Cisgenics and Transgenics Bhupendra Koul,2022-08-31 This book presents up-to-date information on various vector-less/direct (physical, chemical) and vector-mediated/indirect (Agrobacterium-mediated) plant transformation techniques. It summarizes various strategies that facilitate a gene from lower organism to be expressed in higher plants and also in silico designing of synthetic gene for higher expression. It also highlights the importance of strong promoters to drive the expression of transgene(s). This book encompasses the advantages and drawbacks of cisgenesis and transgenesis, their implications towards sustainable crop improvement, and their future prospects. The importance, limitations, challenges, recent developments, and future prospects of molecular pharming is also discussed. The book concludes with a chapter that summarizes

the major contribution of GM-crops towards global food security and economy, advances in genome editing for crop improvement, challenges and risk associated with the release of GM-crops, and the future of GM technology. This book is meant for students and researchers in the field of life sciences, food science, and agriculture.

Seed Sovereignty, Food Security Vandana

Shiva, 2016-02-02 In this unique anthology, women from around the world write about the movement to change the current, industrial paradigm of how we grow our food. As seed keepers and food producers, as scientists, activists, and scholars, they are dedicated to renewing a food system that is better aligned with ecological processes as well as human health and global social justice. Seed Sovereignty, Food Security is an argument for just that--a reclaiming of traditional methods of agricultural practice in order to secure a healthy, nourishing future for all of us. Whether tackling the thorny question of GMO safety or criticizing the impact of big agribusiness on traditional communities, these women are in the vanguard of defending the right of people everywhere to practice local, biodiverse, and organic farming as an alternative to industrial agriculture. The elephant and the dragon in contemporary life sciences
Joy Y. Zhang, Saheli Datta Burton, 2022-03-15 This book provides a powerful diagnosis of why the global governance of science struggles in the face of emerging powers. Through unpacking critical events in China and India over the past twenty years, it demonstrates that the 'subversiveness' assumed in the two countries' rise in the life sciences reflects many of the regulatory challenges that are shared worldwide. It points to a decolonial imperative for science governance to be responsive and effective in a cosmopolitan world. By highlighting epistemic injustice within contemporary science, the book extends theories of decolonisation.

A Collection of Simple Anglo-Indian Recipes Bridget White, 2015-08-24 A COLLECTION OF SIMPLE ANGLO-INDIAN RECIPES is a revised, consolidated version of four earlier Recipe Books of Bridget White, namely Bridget's Anglo-Indian Delicacies, A Collection of Anglo-Indian Roasts, Casseroles and Bakes, The Anglo-Indian Snack Box & The Anglo-Indian Festive Hamper. More than 350 Recipes of traditional, popular and well loved, Anglo-Indian Dishes have been specially selected from these earlier Cook Books and featured in this Omni-bus Edition. This single Consolidated Imprint of easy- to- follow Recipes features Soups, Pepper Water & Vindaloo, Curries & Fries, Roasts & Stews, Chops and Cutlets, Croquettes & Rissoles, Foogaths and

Vegetarian Delights, Rice Dishes & Pilafs, Pickles & Relishes, Casseroles and Baked Dishes, Snacks & Short Eats, Nibbles & Finger food, Sweets & Desserts, Custards & Puddings, Christmas Cakes & Festive Treats, Curry Powders, etc. The huge selection of Anglo-Indian dishes featured in this Cookery book will surely take one on a sentimental and nostalgic journey down memory lane of old forgotten Anglo-Indian Culinary Delights. All the old dishes cooked during the time of the Raj have now revived to suit present day tastes and palates. This Cookery Book would also serve as a Ready Reckoner and a useful guide for teaming up dishes for everyday Anglo-Indian Meals as well as for festive and special occasions.

Genetically Modified Organisms in Developing Countries

Ademola A. Adenle, E. Jane Morris, Denis J. Murphy, 2017-06-09
Bringing together the ideas of experts from around the world, this incisive text offers cutting-edge perspectives on the risk analysis and governance of genetically modified organisms (GMOs), supporting effective and informed decision-making in developing countries. Comprised of four comprehensive sections, this book covers: integrated risk analysis and decision making, giving an overview of the science involved and examining risk analysis methods that impact decision-making on the release of GMOs, particularly in developing countries; diversification of expertise involved in risk analysis and practical ways in which the lack of expertise in developing countries can be overcome; risk analysis based regulatory systems and how they can be undermined by power relationships and socio-political interests, as well as strategies for improving GMO policy development and regulatory decision-making; and case studies from developing countries providing lessons based on real-world experience that can inform our current thinking.

