🔍 **THE STARS AND THE STRUGGLES FOR LIFE** Apollo Perez,2015-07-25 New life started in a distant solar system and an idea started with a chosen one. A person possessing great insight and supernatural powers and could solve many mysteries. Time passed and generations would pass before the right person would take this idea to heart, friendships and misguided leaders would almost destroy this new life and direction. It would take the power of the great grandson of a chosen one to keep this new life together and going. This was a time when moving on a planetary scale to a new planet in a new system just beyond the great nebula was planned. Their world here was to be destroyed by massive impacts as well as the worlds near by. Such a massive move would require great minds to come together and plan the move precisely. Special people started to step up, seemingly coming from nowhere. Such a special person was well known and was considered to be a chosen one. This person was an accomplished pilot and expert navigator and engineer and always coming up with new ideas. The move was well planned and executed and the trip and move was done. New life started in the new worlds and this pilot became known to the people as a great inventor and builder of the great cities. As life expanded in the first of five planets, life seemed to flourish and expansion was promising, he had an idea that would change the path into the future. Generations later, certain attitudes and poor plans and personal goals would almost destroy these people's futures and directions and it would take his great grandson to take control of life and destinies. His personal struggles early in his life in setting his direction and working with his friends was challenging. His close friends were mixed with their own paths and his personal love one was torn between him and loyalty to friends. Her direction and path would put a strain in his direction and destiny as he faced many challenges and adventures in his push through the planets. Being among the stars and the struggle for life is a challenge to this chosen one and would change the total direction of many people and set many directions to a common true path and future.

🔍 **PROJECT OLYMPUS: APOLLO** Jonathan Standing,2013-07-09 Picture yourself in a future shared with real-life Olympians and engineered humans designed to order... What do you do when: You build worlds; you're an entertainment mogul; and you are fascinated by ancient Greek mythology? Answer: You make an entire planet your stage set. 🔍 **ON EDGE** Apollo Perez,2016-11-30 As we understand it, there has always been lights in the dark skies! People have witnessed ships that appear and then dart away then reappear moments later! Others say they have seen beings from another world! Others say they have been abducted and still others say they have been taken and examined then released! The general public believes there is something to these stories and still others disregard the sightings and say there are explanations to them and questionable individuals. An eccentric preventive maintenance mechanic that fits in these category had wondered just what he would do if he would ever see such a thing! He had an extraordinary imaginative mind and understood the concepts of the computer world! He had great imagination and the thought of "What If" had always got him in trouble! Such a ship did come from the heavens and used their scans on the surface to probe for such a mind in an individual for an experiment! Highly advanced beings from another planet had been expanding for years! Traveling vast distances to many planets and systems and have been in contact with other forms of life everywhere they go. In all their studies they have always been pushed around and sometimes had difficulties finishing their studies! With their highly advanced technological wisdom, they eventually outgrew their basic body needs. An idea came to one of their leaders! To scan and approach a physically fit and mentally capable being humanoid for use as their body guard! They would have to persuade and not abduct, to have him come willingly! This was important so he would be willing to accept this new way of life and help them in any situation! As things were happening as usual, there were complications and he was asked to learn more than they had expected. He was exposed to unlimited available knowledge and something happened! As he pushed his capabilities to beyond comprehension, the beings started seeing him as a special person and others thought of him as, The Coming of the Chosen One! Stories started swirling around the society as the coming of such a person from an unknown planet! As he hears of such stories and the way they see him, he starts to act like this special person and then he pushes it but believes he will soon be found as a fake and returned or worse, left abandoned in some unknown planet! Surely always on edge!

