Boys' Books, Boys' Dreams, and the Mystique of Flight Fred

Erisman,2006 Setting the stage : technology and the series book -- Birdmen and boys, 1905-1915 -- Aces and combat : World War I and after, 1915-1935 -- Interlude : Charles A. Lindbergh and Atlantic flight, 1927-1929 -- The golden age, I : the Lindbergh progeny, 1927-1939 -- The golden age, II : the air-minded society, 1930-1939 -- World War II and modern aviation, 1939-1945 -- Aftermath : a-bombs, rockets, and space flight, 1945-1950.

Secret Wings of World War II Lance Cole,2015-06-30 There are many myths and legends surrounding the advanced German aeronautical technology of the Second World War. There are also facts and proven events. Yet within these stories and behind these facts lie conspiracy theories, mistaken assumptions and denials that seem to contradict the evidence. So what really happened? How far ahead were the German scientists? And, of even greater interest, why and how???There have been other books about advanced German wartime aeronautics, yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and '60s, let alone the current crop of military and civil all-wing or blended-wing aircraft. This book charts the story from it origins, through current-day innovations and beyond, into the all-wing future of tomorrow.

New England Warplanes Harold A Skaarup,2010-12-21 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut. The aircraft include those flown by members of the US Air Force, the US Navy, the US Army, the US Marine Corps,

the US Coast Guard, the Air and Army National Guard units in each state, and by various NATO and allied nations as well as a number of aircraft previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 120 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who would like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers, websites and email addresses have been included, along with a list of aircraft held in each museum's current inventory or that on display as gate guardians throughout the New England States. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of New England's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view New England's Warplane survivors.

Keyport Jack Jeandron, 2003 Emerging from the shores of the Raritan Bay, Keyport's roots trace back to the Kearney family's plantation and its vital role during Revolutionary times. Although just 1.4 square miles in size, it encompasses shipbuilding, oyster farming, a trolley network, and an Aeromarine industry within a rich and influential history. Beyond these are the abundant and captivating tales of catastrophic fires and the vaunted Prohibition days providing a colorful framework of life in this coastline community.

Shorty, an Aviation Pioneer James Glassco Henderson, 2004 Victor John Shorty Hatton started his aviation career in a near fatal crash of

an Avro 504K and ended it with another Avro aircraft, the Arrow. The story of his working life, from the First World War to the Cold War, is the history of aviation.

Popular Mechanics, 1962-09 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

U.S. Commercial Aircraft Kenneth Munson, 1982 Good, No Highlights, No Markup, all pages are intact, Slight Shelfwear, may have the corners slightly dented, may have slight color changes/slightly damaged spine.

CleanEra – A Collection of Research Projects for Sustainable Aviation CleanEra Team, 2015-10-21 The CleanEra project was initiated with the goal of developing revolutionary ideas for civil aviation. These ideas were to offer solutions which would limit and reduce some of the negative aspects of aviation, namely: emissions and the use of resources. This book presents you with the highlights of this journey in search of new technologies for a revolutionary aircraft; an aircraft that not only offers a future of comfortable air travel for the passenger, but a future of sustainable aviation for the planet as well.

Kites, Birds & Stuff - Over 150 Years of British Aviation - Makers & Manufacturers - Volume 1 - A to C P. D. Stemp, 2013-04-18 A history of pioneers and companies of Great Britain. From the early years to the modern day. A comprehensive study of old and new

aircraft. (Already being used in various aviation museum archives).

The Focke Helicopter H. Focke,1938 This report presents some of the problems concerning tests of helicopters, such as forced landings, controllability and stability, general safety, piloting maneuvers, performance, servicing, and the production of lift of a propeller. Test flights are described including a 67.67 mph flight by Hanna Reitsch.

Technical Memorandum - National Advisory Committee for Aeronautics ,1938 Chiefly translations from foreign aeronautical journals.

Aviator of Fortune Brian Loflin,Erik Benson,Shirley Loflin,2006 To understand Yerex's remarkable career, Erik Benson focuses on the uniqueness of the entrepreneur's background, one that enabled him to empathize with both Great Britain and the United States and to foster working relationships with these rivals. Yerex's dealings with the two countries shed new light on the development of aviation in the 1930s and 1940s, at a time when Pan American ruled the skies of the western hemisphere, when revolutions and coups rocked governments, and when fortunes waited to be made and lost.

Air Transport Auxiliary at War Stephen Wynn,2021-04-30 This book looks at the invaluable work carried out by members of the Air Transport Auxiliary during the course of the Second World War. Comprised of both men and women, it was a civilian organization tasked with the collection and delivery of military aircraft from the

factories to the RAF and Royal Navy stations. Men who undertook the role had to be exempt from having to undertake war time military service due to health or age, but other than that there were very few restrictions on who who could join, which accounted for one-legged, one-armed, one-eyed and short sighted pilots being accepted. Initially it was only men who were allowed to carry out this service, but by December 1939, British authorities were persuaded by Pauline Gower (the daughter of Sir Robert Vaughan Gower, a wartime Conservative MP, and an accomplished pilot in her own right), to establish a women's section of the Air Transport Auxiliary, of which she was put in charge. The first eight women were accepted in to the service, but it would not be until 1943 that its male and female members received the same pay. By the end of the war 147 different types of aircraft had been flown by the men and women of the Air Transport Auxiliary, including Spitfire fighter aircraft and Lancaster bombers. These brave pilots were not just British, but came from 28 Commonwealth and neutral countries and their efforts sometimes came at a price: 174 Air Transport Auxiliary pilots, both men and women, died during the war whilst flying for the service.