Molecular Marker Techniques Nitish Kumar, 2023-06-29

This edited book covers the applications of molecular markers in the genetic improvement of crop plants. Recent advances in

molecular marker techniques such as the development of high-throughput genotyping platforms, marker-assisted selection, and non-coding RNA-based markers have been discussed. Essential information is provided on functional markers, genotype-by-sequencing, and association mapping methodologies that can facilitate accelerated crop breeding programs for increased yield, high nutritional quality, and tolerance to a variety of abiotic and biotic stresses. This volume presents basic information on molecular marker techniques from marker location up to gene cloning. The book includes a description of technical approaches in genome analysis such as comparison of marker systems, positional cloning, and array techniques. This book is of interest to teachers, researchers, and plant breeders. The book also serves as additional reading material for undergraduate and graduate students of agriculture, horticulture, and forestry.

AGRICULTURE For Self-Sustained Rural Development

VISION 2025 Dr. K. P. Agrawal, 2022-06-01 The book covers different issues in agriculture. The author has pooled the knowledge of many experts and practitioners in the field of agriculture and allied sectors. The main Aims and Objectives covered in the book are: 1) Enhance Production and Productivity for food and nutritional security, 2) Improve profitability through agro-processing and value addition and 3) Sustainability through training, skill development, entrepreneurship and communication. Stagnation in productivity, shrinking farm size, inadequate market infrastructure including warehousing and cold storage, and erosion of the foundations of sustainable agriculture such as soil and gene erosion, water logging, drop in ground water table and decline in surface irrigation are the areas that need urgent attention. There is need to pay attention to rural non-farm

enterprises. All these issues in-depth have been covered under 40 chapters in the book. I am confident that the book would be of immense help to farmers, field officials, students and many others who directly or indirectly involved with agriculture and rural development.

Hi-Tech Farming for Enhancing Horticulture

Productivity P. Parvatha Reddy, 2024-02-06 This book highlights the underlying principles and outlines some of the key hi-tech practices and technology interventions required to achieve enhanced productivity. It discusses horticulture technology interventions like varietal improvement including genetically modified crops; good agricultural practices like optimum planting density, micro-irrigation, fertigation, integrated nutrient management, plant bioregulators, precision horticulture, protected cultivation, nanotechnology, and integrated farming systems; integrated management of insects, mites, disease pathogens, nematodes, and weeds; and post-harvest management practices like handling, storage and processing to reduce crop losses. The importance of attaining food and nutritional security through hi-tech horticulture and profitable marketing of horticultural produce is also discussed. This book will be of immense value to the scientific community involved in teaching, research and extension activities related to hi-tech horticulture strategies for enhancing productivity in enhancing farmers' income, food, nutrition and livelihood security. The material can be used for teaching postgraduate courses. The book can also serve as a very useful reference to policymakers and practicing farmers.

Agricultural Benefits of Postharvest Banana Plants

Dibakar Chandra Deka, Satya Ranjan Neog, 2021-03-04 Banana farming is the basis for commercial fruit trading. Every banana plant generates waste biomass nearly ten times the quantity of its fruits. Disposal of waste biomass is a burden for the farmers.

Economical use of the waste biomass can bring financial benefit to banana farmers. Use of organic potash in lieu of inorganic potash affords higher yield and also helps to preserve the ecosphere of soil for subsequent crops. *Agricultural Benefits of Postharvest Banana Plants* details the use of postharvest banana plants for agriculture and trade. Eleven chapters explain both traditional and modern uses of banana plants. The reader is informed how bio-waste from postharvest banana plants (including their stems) can be used as organic potash to replace inorganic potash (muriate of potash) in fertilizer. Experimental uses of banana plant pseudo-stem juice for growing different crops along with chemical analysis of the pseudo-stems are explained in separate chapters. Isolations of potassium chloride and potassium carbonate have also been discussed in the latter part of the book. This book is an ideal handbook for professionals and trainees interested in utilizing postharvest banana plants for sustainable agriculture and trade. The information is also useful for students and teachers involved in agricultural biotechnology and traditional agriculture courses.