🔍 **APOLLO 13** Jim Lovell,Jeffrey Kluger,2000 In April 1970, during the glory days of the Apollo space program, NASA sent Navy Captain Jim Lovell and two other astronauts on America's fifth mission to the moon. Only fifty-five hours into the flight of Apollo 13, disaster struck: a mysterious explosion rocked the ship, and soon its oxygen and power began draining away. Written with all the color and drama of the best fiction, APOLLO 13 (previously published as Lost Moon) tells the full story of the moon shot that almost ended in catastrophe. Minutes after the explosion, the three astronauts are forced to abandon the main ship for the lunar module, a tiny craft designed to keep two men alive for just two days. As the hours tick away, the narrative shifts from the crippled spacecraft to Mission Control, from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return. The entire nation watches as one crisis after another is met and overcome. By the time the ship splashes down in the Pacific, we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour. Now, thirty years after the launch of the mission, Jim Lovell and coauthor Jeffrey Kluger add a new preface and never-before-seen photographs to Apollo 13. In their preface, they offer an incisive look at America's waxing and waning love affair with space exploration during the past three decades, culminating only recently when the Apollo 13 spacecraft itself, long consigned to an aviation museum outside Paris, was at last returned to its rightful home in the United States. As inspiring today as it was thirty years ago, the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism.

🔍 **THE ANSWER?** Don Edwards,Donna Edwards,2014-07-12 In December of 1972, the crew of Apollo 17 rose up from the cold and lonely surface of the moon, leaving behind the dream and legacy of mankind's apparent destiny of breaching the final frontier of manned space exploration. It was an abrupt end to what seemed to be a new period in the evolution of our species. In all the time that has passed, neither America nor any other country has dared to forge a path back to the moon or beyond. Why? Why is it we are perfectly content to remain trapped here to the confines of redundant orbits and experiments around our own planet, when we have the means to journey ever outward and accomplish so much more? It is a question we have all asked at one time or another in our lives, either silently or aloud, and the answer given is never the one that satisfies. Suspicion always lingers. The Answer? provides an end to that suspicion, giving us insight into a black ops mission to the moon in April of 1973 after NASA astronomer Dr. Harry Sheldon and his daughter, Angelica, witnessed the apparent crash of an alien spacecraft on the moon from their observatory in Colorado. News of this incident explodes through the ranks of the Air Force, NASA and even the CIA as a plan quickly forms to beat the Soviets to the moon in an effort to secure whatever evidence and alien technology might exist in its wake. What follows next is the gathering of heroes in the form of three reserve Apollo astronauts and a secret launch from a Caribbean USAF facility to the far side of the moon, all orchestrated by CIA Special Agent-in-Charge Mary Ellen Coley. It is there that astronauts Hollanbach and Reese encounter much more than anyone could anticipate...from the discovery of the craft and what appears to be the amassing of an interstellar army set to invade our planet, the sacrifice one man must make on the moon to keep his crewmate and the mission alive, to Agent Coley's mounting of a daring rescue attempt alongside unsuspecting allies to leave no man behind in this tale of suspense, action, romance, and even more secrets that will finally quell the rumors and suspicions of why no one has ever gone back and provide the world with an answer to the question of the moon once and for all.

🔍 **Post in Space** Gary Bush,2009 When 15-year-old Ramon Garza’s grades start to slip, he’s forced to help out his mother after school. She’s a food service worker at the NASA, which is about to launch another rocket ship to the moon. While there, Ramon meets the crew and watches as Apollo 13 soars into space on April 11, 1970. But only two days after the launch, the mission goes horribly wrong.

🔍 **Moon Men Return** Scott Carmichael,2010-05-15 This book documents the role played by USS Hornet (CVS-12) in the recovery of the Apollo 11 Command Module after its splashdown in the Pacific Ocean on 24 July 1969. The book covers a period of time leading up to the recovery of Apollo 11, from approximately 5 June – 24 July 1969, during which crewmen of USS Hornet plus specialized NASA and DoD spaceflight recovery units prepared for the recovery operation. It offers a detailed account of those preparations, drawn from both historical records and the personal memories of 80 men who served on board USS Hornet and directly participated in the recovery operation. The purpose of this book is to document for future generations the Navy’s role in the successful final phase of the historic flight of Apollo 11 – the manned spaceflight which culminated in man’s first walk upon another celestial body, the moon.
