Panzer 38(t) vs BT-7 Steven J. Zaloga,2017-04-07 The tank battles in the Soviet Union during the summer of 1941 were the largest in World War II, exceeding even the more famous Prokhorovka encounter during the Kursk campaign. Indeed, they were the largest tank battles ever fought. This book examines two evenly matched competitors in this conflict, the German Panzer 38(t) and the Soviet BT-7. Both were of similar size, armed with guns of comparable firepower, and had foreign roots – the Panzer 38(t) was a Czechoslovak design and the BT-7 was an evolution of the American Christie tank. With full-colour artwork and archive and present-day photography, this absorbing study assesses the strengths and limitations of these two types against the wider background of armoured doctrine in the opening stages of Operation Barbarossa.

Exploring Prehistoric Identity in Europe Victoria Ginn,Rebecca Enlander,Rebecca Crozier,2014-03-19 Identity is relational and a construct, and is expressed in a myriad of ways. For example, material culture and its pluralist meanings have been readily manipulated by humans in a prehistoric context in order to construct personal and group identities. Artefacts were often from or reminiscent of far-flung places and were used to demonstrate membership of an (imagined) regional, or European community. Earthworks frequently archive maximum visual impact through elaborate ramparts and entrances with the minimum amount of effort, indicating that the construction of identities were as much in the eye of the perceiver, as of the perceived. Variations in domestic architectural style also demonstrate the malleability of identity, and the prolonged, intermittent use of particular places for specific functions indicates that the identity of place is just as important in our archaeological understanding as the identity of people. By using a wide range of case studies, both temporally and spatially, these thought processes may be explored further and diachronic and geographic patterns in expressions of identity investigated.

Nietzsche, Wagner, Europe Martine Prange,2013-08-29 Friedrich Nietzsche (1844-1900) supported the unification of Europe and reflected on this like few other philosophers before or after him. Many of his works are concerned with the present state and future of European culture and humanity. Resisting the “nationalist nonsense” and “politics of dissolution” of his day, he advocated the birth of “good Europeans,” i.e. “supra-national” individuals and the “amalgamation of nations.” Nietzsche, Wagner, Europe analyzes the development of Friedrich Nietzsche's ideal of European culture based on his musical aesthetics. It does so against the background of contemporary searches for a wider, cultural meaning beyond Europe's economic-political union. The book claims that Nietzsche always propagated the “aestheticization” of Europe, but that his view on how to achieve this changed as

a result of his dramatically altering philosophy of music. The main focus is on Nietzsche’s passion for and later aversion to Wagner’s music, and, in direct connection with this, his surprising embrace of Italian operas as new forms of “Dionysian” music and of Goethe as a model of “Good Europeanism.”
