**Gunther Burstyn (1879-1945)** Daniela Angetter,Ewald Angetter,2008 Today Gunther Burstyn (1879-1945) is considered as reformer of the Austrian tank force. But during the first half of the 20th century the young soldier sustained the typical well-known Austrian fate of innovators with his inventions and concepts. The implementation of his inventions, which were far beyond the military technical standard at that time, were doomed to failure because of disability of the Habsburg's and the Austrian army as well as on missing financial capacity of the Austrian government. So Burstyn, the inventor of the tank, was forced to see other nations engineering his idee, which possible influenced victory and defeat of World War I. Later on Burstyn hoped to market his inventions in Nazi Germany and got still today into cross-fire of political criticism. At the end of his tragic life Burstyn committed suicide

Tactics and Procurement in the Habsburg Military, 1866-1918 John A. Dredger,2017-08-11 This book reveals the primary causes of Habsburg defeat both in the Austro-Prussian War and the First World War. The choice of offensive strategy and tactics against an enemy possessing superior weaponry in the Austro-Prussian War, and opponents with superior numbers and weapons in the Great War, resulted in catastrophe. The inferiority of the Habsburg forces in both conflicts stemmed from imprudent spending decisions during peacetime, rather than conservatism or parliamentary stinginess. The desire to restore the sunken prestige of Austria-Hungary and prove Habsburg's great power status drove the military to waste money on an expensive fleet, and choose offensive tactics to win great victories. This study shows the civil-military interaction in regard to funding and procurement decisions as well as the deep intellectual debates within the army, which refute the idea that the Habsburg military remained opposed to technology or progress

Armoured Warfare Alaric Searle,2017-02-09 This book charts the history of armoured warfare from the first use of the tank in 1916 right through to the 21st century, adopting military, political and global perspectives. Alaric Searle explores the origins of the tank, the part it played in the First World War and its contribution to the outcome of the war. He considers its role as a tool of propaganda, the military controversies of the interwar period and the employment of armoured forces in all the major theatres in the Second World War. Since the First World War, major and medium-sized powers have invested heavily in armoured forces. Searle looks at the conduct of mechanised warfare in Korea, Indo-China and Vietnam, and during conflicts such as the Arab-Israeli Wars and the Gulf Wars. Armoured Warfare adopts a global perspective, providing the most comprehensive survey of the history of the subject currently available. With a detailed bibliography of both primary and secondary sources, it is an ideal companion for those studying armoured warfare, modern military history and war studies.

British Battle Tanks David Fletcher,2016-08-25 A highly illustrated history of the development and operation of the first British tanks, published to coincide with the 100th anniversary of their introduction in World War I. When British soldiers charged across the Somme in September 1916 they were accompanied by a new and astonishing weapon – the tank. After a stuttering start armoured behemoths such as the Mark IV, Mark V and Whippet played a crucial role in bringing World War I to an end. Marking the centenary of their battlefield debut, this comprehensive volume traces the design and development of the famous British invention during World War I and the increasingly tense years of the 1920s and 30s, from the first crude but revolutionary prototype to the ever-more sophisticated designs of later years. Bolstered by historic photographs and stunning illustrations, author David Fletcher brings us the thrilling history behind the early British battle tanks.

The Roots of Blitzkrieg James S. Corum,1992 Following Germany's defeat in World War I, the Germans signed the Versailles Treaty, theoretically agreeing to limit their war powers. The Allies envisioned the future German army as a lightly armed border guard and international security force. The Germans had other plans.

Armored Forces Robert M. Citino,1994-10-21 This volume analyzes the development of tanks and traces their history from the British attack at Cambrai in 1917 during World War I through the AirLand Battle of Operation Desert Storm in 1991. This text gives a short history of the rise and development of armored warfare in the 20th century, an assessment of the significant literature on tank doctrine, and an evaluation of the role of prominent commanders, theoreticians, and tacticians. A chronology of important dates and pictures depicting major changes in tanks across the years enrich this teaching tool and reference guide for teachers and students of military history, history buffs, and professional soldiers.

Vehicles at War Denis Bishop,Chris Ellis,1979 Vehicles at War shows how military vehicles, from humble cargo trucks to tanks, were developed over the years to meet the changing styles of transport and warfare in the industrialized age. The complete transformation from using the horse as chief mode of transportation to complete mechanization took approximately forty years, and was not at an end until the beginning of World War II. Even during that conflict, a not insignificant portion of European armies still used the horse as their major means of transport.

**You Must Win: The winner can create History** Ahmed Sayeed, 2019-08-10 The latest book You Must Win contains a similar subject of humans should get freed from the Cage of Theology or Dogmatism. My Contention is that The Earth will be it's own when heavens are destroyed. The book Human Achievement contain the same message, first Know thyself then only you can know the world, your society, your fellow being, your kith, and kins. I wish that the Book would enlighten the reader with an advise that when we know nothing of the first Principle, it is truly extravagant to define God, Angels, Heavens, and minds to know precisely why God formed world when we do not know why we pray and raise our arms at our will It advocates that Society is a growth in time, not syllogism in Logic and when the past is out through the door, it comes in at the windows. It guides to show precisely by what changes we can diminish misery and injustice in the world in which we actually live. A real Human who owns Humanity would automatically reject the story of Adam and Eve Let us live what is provided with and regarding the growth of Human life both physically and psychologically let us leave the matter to Scientists and to socialists. Socialist concern must be to lead a life peacefully, ethically, contently after attaining bask biological and social needs and this may contend as my message as an author to the readers in particular and humanity in general.
