AI To Robotics Dr. Dinesh Kumar Singh, Dr. Devesh Katiyar, Mr. Gaurav Goel, 2022-09-01 Robot Operating Systems (ROS), Python, robotic basics, and the necessary software and tools are covered first in Artificial Intelligence for Robotics. Basic navigational abilities and decision-making knowledge in robots will be taught to you. The robots will be able to recognise and pick up an irregular item if you've gone through the chapters and taught them about object recognition & genetic algorithms. Throughout, you'll find plenty of real-world examples to employ as you dive into the worlds of natural language processing as well as machine learning to give your robot an edge. Path planning & goal-oriented programming are covered in the last chapters to assist your robot to prioritise its work. By the book's conclusion, you'll understand how to use artificial intelligence simulation to provide your robot with a distinct personality.

Communication Cables and Related Technologies Alan Harmer, 1999 The subject Fibre optic cables forms a major part of the conference and continues to progress with many new developments. Topics include new designs and cable formats, very high-density fibre cables for the access network and buildings, special cables for particular applications, installation in ducts or as aerial cables, replacement and repair of cables, field testing, PMD measurements and OTDR, network monitoring and fault finding, test equipment, and connector and splicing techniques. The planning, installation and maintenance of cables and associated hardware form the vital core of a successful network. This subject addresses the issues of planning and design using new tools such as artificial intelligence, reliability, preventive maintenance and strategies for maintenance, installation issues and costs. Materials development is vital for the communications cable industry. Subjects considered are: -new materials technology -polymeric materials coating and filling technology -fabrication techniques and extrusion -materials related to cable performance -smoke and fire performance -environmental performance The final part of this publication deals with fibre technology. This includes new fibre designs such as: - multicore fibres - fibre fabrication - mechanical strength and reliability - coating technology - colouring of fibre coatings - new materials

Get Unstuck Ben Nash, 2024-07-10 Get your finances sorted and create a life not limited by money Does managing your money leave you feeling stressed, overwhelmed, or anxious? Are you looking for tactics and strategies to get on top of your money and get ahead faster? In *Get Unstuck*, bestselling author Ben Nash covers the three key frameworks you can use to create a winning money mindset, make saving and investing easy, and get the results you want. Discover how your thoughts and emotions influence your money behaviours and spending, and learn how you can hack your thinking to set yourself up for financial success. The truth is that success with money is simple. You need to spend less than you earn – and start investing intelligently. We all know that isn't as easy as it sounds. But having the right systems in place will make your progress easier. In this book, you'll learn the money behaviours you need for true financial security. You'll develop the thinking you need to make your money actually work for you – and build the systems that will help you plan, save, and invest. All while you live well today. With *Get Unstuck*, you'll learn how to: Overcome information overload, procrastination, and analysis paralysis Set up your banking so it's easier to save more WHILE you spend guilt-free Get started investing – and avoid mistakes and setbacks Create a clear and easy-to-follow plan for the financial future you want You don't need to know everything about money right now. You just need to know enough to take your next step. *Get Unstuck* will help you take that step with confidence.

Broadcast and Cable Management Norman Marcus, 1986

Hybrid Investigative Journalism Maria Konow-Lund, Michelle Park, Saba Bebawi, 2023-12-23 This open access book is a rare example of the ethnographic study of investigative journalism. This book explores entrepreneurial attempts to combine traditional investigative journalism with alternative ways of organising this work. It transcends watershed investigative projects in favour of the ways in which new actors (citizens, technologists, bloggers and local reporters, among others) join experienced investigative journalists in experiments with the practices of watchdog journalism in the digital era. Cases include Bristol Cable, Bureau Local and the Korea Center for Investigative Journalism, as well as Forbidden Stories. The book also includes two chapters on the impact of COVID-19 upon the development of cross-disciplinary work in a traditional newsroom and in the larger media ecosystems of both Norway and China. This is a timely book for journalism students, scholars and investigative reporters, who share a passion for this form of

journalism.

Events Project Management Georgiana Els,Ian Reed,Vanessa Mawer,Hanya Pielichaty,2016-11-10 This book provides events management students with an accessible and essential introduction to project management. Written by both academics and industry experts, Events Project Management offers a unique blend of theory and practice to encourage and contextualise project management requirements within events settings. Key questions include: What is project management? How does it connect to events management? What is effective project management within the events sector? How does academic theory connect to practice? The book is coherently structured into 12 chapters covering crucial event management topics such as stakeholders, supply chain management, project management tools and techniques, and financial and legal issues. Guides, templates, case study examples, industry tips and activity tasks are integrated in the text and online to show practice and aid knowledge. Written in an engaging style, this text offers the reader a thorough understanding of how to successfully project manage an event from the creative idea to the concrete product. It is essential reading for all events management students.

Technology and Infrastructure D. W. Faulkner,A. L. Harmer,1998 PATTERNS ACROSS CULTURES is a rhetorically organized reader driven by the principle that as the world gets smaller, students should be exposed to a wide variety of cultural perspectives--both from within the United States and from other countries. Many of the reading selections in the text are by writers who have never been anthologized, providing an invigorating alternative to traditional readers. Post-reading features for each selection, including questions on author's Meaning, Technique, and Language, help students examine how the selection utilizes both the primary mode and other modes as well; calls out key vocabulary terms; highlights thematic connections between selections; and provides prompts for both personal and critical writing. To assist those instructors who prefer a thematic framework for discussing the selections, a thematic Table of Contents and Thematic Links questions connecting each essay with one or more others on similar themes will provide inspiration for theme-based discussions and writing assignments.
