Capricorn Ascendant Secrets Saket Shah,2020-01-05 There are times when people just can’t identify with the attributes of their Sun or Moon sign. In fact, they may feel that they are an antithesis of their zodiac sign. You may also have observed it. Your Leo friend may not seek attention, may be because he or she has a Capricorn ascendant. Your Sagittarius friend is very possessive, may be because he or she has a Scorpio Ascendant. It is easy to understand why some people do not correspond to their Sun or Moon signs once you know about what is the rising sign or Ascendant in a horoscope. Ascendant is the degree of the zodiac sign that was highest on the Easter horizon at the time and place of birth. When seen from Earth, the sky seems to move, so the entire zodiac can be observed in a span of 24 hours day which means the rising sign changes on the Eastern horizon every 2 hours because there are 12 zodiac signs. People tend to associate their physical, emotional and spiritual attributes more with rising sign at times.

The Zodiac Conspiracy : Your Real Sun Sign Dr. Atara,2011-11-14 The appearance of an astronomer, who was discussing the 13th constellation on national TV last year, caused a huge outcry from the public. The big question was, How can my sun sign be different? Many people concluded that the astronomer did not know what he was talking about! People wanted to know how their Sun sign could be different than what they had been told all these years. Actually, the astronomer was very correct; he was telling everyone the truth as indicated by the science of astronomy, which the psychological art of astrology is based upon. There are 13 constellations and has always been 13. This is why the book also features a section on Ophiuchus, which is the 13th constellation and the only constellation/sign named after a human being, Imhotep an African Egyptian. There has been a conspiracy of silence among Western astrologers to misrepresent the history of astrology and ignore the truth of astronomy. Since astrologers did not adhere to the science of astronomy, as dictated by the constellations, they created an alternative paradigm called the Koch zodiac system, which only acknowledges 12 constellations and therefore 12 signs. Astrologers who live in the Eastern part of the world practice the truth of astronomy by using the Sidereal zodiac system. Most people in the Western world actually believe that on January 1st their Sun sign is Capricorn. However, the truth is that the Sun is actually in the constellation of Sagittarius. This is the truth of astronomy and the sidereal zodiac system. So, if you were born on January 1st (of any year) your Real Sun Sign is Sagittarius (not Capricorn). This book shows everyone (who wants to continue believing in their old sign, while embracing the truth of their Real Sun Sign), how to blend these two systems, so that who you REALLY ARE and what you are destined to learn about yourself, is anchored in the truth. It is a gentle reminder that you are not living your most authentic self. Are you the Virgo, Selfless Servant or Aquarius, The Giver? Read, the Zodiac Conspiracy and be introduced to the truth and Your Real Sun Sign.
