Beyond Transparency Brett Goldstein, Lauren

Dyson, 2013-09-30 The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities? Edited by Brett Goldstein, former Chief Data Officer for the City of Chicago, with Code for America, this book features essays from over twenty of the world's leading experts in a first-of-its-kind instructive anthology about how open data is changing the face of our public institutions. Contributors include: Michael Flowers, Chief Analytics Officer, New York City Beth Blauer, former director of Maryland StateStat Jonathan Feldman, CIO, City of Asheville Tim O'Reilly, founder & CEO, O'Reilly Media Eric Gordon, Director of Engagement Game Lab, Emerson College Beth Niblock, CIO, Louisville Metro Government Ryan & Mike Alfred, Co-Founders, Brightscope Emer Coleman, former director of the London Datastore Mark Headd, Chief Data Officer, City of Philadelphia As an essential volume for anyone interested in the future of governance, urban policy, design, data-driven policymaking, journalism, or civic engagement, *Beyond Transparency* combines the inspirational glow and political grit of *Profiles in Courage* with the clarity of an engineer's calm explanation of how something technical actually works. Here are the detailed how-to stories of many members of the first generation of open government pioneers, written in a generous, accessible style; this compilation presents us with a great deal to admire, ample provocation, and wise guidance from a group of remarkable individuals. -Susan Crawford, author of *Captive*

Audience Just as he did during his time in my administration, Goldstein has brought together industry leaders to discuss issues of relevance in the open data movement and the practical implications of implementing these policies... This book will help continue the work to make open government a reality across the country. - Mayor Rahm Emanuel, City of Chicago A must-read for anyone who is passionate about what open data can do to transform city living. - Boris Johnson, Mayor of London

Sicker in the Head Judd Apatow, 2023-04-18 NEW YORK TIMES

BESTSELLER • An all-new collection of honest, hilarious, and enlightening conversations with some of the most exciting names in comedy—from lifelong comedy nerd Judd Apatow. “When I need to read an interview with a comedian while in the bathroom, I always turn to Judd Apatow for deeply personal insights into the comedic mind. Place one on your toilet today.”—Amy Schumer

ONE OF THE BEST BOOKS OF THE YEAR: Vulture No one knows comedy like Judd Apatow. From interviewing the biggest comics of the day for his high school radio show to performing stand-up in L.A. dive bars with his roommate Adam Sandler, to writing and directing *Knocked Up* and producing *Freaks and Geeks*, Apatow has always lived, breathed, and dreamed comedy. In this all-new collection of interviews, the follow-up to the New York Times bestselling *Sick in the Head*, Apatow sits down with comedy legends such as David Letterman, Whoopi Goldberg, and Will Ferrell, as well as the writers and performers who are pushing comedy to the limits, and defining a new era of laughter: John Mulaney, Hannah Gadsby, Bowen Yang, Amber Ruffin, Pete Davidson, and others. In intimate and hilariously honest conversations, they discuss what got them into comedy, and what—despite personal and national traumas—keeps them going. Together, they talk about staying up too late to watch late-night comedy, what kind of nerds they were high school, and the right amount of delusional self-confidence one needs to “make it” in the industry. Like eavesdropping on lifelong friends, these pages expose the existential questions that plague even the funniest and most talented among us: Why make people laugh while the world is in crisis? What ugly, uncomfortable truths about our society—and ourselves—can comedy reveal? Along the way, these comics reminisce about those who helped them on their journey—from early success through failure and rejection, and back again—even as they look ahead to the future of comedy and Hollywood in a hyper-connected, overstimulated world. With his trademark insight, curiosity, and irrepressible sense of humor,

Apatow explores the nature of creativity, professional ambition, and vulnerability in an ever-evolving cultural landscape, and how our favorite comics are able to keep us laughing along the way.

The Four Pivots Shawn A. Ginwright, PhD, 2022-01-25 “Reading this courageous book feels like the beginning of a social and personal awakening...I can’t stop thinking about it.”—Brené Brown, PhD, author of *Atlas of the Heart* For readers of *Emergent Strategy* and *Dare to Lead*, an activist's roadmap to long-term social justice impact through four simple shifts. We need a fundamental shift in our values--a pivot in how we think, act, work, and connect. Despite what we’ve been told, the most critical mainspring of social change isn’t coalition building or problem analysis. It’s healing: deep, whole, and systemic, inside and out. Here, Shawn Ginwright, PhD, breaks down the common myths of social movements--a set of deeply ingrained beliefs that actually hold us back from healing and achieving sustainable systemic change. He shows us why these frames don’t work, proposing instead four revolutionary pivots for better activism and collective leadership: Awareness: from lens to mirror Connection: from transactional to transformative relationships Vision: from problem-fixing to possibility-creating Presence: from hustle to flow Supplemented with reflections, prompts, cutting-edge research, and the author’s own insights and lived experience as an African American social scientist, professor, and movement builder, *The Four Pivots* helps us uncover our obstruction points. It shows us how to discover new lenses and boldly assert our need for connection, transformation,

trust, wholeness, and healing. It gives us permission to create a better future--to acknowledge that a broken system has been predefining our dreams and limiting what we allow ourselves to imagine, but that it doesn't have to be that way at all. Are you ready to pivot?

That Good Night Sunita Puri,2019 A ... memoir about how the essential parts of one young woman's early life--her mother's work as a surgeon and her spiritual practice--led her to become a doctor and to question the premise that medicine exists to prolong life at all costs.--

But Leda has her own reasons for helping: her fiancé Tod was murdered under mysterious circumstances several years ago. Urban Operating Systems Andres Luque-Ayala, Simon Marvin, 2020-12-15 A new wave of enthusiasm for smart cities, urban data, and the Internet of Things has created the impression that computation can solve almost any urban problem. Subjecting this claim to critical scrutiny, in this book, Andrés Luque-Ayala and Simon Marvin examine the cultural, historical, and contemporary contexts in which urban computational logics have emerged. They consider the rationalities and techniques that constitute emerging computational forms of urbanization, including work on digital urbanism, smart cities, and, more recently, platform urbanism. They explore the modest potentials and serious contradictions of reconfiguring urban life, city services, and urban-networked infrastructure through computational operating systems—an urban

OS. Luque-Ayala and Marvin argue that in order to understand how digital technologies transform and shape the city, it is necessary to analyze the underlying computational logics themselves. Drawing on fieldwork that stretches across eleven cities in American, European, and Asian contexts, they investigate how digital products, services, and ecosystems are reshaping the ways in which the city is imagined, known, and governed. They discuss the reconstitution of the contemporary city through digital technologies, practices, and techniques, including data-driven governance, predictive analytics, digital mapping, urban sensing, digitally enabled control rooms, civic hacking, and open data narratives. Focusing on the relationship between the emerging operating systems of the city and their traditional infrastructures, they shed light on the political implications of using computer technologies to understand and generate new urban spaces and flows.
