¿Qué Significa Ser Carpintero? (What's It Really Like to Be a Carpenter?)
Christine Honders, 2019-07-30 Even as the world changes, skilled labor will always be needed. There's nothing quite like the ability to create things with your skills and your own hands. Carpenters use their skills to build things we use every day, including items such as furniture, buildings, and bridges. They read building plans, choose materials, design, and create. This book teaches kids that to become a carpenter, you have to use a lot more than a hammer and nails; you need your brain too. Photographs and diagrams enable readers to make key connections with the text.

El lápiz del carpintero Manuel Rivas, 2000 En la cárcel de Santiago de Compostela, en plena Guerra Civil, un pintor dibuja el Pórtico de la Gloria con un lápiz de carpintero, reflejando los rostros... y aún más, la desesperación de sus compañeros de presidio. Un guardián su futuro asesino., lo observa todo. A partir de esta escena, el Lápiz de Manuel Rivas hilvana una historia donde el amor logra vencer a la desesperación. --

Criminal Law and Morality in the Age of Consent Aniceto Masferrer, 2021-02-09 This book discusses the relation between morality and politics, and morality and law, a field that has been studied for more than two thousand years The law is a part of human culture, and this touches upon a dynamic reality that is connected to the relation between nature and freedom, nature and culture. If such relations are not clearly understood, as is the case today, the relation between morality and law cannot be properly

comprehended either. The relationship between morality and criminal law must constantly evolve to meet the needs of changing times and circumstances. Social changes and new situations require new answers. And since the relationship involves criminal law, legal philosophy and legal history, interdisciplinary approaches are always needed. Featuring fifteen original contributions by legal scholars from various European and American universities, the book does not pretend to solve the complexity of the relation between morality and criminal law, but instead expresses criticism, offers some proposals and stimulates further thought. The book tackles the topic from an interdisciplinary perspective (criminal law, constitutional law, legal philosophy and legal history, among others). As such, it appeals not only to scholars and students, but also to lawyers, policymakers, historians, theologians, philosophers and general readers who are interested in the legal, social, political and philosophical issues of our time.

Models and Idealizations in Science Alejandro Cassini, Juan

Redmond, 2021-05-27 This book provides both an introduction to the philosophy of scientific modeling and a contribution to the discussion and clarification of two recent philosophical conceptions of models: artifactualism and fictionalism. These can be viewed as different stances concerning the standard representationalist account of scientific models. By better understanding these two alternative views, readers will gain a deeper insight into what a model is as well as how models function in different sciences. Fictionalism has been a traditional epistemological stance related to antirealist construals of laws and theories, such as instrumentalism and inferentialism. By contrast, the more recent fictional view of models holds that scientific models must be conceived of as the same kind of entities as

literary characters and places. This approach is essentially an answer to the ontological question concerning the nature of models, which in principle is not incompatible with a representationalist account of the function of models. The artifactual view of models is an approach according to which scientific models are epistemic artifacts, whose main function is not to represent the phenomena but rather to provide epistemic access to them. It can be conceived of as a non-representationalist and pragmatic account of modeling, which does not intend to focus on the ontology of models but rather on the ways they are built and used for different purposes. The different essays address questions such as the artifactual view of idealization, the use of information theory to elucidate the concepts of abstraction and idealization, the deidealization of models, the nature of scientific fictions, the structural account of representation and the ontological status of structures, the role of surrogate reasoning with models, and the use of models for explaining and predicting physical phenomena.

The Routledge Handbook of Linguistic Reference Stephen Biggs, Heimir Geirsson, 2020-12-23 This Handbook offers students and more advanced readers a valuable resource for understanding linguistic reference; the relation between an expression (word, phrase, sentence) and what that expression is about. The volume's forty-one original chapters, written by many of today's leading philosophers of language, are organized into ten parts: I Early Descriptive Theories II Causal Theories of Reference III Causal Theories and Cognitive Significance IV Alternate Theories V Two-Dimensional Semantics VI Natural Kind Terms and Rigidity VII The Empty Case VIII Singular (De Re) Thoughts IX Indexicals X Epistemology of Reference Contributions consider what kinds of expressions actually refer (names, general terms, indexicals,

empty terms, sentences), what referring expressions refer to, what makes an expression refer to whatever it does, connections between meaning and reference, and how we know facts about reference. Many contributions also develop connections between linguistic reference and issues in metaphysics, epistemology, philosophy of mind, and philosophy of science.

