Air Show Performers Manolis Karachalios, Daniel Kwasi Adjekum, 2023-12-07 Air shows are high-risk activities that must be conducted with careful thought towards the general public, spectators, and flying and nonflying participants to ensure that the activity is as safe as reasonably possible. The impromptu, ad hoc, unrehearsed or unplanned must never be attempted. This book offers a holistic overview of the state of safety, including safety cultural variables, safety risk parameters, and human performance factors, in the international air show community. This book aims to close the knowledge gap on safety management in air shows. It imparts to the aviation sector and other high-risk and high-performance industries the experience and knowledge that airshow performers have gained regarding risk assessment, psychological aspects, and mindfulness techniques used for safe and effective performances. The book highlights how resilient safety culture can change the air show community's mentality to deliver safer and more spectacular air show events and promotes the culture of excellence that the air show community is wedded to. The reader will obtain a thorough understanding of safety issues in air shows. *Air Show Performers: Safety, Risk Management, and Psychological Factors* is a critical read for professionals within the international air show community including nonflying participants. Its appeal extends to practitioners in aviation, health and safety and events management. "[...] For sure, this book will become a reference and a source of inspiration for future generations of Display Pilots." Jacques Bothelin, French Aerobatic Jet Team Leader, Honorary Board Member European Airshow Council Manolis Karachalios was the Hellenic Air Force's F-16 Demo Team "ZEUS" Display Pilot for the 2010-2012 display seasons. Dr. Karachalios holds a Master of Business Administration (MBA) in Aviation Management from Coventry University, and a Doctor of Philosophy (PhD) in Aerospace Sciences from the University of North Dakota focusing on air show safety and development. Daniel Kwasi Adjekum has over 25 years of experience in aviation as a former Ghana Air Force squadron commander, command pilot, and air display safety director. He was also an airline pilot and is currently an aviation safety consultant and professor of aviation. He is an Internationally recognized aviation safety subject-matter expert and an International Air Transport Association (IATA) certified Safety Management Systems (SMS) implementation and control expert.

Le luxe et les nouvelles technologies Carmen Turki-Kervella, 2015-10-22 Après avoir été en symbiose avec l'art, le luxe entre en osmose avec la technologie. Plus que le design, la mode ou l'art, l'innovation technologique est la nouvelle force motrice de la créativité des marques. Elle ouvre au luxe de prodigieuses possibilités en matière de création de produits et de services, de scénarisation, de communication et de relation, mais soulève également des problématiques nouvelles. Avec les nouvelles technologies, c'est à la fois notre conception du luxe qui change et le luxe lui-même qui évolue. C'est ce qu'explique ce livre très illustré et en couleurs qui montre l'impact des grandes mutations technologiques actuelles sur le luxe.

Why the Wind Blows ,2021-10-19 Through the use of true stories of exploration, *Why the Wind Blows* looks at how these adventures were influenced by the weather and man's ignorance of its consequences. The science of meteorology is gently interspersed throughout the text, so that understanding weather becomes an integral part of the stories. Concluding with the influence of modern civilization on the changing climate and its world-altering consequences, the author challenges the reader to take action now to alter the effects of global warming on future generations.
