength within himself to do what needs to be done to save the wolf? Come with Jordan to Fairywood Farm where his ordinary day turns into something extraordinary; magical creatures, fairies, shape shifters, powerful talismans, and self-discovery await him around every bend!

Virtues and Fallacies of VAT: An Evaluation after 50 Years Robert F. van Brederode, 2021-08-09 Value-added tax (VAT) is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth. VAT is not without criticism however, and faces its own specific technical and policy challenges. This book, the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies, offers authoritative perspectives on VAT's full spectrum—from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors—leading tax practitioners and academics—examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including: revenue generation and revenue efficiency; single rate versus multiple rates; susceptibility to fraud; exemptions and exceptions; compliance cost for businesses; policy and compliance gaps in revenue collection; adjustment rules caused by the transactional nature of the tax; transfer pricing issues; treatment of vouchers; permanent establishments and holding companies; payment of refunds; cross-border digital transactions; and supplies for free or below cost price. The second part offers six country reports—on New Zealand, Japan, China, Colombia, Ethiopia, and India—to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals (both lawyers and accountants) and academics in tax law.

Hart in hart Desanne van Brederode,2009-10-31 Lot Sanders, vierendertig jaar, gelooft in de liefde, in de liefde die inslaat als de bliksem, de meedogenloze liefde, die verslavend is en gek maakt van verlangen. Bedrog ziet ze als een zwakte, en sleur als een keuze - tot ze onverwachts weduwe wordt en tot de schokkende ontdekking komt dat ze haar eigen huwelijk jarenlang heeft geïdealiseerd. Hart in hart is een gepassioneerde roman over liefde en overspel - en over vergeving, die zeldzaam is.

Systems of General Sales Taxation Robert F. W. van Brederode,2009-01-01 This book gives and general overview of sales taxes and describes main characteristics of consumption taxation. It also provides an economic analysis of all the taxes covered and related tax issues such as tax shifting, tax incidence, the economic effect of reduced rates and exemptions, tax accumulation, regressivity, and the Laffer curve approach. In addition, it offers a tax policy approach in regard to specific economic sectors such as the treatment of small enterprises, financial services, and real property. The author further focuses on contrasts between US sales tax and European VAT (in regard of e-commerce and the treatment of capital goods). The work also offers legal analysis in areas such as cross-border transactions and US constitutional restraints.

The Flavonoids Advances in Research Since 1986 J.B. Harborne,2017-10-19 Flavonoids are a group of natural products isolated from a wide variety of plants, and are responsible for much of the coloring found in vascular plants. They exhibit a wide range of biological activities and are of particular interest as potential anti-cancer agents, as insect antifeedants, and as natural insecticides. The Flavonoids: Advances in Research Since 1986 is a self-contained account of this important group of plant products.

Religious Choice in the Dutch Republic Judith Pollmann,1999 How did people learn their Bibles in the Middle Ages? Did church murals, biblical manuscripts, sermons or liturgical processions transmit the Bible in the same way?This book unveils the dynamics of biblical knowledge and dissemination in thirteenth- and fourteenth-century England. An extensive and interdisciplinary survey of biblical manuscripts and visual images, sermons and chants, reveals how the unique qualities of each medium became part of the way the Bible was known and recalled; how oral, textual, performative and visual means of transmission joined to present a surprisingly complex biblical worldview. This study of liturgy and preaching, manuscript culture and talismanic use introduces the concept of biblical mediation, a new way to explore Scriptures and society. It challenges the lay-clerical divide by demonstrating that biblical exegesis was presented to the laity in non-textual means, while the 'naked text' of the Bible remained elusive even for the educated clergy.