Relative Truth Manuel García-Carpintero,Max Kölbel,2008-08-14 Relative Truth examines a question which has become the focus of one of the liveliest debates in philosophy: whether truth is relative to standards of taste,

values, or subjective informational states. Specially written papers by leading figures, together with a helpful introduction, make this book the starting-point for future work.

The Oxford Handbook of Assertion Sanford C. Goldberg, 2020-03-17 Assertions belong to the family of speech acts that make claims regarding how things are. They include statements, avowals, reports, expressed judgments, and testimonies - acts which are relevant across a host of issues not only in philosophy of language and linguistics but also in subdisciplines such as epistemology, metaphysics, philosophy of mind, ethics, and social and political philosophy. Over the past two decades, the amount of scholarship investigating the speech act of assertion has increased dramatically, and the scope of such research has also grown. The Oxford Handbook of Assertion explores various dimensions of the act of assertion: its nature; its place in a theory of speech acts, and in semantics and meta-semantics; its role in

epistemology; and the various social, political, and ethical dimensions of the act. Essays from leading theorists situate assertion in relation to other types of speech acts, exploring the connection between assertions and other phenomena of interest not only to philosophers but also to linguists, psychologists, anthropologists, lawyers, computer scientists, and theorists from communication studies.

Two-Dimensional Semantics Manuel Garcia-Carpintero, Josep Macià, 2006-04-06 According to two-dimensional semantics, the meaning of an expression involves two different dimensions: one dimension involves reference and truth-conditions of a familiar sort, while the other dimension involves the way that reference and truth-conditions depend on the external world (for example, reference and truth-conditions might be held to depend on which individuals and substances are present in the world, or on which linguistic conventions are in place). A number of different two-dimensional frameworks have been developed, and these have been applied to a number of fundamental problems in philosophy: the nature of communication, the relation between the necessary and the a priori, the role of context in assertion, Frege's distinction between sense and reference, the contents of thought, and the mind-body problem. Manuel Garcia-Carpintero and Josep Macia present a selection of new essays by an outstanding international team, shedding fresh light both on foundational issues regarding two-dimensional semantics and on its specific applications. The volume will be the starting-point for future work on this approach to issues in philosophy of language, epistemology, and metaphysics.

The Semantics and Pragmatics of Quotation Paul Saka, Michael Johnson, 2017-12-07 The chapters in this volume address a variety of issues

surrounding quotation, such as whether it is a pragmatic or semantic phenomenon, what varieties of quotation exist, and what speech acts are involved in quoting. Quotation poses problems for many prevailing theories of language. One fundamental principle is that for a language to be learnable, speakers must be able to derive the truth-conditions of sentences from the meanings of their parts. Another popular view is that indexical expressions like I display a certain fixity -- that they always refer to the speaker using them. Both of these tenets appear to be violated by quotation. This volume is suitable for scholars in philosophy of language, semantics, and pragmatics, and for graduate students in philosophy and linguistics. The book will also be useful for researchers in other fields that study quotation, including psychology and computer science.

Virtuous Thoughts: The Philosophy of Ernest Sosa John Turri, 2013-03-14 This collection is a major contribution to the understanding and evaluation of Ernest Sosa's profound and wide-ranging philosophy, in epistemology and beyond. A balanced, fair and critical volume, it offers a sensitive appreciation of his wide philosophical purview, a nuanced assessment of the detail of his thought, and a spur to exploring the linkages between the varied topics explored by the subtle mind of this great American scholar. The papers explore a wealth of Sosa's academic interests, including his work on philosophical method, the philosophy of mind and language, metaphysics, and value theory, in addition to his output on epistemology itself. It offers, for example, a rebuttal of the counterarguments to Sosa's reliabilist theory of introspective justification, which itself concludes with some objections to Sosa's stated views on the 'speckled hen' problem. Other authors track the connections of his virtue theory to his advocacy of bi-level epistemology,

provide reflections on Sosa's views on the epistemological tradition, and examine the nexus of his beliefs on intuition and philosophical methodology. This volume is an insightful reckoning of Sosa's academic account.

The Making of Dignity and Human Rights in the Western Tradition Aniceto Masferrer, 2024-01-23 The book describes in a retrospective way how dignity and human rights evolved. In doing so, the book is divided in three parts: human rights from present to early modern age, human dignity from present to Early modern age and dignity and human rights from present to future. The book has been written in a way that might be appealing to graduate students, postgraduate students, researchers and even laymen who are interested in the making of dignity and human rights in the Western.
