Situations Before Heaven Carl L. Johnson II,2011-01-25 Life obstacles that we experience good or bad pave our path. Although it may appear things are not working in your favor always remember God will see his people through. Our father watches every tear we cry whether it is tears of love, joy, laughter, hurt or pain. We must understand each situation we encounter is not by accident, for God is the author of our life. The Lord has made each of us a testimony that should be shared among one another and he deserves all the glory. As a youngster, I was told there is no problem too hard for our Lord Jesus Christ to solve. We all have a purpose, every day situation prepares us for things that lay ahead, so when opportunities are presented we know how to react or handle them.

Where Water is Gold Carl Johnson,2016 Bristol Bay is a region in southwestern Alaska renowned as the most significant source of wild sockeye salmon in the world, as well as other species of Pacific salmon and herring. Unfortunately, it also contains mineral resources: gold, copper, and molybdenum (a metal used to make steel alloys), and the extraction of these minerals would likely destroy the world-class commercial and recreational fisheries essential not only to the people who call this region home, but far beyond as well. Mining development threatens Native tribes and the salmon-based subsistence way of life that has sustained them for 4000 years. In addition to millions of migrating salmon, Bristol Bay provides important habitat for many other species including millions of seabirds, sea otters, seals, walruses, Beluga and Orca whales, and the endangered North Pacific Right Whale. Conservation in competition with development is a well-worn theme in Alaska, and nowhere is this more apparent than in the battle over Bristol Bay exemplified by the proposed Pebble Mine--Provided by publisher.

The Technicolor Community Carl V. Johnson,2011-08-01 Carl Johnson has been pastor of Gracepoint Gospel Fellowship in New City, New York for over thirty-three years. He has seen the church grow from an attendance of about 140 in 1977 to an average of 1200 to 1400 weekly. During this time the congregation has changed dramatically moving from a completely white church to one that now boasts over 70 different ethnicities with almost equal numbers of whites, blacks and Hispanics and a smaller percentage of Asians. Carl holds a Master of Divinity degree from Gordon-Conwell Theological Seminary in South Hamilton, Massachusetts and a Doctor of Ministry degree from The Kings Seminary in Van Nuys, California. Carl and his wife Sherry, who holds a doctorate in Counseling Psychology from Fordham University, have often traveled together to various mission fields to teach in Bible school settings, in seminars, and pastor's conferences. They are parents of three children and grandparents of five. Realizing the dream of Multicultural Congregations - A Taste of Heaven A George Barna Survey in 1990 labeled just 3% of churches in America as Multicultural. The vast majority of congregations in America today remain largely segregated. Gracepoint Gospel Fellowship, a church of over a thousand attenders in suburban New York, has gone through a transformation in the past thirty years from a lily white congregation to one that now boasts over 70 ethnicities. Dr. Carl Johnson writes of his experience pastoring a congregation through this quiet revolution. He gives a solid Biblical-Theological Basis for the goal and the mandate of diversity in the local church. Questions addressed are:

Can multicultural churches flourish? Should multicultural churches be encouraged? What are the benefits of multicultural churches? How intentional must the church be to achieve cultural diversity? How do we prepare a local church for diversity? And finally, Is it really necessary to strive for this goal?The book contains the results of qualitative research conducted within his congregation with the goal of identifying vital factors that have contributed to diversity. The answers come, not from pastors and church leaders, but from the responses of congregants who made the move from ethnic churches to a majority or multicultural congregation. Their feedback offers important insights.

The Dirtiest Race in History Richard Moore,2012-01-01 The men's 100m final at the 1988 Olympics has been described as the dirtiest race ever - but also the greatest. web we utilize the equation that relate amount remaining initial mass and number of half lives $n = \frac{t}{T} \times \log_2 \left(\frac{m_0}{m} \right)$ where m_0 is the initial mass, m is the mass remaining, t is the time, and T is the half life. For example, if 125 g of an isotope remains after 16 days and the half life is 80 days, then $n = \frac{16}{80} \times \log_2 \left(\frac{125}{80} \right) = 0.2 \times \log_2 (1.5625) = 0.2 \times 0.6439 = 0.1288$. Therefore, the mass remaining is $m = m_0 \times 2^{-n} = 125 \times 2^{-0.1288} = 125 \times 0.91 = 113.75$ g.
