Monstrous Women in Comics Samantha Langsdale, Elizabeth Rae Coody, 2020-04-20 Contributions by Novia Shih-Shan Chen, Elizabeth Rae Coody, Keri Crist-Wagner, Sara Durazo-DeMoss, Charlotte Johanne Fabricius, Ayanni C. Hanna, Christina M. Knopf, Tomoko Kuribayashi, Samantha Langsdale, Jeannie Ludlow, Marcela Murillo, Sho Ogawa, Pauline J. Reynolds, Stefanie Snider, J. Richard Stevens, Justin Wigard, Daniel F. Yezbick, and Jing Zhang Monsters seem to be everywhere these days, in popular shows on television, in award-winning novels, and again and again in Hollywood blockbusters. They are figures that lurk in the margins and so, by contrast, help to illuminate the center—the embodiment of abnormality that summons the definition of normalcy by virtue of everything they are not. Samantha Langsdale and Elizabeth Rae Coody's edited volume explores the coding of woman as monstrous and how the monster as dangerously evocative of women/femininity/the female is exacerbated by the intersection of gender with sexuality, race, nationality, and disability. To analyze monstrous women is not only to examine comics, but also to witness how those constructions correspond to women's real material experiences. Each section takes a critical look at the cultural context surrounding varied monstrous voices: embodiment, maternity, childhood, power, and performance. Featured are essays on such comics as Faith, Monstress, Bitch Planet, and Batgirl and such characters as Harley Quinn and Wonder Woman. This volume probes into the patriarchal contexts wherein men are assumed to be representative of the normative, universal subject, such that women frequently become monsters.

Modern China's Copyright Law and Practice Yimeei Guo, 2017-07-25 This book presents selective case studies concerning China's Copyright Law, especially the typical cases chosen by China's Supreme People's Court and the Beijing, Shanghai and Guangzhou IP courts in recent years as the local court's guiding reference cases, the goal

is to help readers familiarize themselves with China's dispute and resolution system from a practical point of view. The major aspects covered include copyright object, copyright subject, copyright content, copyright limitations, neighboring rights, copyright infringement and enforcement, software copyright protection, collective management societies, and online copyright protection. Generally speaking, the book highlights selected typical cases involving various categories of current China's Copyright Law. In addition, it introduces readers to relevant laws and regulations and discusses some hot issues in the academic field, including the extended collective license (ECL) implementation problem and the definition of "know" of Internet Service Providers (ISPs) in China. As such, the book successfully combines legal theory and realities, offering readers, especially graduate students and researchers, a clear and sensible overview of modern China's Copyright Law and practice, as well as the chance to better understand China's judicial and administrative efforts to protect copyright while also satisfying the requirement of transparency ever since China's entry to the WTO in 2001.

Chinese Animation Rolf Giesen, 2014-12-19 With an output of more than 250,000 minutes annually, and with roughly 5,000 producers and production units, the Chinese are leading the field of animated films. Although it is almost impossible to completely cover 90 years of filmmaking, this book provides a comprehensible introduction to the industry's infancy, its Golden Age (Shanghai Animation Film Studio) and today's Chinese animation (in feature films, television series and student films). There are classics such as Princess Iron Fan (made at the time of the Japanese occupation) and the color Havoc in Heaven, both starring the Monkey King Sun Wukong, as well as countless TV stars (Blue Cat, Pleasant Goat and Big Big Wolf) and many almost unknown works by young filmmakers who are not focusing on an audience of children (like most of the industry output).

Animation in China Sean Macdonald,2015-11-06 By the turn of the 21st century, animation production has grown to thousands of hours a year in the People's Republic of China (PRC). Despite this, and unlike American blockbuster productions and the diverse genres of Japanese anime, much animation from the PRC remains relatively unknown. This book is an historical and theoretical study of animation in the PRC. Although the Wan Brothers produced the first feature length animated film in 1941, the industry as we know it today truly began in the 1950s at the Shanghai Animation Film Studio (SAFS), which remained the sole animation studio until the 1980s. Considering animation in China as a convergence of the institutions of education, fine arts, literature, popular culture, and film, the book takes comparative approaches that link SAFS animation to contemporary cultural production including American and Japanese animation, Pop Art, and mass media theory. Through readings of classic films such as Princess Iron Fan, Uproar in Heaven, Princess Peacock, and Nezha Conquers the Dragon King, this study represents a revisionist history of animation in the PRC as a form of postmodernism with Chinese characteristics. As a theoretical exploration of animation in the People's Republic of China, this book will appeal greatly to students and scholars of animation, film studies, Chinese studies, cultural studies, political and cultural theory.

A Collection of Destinies David Beltran,2016-06-23 Destiny gives to each of us a purpose for being that nothing we do in our lives is meaningless, that we never meet people by chance. And Taurana-Nhane, a young boy from a tribal island culture, must face

his destiny head-on in a most confusing way. For as is custom, he and his friends must go to the Kingdom of Lydia, which colonized Taus island home, to be taught about war and fighting. As Taurana embarks on his journey to adulthood, as he goes off to Lydias cruel and extensive warrior program, he will meet people who represent ideas conflicting with his own peoples reverence for fate and destiny. For the Lydians believe that man is the maker of his own destiny. And when Taurana befriends Draes, prince of Lydia, Taurana begins to adopt the Lydian attitude of a life free from the domain of destiny that is, until he goes to Lydia, where he meets a girl who will in fact bind him to that destiny, which he was just beginning to doubt. Caught now between the political frustrations of a foreign kingdom, doubted now by his own native friends who are weary of him, uncertain now of the way he should go, he must decide what to do to submit to the will of the spirits or to make his own fate. But destiny is too binding, and its two closest allies, time and love, are equally as powerful.

Chinese Independent Animation Wenhai Zhou, 2020-04-23 This study of 'independent' animation opens up a quietly subversive and vibrant dimension of contemporary Chinese culture which, hitherto, has not received as much attention as dissident art or political activism. Scholarly interest in Chinese animation has increased over the last decade, with attention paid to the conventional media circle of production, distribution and consumption. The 'independent' sector has been largely ignored however, until now. By focusing on distinctive independent artists like Pisan and Lei Lei, and situating their work within the present day media ecology, the author examines the relationship between the genre and the sociocultural transformation of contemporary China. Animation, the author argues, has a special significance, as the nature of the animation text is itself multilayered and given to multiple interpretations and avenues of engagement. Through an examination of the affordances of this 'independent' media entity, the author explores how this multifaceted cultural form reveals ambiguities that parallel contradictions in art and society. In so doing, independent animation provides a convenient 'mirror' for examining how recent social upheavals have been negotiated, and how certain practitioners have found effective ways for discussing the post-Socialist reality within the current political configuration.

Animation: A World History Giannalberto Bendazzi, 2015-11-06 A continuation of 1994's groundbreaking *Cartoons*, Giannalberto Bendazzi's *Animation: A World History* is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas and introducing over fifty previously undiscovered artists. Full of first-hand, never before investigated, and elsewhere unavailable information, *Animation: A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic

globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history.
