Fairchild C-82 Packet Simon D. Beck,2017-11-15 Originally designed as a cargo and paratroop transport during World War II, the Fairchild C-82 Packet is today mainly remembered for its starring role in the Hollywood film *The Flight of the Phoenix* (1965). Its ungainly appearance earned it the nickname the flying boxcar but the aircraft was the first to achieve practical end-loading and aerial delivery of cargoes. Its outsized capacity served the U.S. military's needs for more than ten years--civilian operators flew it in remote locations like Alaska and South America for a further three decades. This book provides a comprehensive history of the C-82, detailing each of the 224 aircraft built, with technical diagrams, multiple appendices and more than 200 photos.

Article 82 EC Ariel Ezrachi,2009-10-28 The landscape of European competition law has seen significant changes in the past decade, both in terms of enforcement and substantive application. One of the last frontiers to be subjected to scrutiny has been Article 82. In recent years the European Commission has pushed forward the debate on the nature and scope of Article 82. Of major significance to this debate were the Commission's Consultation Paper on an economic approach to Article 82, the Discussion Paper on the application of Article 82 to exclusionary abuses, and the Commission's recent Guidance on its enforcement priorities in applying Article 82. The debate over the realm of Article 82 EC has raised important questions as to its past and present application. This collection of essays by international experts explores the changing boundaries of Article 82 EC and considers its recent evolution. The chapters cover a range of subjects, including the legal and economic implications of an effects-based approach to Article 82 EC, the recent Commission Guidance on Article 82 EC, the interface between intellectual property rights and competition law, licensing, tying, excessive pricing, and the protection of the consumer interest.