The Convening of the Synod of Dordt Donald Sinnema,2022-12-12 The Synod of Dordt 1618/1619 was one of the most important church councils in the history of the Reformed tradition. International delegates from all over Europe served as important participants and played a significant role in the evaluation of Remonstrant doctrine and in the formation of the Canons of Dordt. The Synod made important pronouncements on other issues such as Sunday observance, catechism instruction and theological education. Given the continuing worldwide historical significance of the Synod's Canons and church order, the absence of a critical scholarly edition of the majority of documents of the Synod is remarkable. The Johannes a Lasco Bibliothek in Emden, a leading research center for the history and theology of Reformed Protestantism, has taken the initiative to edit the Acts and documents of the Synod of Dordt. The edition is organized as a RefoRC project, with the participation of other institutions and scholars in Europe and North-America. Vol. II/1 edits the Convening of the Synod.

VAT and Financial Services Robert F. van Brederode,Richard Krever,2017-03-06 This book explains the theoretical and policy issues associated with the taxation of financial services and includes a jurisdictional overview that illustrates alternative policy choices and the legal consequences of those choices . The book addresses the question: how can financial services in an increasingly globalized market best be taxed through VAT while avoiding economic distortions? It supports the discussion of the key practical problems that have arisen from the particular complexity of the application of VAT to financial services, and allows for the evaluation of best practice by comparing the major current reform models now being implemented.

The Life and Work of Dirck Volkertszoon Coornhert H. Bonger,2004 The sixteenth-century Dutch spiritualist and controversialist, Dirck Volckertszoon Coornhert (1522-1590), is increasingly recognized as a pivotal figure in the cultural and political life of the early Dutch Republic. With the appearance of Henk Bonger's widely acclaimed biography (1978), the first complete account of Coornhert's life became available in the Dutch language. Today this biography is still the starting point of any serious research on Coornhert and his circle. This translation now makes this standard biography available in English for the first time. The translator profited from Henk Bonger's comments on the translated chapters, and the author approved of adaptations and changes where these were deemed necessary. The structure and most of the chapters of the book are as they were in the original. The chief changes are: the abridgment and combination into one chapter of the two original chapters on Coornhert's creative work and his translations. The ample quotes from Coornhert contained in the text enable the reader to attain a first hand acquaintance with Coornhert's profound thought and inimitable style. References have been updated and some explanatory remarks intended for a non-Dutch readership were added. The translation is complemented with a full bibliography of Coornhert's writings, as well as an up-to-date bibliography of the secondary literature; with 25 illustrations.

Science, Technology and Taxation Robert F. van Brederode,2012-08-01 This first comprehensive study of the interaction between technology and taxation approaches the subject along four main avenues: insight and analysis gained from empirical legal studies conducted in the area of taxation; methods for improving the control and management of the tax function in business; tax auditing through statistical sampling; and changes in the fiscal environment as a result of technological capabilities. Among the topics that arise are the following: what choices of sampling methodology exist; determination of both one-sided and two-sided confidence intervals; under what circumstances statistical sampling is acceptable as proof of underpayment and as a basis for penalties; the use of

sampling agreements as a tool to improve taxpayers’ understanding of the process; complexities encountered by the introduction of technology in tax administration in developing countries; technological capability to detect economic activity in the informal sector; technological innovation as substitute for inadequate human capacity; improvements available to better monitor the movement and values of goods entering a country; safeguards to prevent unauthorized use of personal information; prioritizing resources to ensure that the key strategic objectives of the agency are being addressed; government defensive action and the threat to privacy; and capabilities and limitations of enterprise resource planning systems and tax engines. Although the author pays especially detailed attention to the technologies developed and used by the United States Internal Revenue Service, other notable systems developed by the European Union, Brazil, Mexico, and China are also examined. Various sampling methods and practices are illustrated with numerical examples. As tax systems acquire ever higher levels of integration, and because accuracy is crucial to the measurement of tax compliance, the perspectives opened and expertly analyzed by the author will prove of great importance. Practitioners, tax policymakers and administrators, tax standard setters, and tribunals dealing with disputes over tax administration and procedure, as well as academics and researchers, will instantly recognize the book’s great importance and practical value.
