This standard is established based on the safety risk and certification risk of burglar alarm products. It stipulates the basic principles and requirements for the implementation of mandatory product certification for burglar alarm products.

Geological Survey of Canada, Current Research (Online) no. 2002-C19 Alan G. Jones,2002 This paper reports results from magnetotelluric measurements made along an approximately 300-kilometre northwest-southeast trending profile that crossed the major geological structures of central Baffin Island. The main goal of this survey was to determine the sub-surface geometry of major geological boundaries, particularly between Archean Rae Craton rocks and overlying Paleoproterozoic continental-margin units. The paper describes data acquisition methods & problems encountered and presents a preliminary model that describes much of the magnetotelluric response observed along the profile.

Handbook of Naturally Occurring Compounds T.K. Devon,2012-12-02 Handbook of Naturally Occurring Compounds, Volume II: Terpenes is a handbook of naturally occurring compounds to which structures have been assigned, with particular reference to terpenes. Each structure is stored in the handbook with its name, molecular formula, molecular weight, optical rotation, melting point, literature reference, and classification number. Comprised of 10 chapters, this volume begins with an overview of terpenes and their classification schemes, followed by terpenoid classes and their structural/biogenetic categories as well as skeletons: monoterpenes, sesquiterpenes, diterpenes, sesterterpenes, triterpenes, steroids, carotenoids, and polyprenoids. Miscellaneous compounds of terpenoid origin are also considered, including the ionones and fraxinellone. This final category for miscellaneous compounds of terpenoid origin arises through the somewhat frequent occurrence of oxidative degradation in terpenoid biosynthesis. In general these compounds have degraded structures such that there exists some ambiguity as to their precise biosynthetic precursors. Each individual compound possesses a compound sequence number which, in combination with the Classification Code Number, supplies a unique address for that compound. This book should be a valuable resource for chemists as well as students and researchers of chemistry.

Dead Epidemiologists Rob Wallace,2020-10-20 A history of COVID-19 and the sociopolitical crises that led to the 2020 global pandemic The COVID-19 pandemic shocked the world. It shouldn't have. Since this century's turn, epidemiologists have warned of new infectious diseases. Indeed, H1N1, H7N9, SARS, MERS, Ebola Makona, Zika, and a variety of lesser viruses have emerged almost annually. But what of the epidemiologists themselves? Some bravely descended into the caves where bat species hosted coronaviruses, including the strains that evolved into the COVID-19 virus. Yet, despite their own warnings, many of the researchers appear unable to understand the true nature of the disease—as if they are dead to what they've seen. Dead Epidemiologists is an eclectic collection of commentaries, articles, and interviews revealing the hidden-in-plain-sight truth behind the pandemic: Global capital drove the deforestation and development that exposed us to new pathogens. Rob Wallace and his colleagues—ecologists, geographers, activists, and, yes, epidemiologists—unpack the material and conceptual origins of COVID-19. From deepest Yunnan to the boardrooms of New York City, this book offers a compelling diagnosis of the roots of COVID-19, and a stark prognosis of what—without further intervention—may come.

County Antrim and Belfast; genealogy and family history notes Michael C. O'Laughlin ,2003 This book is written to help find the roots of any family in the county. A hands on guide to find your family in county Antrim and in Belfast. New; Full size 8 1/2 x 11; 50 pages; illustrations, some of which may appear faded with age as in the originals; County Map; Local Sources; Coats of Arms; and record extracts. Many families are given with family history notes, specific locations; coat of arms; and seats of power. Some are only mentioned. A must for any researcher. (For a large collection of family histories within the county we also recommend The Book of Irish Families, great & small, by O'Laughlin.)

Pandemics: COVID-19 and Our World Jill Keppeler,2021-07-15 In 2020, the illness called COVID-19 changed our world forever. However, it wasn't the first pandemic to affect human lives, and it likely won't be the last. This in-depth and honest book takes readers through the history of pandemics and the idea of public health, as well as the background of COVID-19 and the coronavirus that causes it. Manageable text makes a sometimes uncomfortable subject clearer and more understandable, and a glossary explains key terms behind the science and history involved. Color photos, primary sources, and stories of young activists making a difference in the pandemic draw in readers looking to understand more about this important topic.
