The Pyrimidines Desmond J. Brown,2009-09-17 The Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects – properties, synthesis, reactions, physiological and industrial significance – of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. Many ring systems (such as pyridines and oxazoles) are treated in distinct books, each consisting of separate volumes or parts dealing with different individual topics. With all authors are recognized authorities, the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists.

Contemporary Artificial Intelligence Richard E. Neapolitan,2012-08-25 The notion of artificial intelligence (AI) often sparks thoughts of characters from science fiction, such as the Terminator and HAL 9000. While these two artificial entities do not exist, the algorithms of AI have been able to address many real issues, from performing medical diagnoses to navigating difficult terrain to monitoring possible failures

Presenting a comprehensive summary of knowledge of Gulf biota through 2004, the book includes seventy-seven chapters, which list more than fifteen thousand species in thirty-eight phyla or divisions and were written by 138 authors from seventy-one institutions in fourteen countries. This first volume of Gulf of Mexico Origin, Waters, and Biota, a multivolumed set edited by John W. Tunnell Jr., Darryl L. Felder, and Sylvia A. Brassinosteroids in Plant Developmental Biology and Stress Tolerance Jing Quan Yu,Golam Jalal Ahammed,Priti Krishna,2019-03-01 Brassinosteroids in Plant Developmental Biology and Stress Tolerance presents the mechanisms of brassinosteroid-regulated plant developmental biology and stress tolerance that cover various biochemical,

physiological, genetic and molecular studies. As unprecedented climate change threatens global food security, studies reveal that BRs could not only protect plants from stresses to ensure food security, but also reduce toxic compounds in edible plant parts. As the utilization of BRs in modern agriculture is of great significance in the context of global climate change, this book presents key information on how to develop eco-friendly growth regulators and understand the importance of brassinosteroids in safe food production. Presents the multifaceted roles of brassinosteroids as phytohormones in plant growth, development and response to biotic and/or abiotic stresses Unveils the physiological and molecular mechanisms controlling plant stress response to biotic and abiotic stress Discusses developmental processes relating to environmental adaptations that are mediated by brassinosteroids Brings together recent works of experts studying brassinosteroid crosstalk with other signals, including hormones, sugars, redox and light signals

On Being Moved Stein Bråten, 2007-04-19 In this collective volume the origins, neurosocial support, and therapeutic implications of (pre)verbal intersubjectivity are examined with a focus on implications of the

discovery of mirror neurons. Entailing a paradigmatic revolution in the intersection of developmental, social and neural sciences, two radical turnabouts are entailed. First, no longer can be upheld as valid Cartesian and Leibnizian assumptions about monadic subjects with disembodied minds without windows to each other except as mediated by culture. Supported by a mirror system, specified in this volume by some of the discoverers, modes of participant perception have now been identified which entail embodied simulation and co-movements with others in felt immediacy. Second, no longer can be retained the Piagetian attribution of infant egocentricity. Pioneers who have broken new research grounds in the study of newborns, protoconversation, and early speech perception document in the present volume infant capacity for interpersonal communion, empathic identification, and learning by altercentric participation. Pertinent new findings and results are presented on these topics: (i) Origins and multiple layers of intersubjectivity and empathy (ii) Neurosocial support of (pre)verbal intersubjectivity, participant perception, and simulation of mind (iii) From preverbal sharing and early speech perception to meaning acquisition and verbal intersubjectivity (iv) New windows on other-centred movements and moments of meeting in therapy and intervention.
