**Encyclopedia of African Airlines** Ben R. Guttery,1998-01-01 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

**Flying the Knife Edge** Matt McLaughlin,2016-02-24 'Flying the Knife Edge' is the story of an ordinary man experiencing extraordinary things as a bush pilot in remote Papua New Guinea in the 1990s. This critically acclaimed memoir chronicles New Zealander Matt McLaughlin's adventures on the knife edge of bush pilot ops in one of the world's most dangerous flying environments. A hair raising tale

**Civil Aircraft Recognition** Paul Eden,2012-12-21 The perfect guide for spotters and enthusiasts interested in airliners, feederliners, executive jets, light aircraft and other commercial aeroplanes. Contains 3-view silhouettes, colour photographs, dimensions, technical specifications and a potted history of those aircraft most likely to be seen in the skies and at airports. Other helpful details are included to make aircraft identification more certain.

**Britain's Glorious Aircraft Industry** J Paul Hodgson,2021-03-03 "The rich and diverse history of the British aircraft industry is captured in superb detail by the author in this weighty tome." —Aviation News Great Britain's aircraft industry started in 1908, with the first formally registered organization in the world to offer to design and build an aeroplane "for commercial gain." This book tells the complete story of the 110 years since the start, all the companies formed and the aircraft they produced, highlighting the advances in aeronautical ambition and technology. It is the story of the creation, survival and decline of all one hundred and twenty-three of the aircraft design and construction companies formed between 1908 and 2018. The exhilaration of success and the magic of aviation technology are vividly illustrated by the technical and political birth stories of iconic projects, such as the Cirrus/Gypsy Moths, the Tiger Moth, the flying boats of Imperial Airways, Spitfire, Lancaster, Viscount, Vulcan, Harrier, Buccaneer and many more. The rotary wing industry is not forgotten. The birth of the jet turbine engine and the quest for supersonic speed is included. The stories of the disappointments of failure and disaster, such as the Brabazon, Comet, Princess, Rotodyne and TSR-2, and the growth of international collaboration in Concorde, Tornado, Airbus, Eurofighter Typhoon and other projects are included, in the context of the international scene and domestic politics. The conclusion highlights the prominent reminiscences and speculates on the future of the aircraft industry in Britain. "An outstanding reference book and a thoroughly enjoyable canter through the decades, from the days of wood and fabric to the modern composite structure of the wings of the A400 Atlas." —RAF Historical Society

When the Weight of the Paper... Graham Hyslop,2024-01-05 This aviation/travel journal is an account of the author's experiences in 59 years of travelling the globe. His half-Scottish roots may have something to do with his yearning for a desire to visit a number of cold-weather countries that many of us might stay away from, but might like to read about! There are some tropical visits and temperate ones too, but the latest tally has been 21 landings or take-offs within the Arctic Circle, and photos included in the book show Greenland, Iceland, Faroes, Svalbard (sometimes called Spitzbergen), The Falklands and Antarctica amongst others, but there are some in warmer temperature zones! Over those years of travel 124 separate trips have been made involving over 450 different flights. In the early years, many were propeller aircraft and then later jet transport but over that period 64 different types have been flown, and each is supported in the book by brief technical notes and a photo. The author's work in airline operations and then later in the travel agency sector allowed him the opportunity to extensively travel the world and see these sights. Later in retirement, the travel bug has continued. Interspersed into the timeline of the book is the author's autobiography of his time spent in the three countries he has lived in during his working life.
