The Railroad Neil Douglas Newton,2015-05-29 On Sept. 11, 2001 Mike Dobbs' life was forever changed. Reeling from his nightmare experience in New York's subway as the twin towers collapsed he retreats from his high power Wall Street life to his run down country house. Soon he is embroiled in the life of Eileen Benoit and her 7-year old daughter Megan as they flee Eileen's abusive ex-husband. Suddenly Mike is thrown into a world he knows nothing about and he is forced to answer the question, how far would you go for someone you love?

Handbook of Research on Interdisciplinarity Between Science and Mathematics in Education Cavadas, Bento,Branco, Neusa,2023-01-24 Working in an interdisciplinary manner is long pursued but a difficult goal of science and mathematics education. The interdisciplinarity of science and mathematics can occur when connections between those disciplines are identified and developed. These connections could be expressed in the educational policies, curriculum, or in the science and mathematics teachers' educational practices. Sometimes those connections are scarce, but in other moments, full integration is achieved. The Handbook of Research on Interdisciplinarity Between Science and Mathematics in Education presents results of good practices and interdisciplinary educational approaches in science and mathematics. It presents a broad range of approaches for all educational levels, from kindergarten to university. Covering topics such as computer programming, mathematics in environmental issues, and simple machines, this major reference work is an excellent resource for administrators and educators of both K-12 and higher education, government officials, pre-service teachers, teacher educators, librarians, researchers, and academicians.

FERVALE C.A. Gagnon,2011-03-09 Journey to the land of Baeloc—a land ruled by potent forces of magic—where destinies collide, formidable heroes rise and fall and strange new breeds of evil emerge from unfathomable depths peopled by legions of shadows. The five great Energies depart from their isolated vantage points to lend their aid to Baelocians, but one among them at length begins to change, overturning the fragile balance of power and ushering in a dark new age.

Teaching Chemistry - A Studybook Ingo Eilks,Avi Hofstein,2013-04-20 This book focuses on developing and updating prospective and practicing chemistry teachers' pedagogical content knowledge. The 11 chapters of the book discuss the most essential theories from general and science education, and in the second part of each of the chapters apply the theory to examples from the chemistry classroom. Key sentences, tasks for self-assessment, and suggestions for further reading are also included. The book is focused on many different issues a teacher of chemistry is concerned with. The chapters provide contemporary discussions of the chemistry curriculum, objectives and assessment, motivation, learning difficulties, linguistic issues, practical work, student active pedagogies, ICT, informal learning, continuous professional development, and teaching chemistry in developing environments. This book, with contributions from many of the world's top experts in chemistry education, is a major publication offering something that has not previously been available. Within this single volume, chemistry teachers, teacher educators, and prospective teachers will find information and advice relating to key issues in teaching (such as the curriculum, assessment and so forth), but contextualised in terms of the specifics of teaching and learning of chemistry, and drawing upon the extensive research in the field. Moreover, the book is written in a scholarly style with extensive citations to the literature, thus providing an excellent starting point for teachers and research students undertaking scholarly studies in chemistry education; whilst, at the same time, offering insight and practical advice to support the planning of effective chemistry teaching. This book should be considered essential reading for those preparing for chemistry teaching, and will be an important addition to the libraries of all concerned with chemical education. Dr Keith S. Taber (University of Cambridge; Editor: Chemistry Education Research and Practice) The highly regarded collection of authors in this book fills a critical void by providing an essential resource for teachers of chemistry to enhance pedagogical content knowledge for teaching modern chemistry. Through clever orchestration of examples and theory, and with carefully framed guiding questions, the book equips teachers to act on the relevance of essential chemistry knowledge to navigate such challenges as context, motivation to learn, thinking, activity, language, assessment, and maintaining professional expertise. If you are a secondary or post-secondary teacher of chemistry, this book will quickly become a favorite well-thumbed resource! Professor Hannah Sevan (University of Massachusetts Boston)

Perfect Time 2 Ambrosia M.A,2017-11-05 Spheria 1620, Zenn sang pahlawan pemersatu meninggal. Dua anggota dari dewan tertinggi yang ia buat berbentrok saat itu untuk memilih siapa yang pantas meneruskan tahta Imperator dari tuan mereka, Erie Armstrong mendukung putra Zenn sebagai seorang yang layak untuk meneruskan tahta ayahnya. Sedangkan Thatcher Vabian dengan ambisi besar memproklamasikan dirinya sebagai pemimpin yang pantas untuk menggantikan tuannya, Zenn. Pembuktian sebagai siapakah yang paling layak dalam memilih penerus tahta mulai ditentukan ketika Armstrong dan Vabian bersepakat menjalankan tantangan mereka masing-masing. Tantangan bagi Erie Armstrong adalah mempersatukan negerinya yang tengah dilanda perpecahan dan perang daerah, sedangkan Thatcher Vabian adalah untuk menghancurkan Imperium Jindrich yang semakin lama semakin meluas mencakup wilayah Imperator. Dari sinilah mereka kemudian berpisah dan berjanji akan bertemu lagi saat setelah menyelesaikan tantangan masing-masing dan membuktikan pilihan siapa yang paling benar.
