Sportsman's Connection

The Thousand Years War Angel Ramon, 2016-05-25 Four people in Brooklyn N.Y. who know little about each other and backgrounds that could not be any more different meet each other. A normal winter day for these four regular joes will turn into a full-fledged adventure that will determine the fate of the Earth with one twist. That twist is that there is a virtual world that looks, smells and feels like Earth and whatever happens in this virtual world happens on Earth. To raise the stakes even higher our heroes will only have 10 days to reverse the effects of the virtual world to Earth otherwise the world may not survive or be under alien rule. Is this what World War 3 has in store for the people on Earth. Is Earth due for another dark age similar to the fall of the Roman Empire? If our heroes fail Earth will fall and nobody will know why or how. Prepare for an adventure where anything can happen will happen!

Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation Ephraim Nissan, 2012-06-15 This book provides an overview of computer techniques and tools — especially from artificial intelligence (AI) — for handling legal evidence, police intelligence, crime analysis or detection, and forensic testing, with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the evidence, methods for the modelling of argumentation, and computational approaches to dealing with legal, or any, narratives. By the 2000s, the modelling of reasoning on legal evidence has emerged as a significant area within the well-established field of AI & Law. An overview such as this one has never been attempted before. It offers a panoramic view of topics, techniques and tools. It is more than a survey, as topic after topic, the reader can get a closer view of approaches and techniques. One aim is to introduce practitioners of AI to the modelling legal evidence. Another aim is to introduce legal professionals, as well as the more technically oriented among law enforcement professionals, or researchers in police science, to information technology resources from which their own respective field stands to benefit. Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals, so it is important to be aware of ongoing controversies. A survey is provided of argumentation tools or methods for reasoning about the evidence. Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence. Moreover, tools appropriate for crime detection, intelligence, and investigation include tools based on link analysis and data mining. Concepts and techniques are introduced, along with case studies. So are areas in the forensic sciences. Special chapters are devoted to VIRTopsy (a procedure for legal medicine) and FLINTS (a tool for the police). This is both an introductory book (possibly a textbook), and a reference for specialists from various quarters.
