Leonard Arthur Sawyer, William Harry Mitchell

Super Cargo Ships Christopher Batio, 2001 The super cargo ship is a post-World War II phenomenon necessitated by the world's growing dependence on greater volumes of resources. This colorful book examines the vast dimensions and varied duties of the giant vessels that ply the oceans today, moving payloads like oil, natural gas, automobiles, water, and livestock from continent to continent. Readers are treated to close-up and inside views of the world's largest tankers, container ships, automobile transporters, Great Lakes cargo ships, super tugs, and more. Also addressed are the advanced technologies used in construction and operation, continuing efforts to make the vessels safer, and the consequences suffered when accidents do occur. Sidebars examine the daily routines of crewmembers.

Freighters George Ancona, 1985 A photo essay describing the various types of cargo ships, how they operate, and the jobs of the crew that maintains them.

Cargo Ships James M. Flammang, 2008-08-01 We hear a lot about the new global economy. How does it work? How are we able to transport so many products around the world? How have innovations in the development of Cargo Ships fueled the global economy? Find the answers to these questions and more when you take a look at cargo ships from a new perspective.

Cargo Access Equipment for Merchant Ships Ian Lyon Buxton, 2012-12-06 As President of International MacGregor I am deeply indebted to the authors of this excellent book for the very considerable amount of work and scholarship it contains. It is the first authoritative work on cargo access equipment to be published and I am sure that it will be greatly welcomed by the Marine Industries. You will see from the authors' preface that the book was commissioned by the Henri Kummerman Foundation which was established in 1976 to assist and promote international research and development in the field of marine transportation and cargo handling. The Foundation has already made a number of grants to universities and to students but this book is its first major contribution to the furthering of education in the Marine Industries. For me, it is a rewarding fruition of a long involvement in maritime affairs. However, much requires to be done in the future and the Foundation can only succeed if it is encouraged and assisted by people who are forward thinking. I should be pleased therefore to hear from any readers of this book if they feel that they can help or be helped within the aims and objectives of the Foundation. 28 Chemin du Pommier, HENRI KUMMERMAN 1218 Geneva, Switzerland.

New Carissa Steven Michael Smith, 2010-11 On February 4th, 1999, the 639-foot cargo ship named New Carissa ran aground off the Oregon Coast near Coos Bay. What started out to be a routine salvageable rescue operation, turned into one of the largest and most expensive maritime disasters ever recorded in Oregon's history. This is the true story behind 'the ship that refused to die.'--P [3].

Cargo Liners Ambrose Greenway, 2012-02-29 The British maritime historian explores the golden age of cargo liners and the routes they took around the world in this beautifully illustrated volume. From 1850 to 1950, the cargo liner grew to dominate the world's trade routes, providing regular services that merchants, shippers and importers could rely on. They carried much of the world's high-value goods and their services spread to most corners of the world. They were the tool of the world's first phase of globalization. Illustrated with more than 300 photographs, Cargo Liners tells the story of these majestic ships, beginning with the establishment of routes around Europe and across the North Atlantic in the 1850s. When marine engineer Alfred Holt developed high-pressure compound engines, vessels began to steam further afield, reaching ports in the Far East and Australia. Then the opening of the Suez Canal in 1869 cemented the dominance of the cargo liner. Only with the appearance of the first container

ship in the 1950s was that dominance finally overthrown.

First Class Cargo William H. Miller, 2016 This book is about the unique, largely ignored and forgotten passenger-cargo ships that were not liners but more than ordinary freighters. The first appeared in the 1930s but their heyday was post-war until the 1960s. There were dozens of these ships, often carrying 50-300 passengers in very comfortable, sometimes quite luxurious quarters. They were club-like, even yacht-like, and preferred by many, pre-jet travelers who wanted a longer, more restful journey, away from the often hotel-like quality of the big ocean liners. They also happened to be cargo vessels, carrying holds of cargo while adhering to scheduled sailings. William Miller presents an important record of a little-documented aspect of maritime history.

Introduction to Container Ship Operations and Onboard Safety Alexander Arnfinn Olsen, 2022-03-07 Introduction to Container Ship Operations and Onboard Safety is an introduction for students and professionals involved in the maritime industry. It provides an overview of the merchant navy from its beginnings to the present day, entry and training requirements, shipboard hierarchy and roles and responsibilities, shipboard safety organisation, inductions and new crew member familiarisation, safe means of access to enclosed spaces, general housekeeping, risk assessment and risk management. In addition, it examines specific hazardous activities such as cargo loading and unloading, drydocking, drills, and actions to take in the event of an emergency. This textbook provides a concise overview of core concepts and practices in the maritime industry that is appropriate for the cadet, experienced seafarer, industry professional, and the general maritime enthusiast.

The Liberty Ships of World War II Greg H. Williams, 2014-07-15 This book details the Liberty ships and the Emergency Shipbuilding Program during World War II. For the first time, comprehensive information is provided about the builders, the namesakes, and the operators under one cover. Included is a list of all 2,710 Liberty ships delivered by U.S. shipyards, giving each ship's namesake and detailed descriptions of the companies that built the ships and the steamship companies that operated them during the war. This book also details the formation of two shipyards in South Portland, Maine, the Todd-Bath Iron Shipbuilding Co. and the South Portland Shipbuilding Corp. South Portland's shady operations were investigated by the U.S. Congress and resulted in the merger of both companies into the New England Shipbuilding Corporation in April 1943. Also featured is the Jeremiah O'Brien. Built by New England Ship in 1943 and one of only two operational Liberty ships left in the world, its service history and crew information are given along with its postwar restoration and return to Normandy in 1994.

Running Away to Sea George Fetherling, 2008-12-15 At a turning point in his life, George Fetherling embarked on an adventure to sail round the world on one of the last of the tramp freighters. The four-month voyage carried him 30,000 nautical miles from Europe via the Panama Canal to the South Pacific and back by way of Singapore, Indonesia, the Indian Ocean, and Suez. Written with dash, colour, and droll humour, Fetherling's narrative is peopled by a rich cast of characters, from the Foreign Legionnaires of French Polynesia to the raskol gangs of Papua New Guinea. The author captures the reality of life aboard a working cargo ship – the boredom, the seclusion, the differences of nationality and culture that isolation and cramped quarters seem to exaggerate. But the routine of loneliness or tranquility is punctuated by moments of near-panic – shipboard fires, furniture-smashing storms, even a brush with pirates in the Straits of Malacca.
