Biology and Ecology of Carp Constanze Pietsch, Philipp Hirsch, 2015-06-22 Carp are the backbone of a growing aquaculture industry. They facilitate scientific progress as a model species in laboratories, cause concern for ecosystem managers as an invasive species, and mesmerize anglers as big game. In addition, ornamental koi carp fascinate hobby breeders. Biology and Ecology of Carp covers all these facets of this freshwater fish. Informative and engaging contributions from renowned experts review the current state of research on carp and present their original findings. Thirteen cross-linked chapters provide an exhaustive yet easily accessible treatise exploring: Carp aquaculture Natural and artificial reproduction Feeding and growth Ecosystem effects of carp Effects of disease agents and toxic substances on carp Color illustrations and infoboxes help readers navigate technical terms and complex concepts, explaining how carp interact with their natural and artificial environments. This book is suitable for everyone interested in carp—from scholars to anglers.

Asian Carp Barbara A. Somervill, 2008-01-01 Asian carp have big appetites and can leap out of the water when startled. They were brought to the United States from their native Asian habitats to control algae growth on fish farms. Find out what happened when some of these big, jumping fish escaped and made their way up the Mississippi River.

Asian Carp and the Great Lakes Region Eugene H. Buck, 2011-08 Four species of non-indigenous Asian carp are expanding their range in U.S. waterways, resulting in a variety of concerns. Three species -- bighead, silver, and black carp -- are of particular note, based on the perceived degree of environmental concern. Current controversy relates to what measures might be necessary to prevent movement of Asian carp from the Mississippi River drainage into the Great Lakes through the Chicago Area Waterway System (CAWS). Contents of this report: Background; Potential Impacts; The CAWS; Federal Response to Asian Carp; Litigation; Canadian Concern; Congressional Interest: Current Legislation; Funding and Authority for Ongoing Actions. Charts and tables. This is a print on demand report.

The Carp R. Billard, 1999-04-15 As a group, carp provide 4 million metric tonnes of fish annually - over a quarter of all fish culture worldwide. For the first time, a book is available in English that concentrates solely on the carp as an economic rather than an ornamental fish with a panel of international experts producing a comprehensive, practical volume about carp production and management. Starting with a brief look at the biology of cyprinids, the book then discusses the methods and management of carp farming, from water quality to the economics of fish production in ponds. Novel methods to improve stock, including genetic engineering, are covered and case studies give added value to the text. As carp farming turns from traditional to intensive methods, farmers, researchers and technicians in industry will welcome this benchmark volume, which also is a valuable reference book for graduate and postgraduate students and lecturers in aquaculture.

Genetics and Breeding of Common Carp Valentin S. Kirpitchenkov, Roland Billard, 1999 This book presents not only the different biotopes in which the common carp has settled, but also a thorough analysis of the phenotypic and genotypic traits of the various pigmented species. The different artificial selection and breeding methods will enable an optimum production of very resistant hybrids.

Discover Carp Fishing Simon Crow, Rob Hughes, 2012-10-01 A truly in-depth look at how to fish for carp written by the 1996 World Carp Cup

Champions, Discover Carp Fishing, is packed with information and advice on how to tackle even the most cunning of carp. Topics include: a detailed description of the carp itself and how to care for the species; best tackle to use; tactical considerations such as casting, plumbing and locating fish; different baits, including making your own boilie recipes, and baiting strategies; rigs and knots; river carping, big fish hunting and match fishing for carp. A superbly illustrated book, an encyclopaedia of carp fishing and the only guide the carp angler needs - you can't fail to learn from it!

Black Carp Leo G. Nico, James David Williams, Howard L. Jelks, 2005

Bigheaded Carp Martha London, 2021-08-01 This title explores the role of bigheaded carp in introduced environments, how humans helped spread the species, the threats they pose to ecosystems, and efforts being taken to manage them. This book also includes a table of contents, two infographics, informative sidebars, a "That's Amazing!" special feature, quiz questions, a glossary, additional resources, and an index. This Focus Readers title is at the Navigator level, aligned to reading levels of grades 3-5 and interest levels of grades 4-7.

Genetic Resources of Indian Major Carps P. V. G. K. Reddy, Food and Agriculture Organization of the United Nations, 1999 This publication, written for resource managers, aquaculture and scientists, reviews the genetic resources of Indian major carps: the catla (*Catla catla*), the rohu (*Labeo rohita*), the mrigal (*Cirrhinus mrigala*), and the Kalbasu (*Labeo calbasu*). The review includes information on spawning behaviour and breeding under natural and culture conditions, distribution, genetic characterization, status of genetic resources, conservation efforts, and hybridization among Indian major carps and with other cyprinids. Research on genetic improvement through selective breeding, chromosome-set manipulation and genetic engineering in India is reviewed. The status of Indian major carps in Bangladesh, Thailand, Vietnam and India work on cryopreservation and genebanking is also discussed.

Carp genetic resources for aquaculture in Asia David J. Penman, Modadugu V. Gupta, Madan Mohan Dey, 2005 There are over 1300 species of cyprinids in Asia, and these are utilized by people for food (capture fisheries and aquaculture) and as ornamental species. This publication focuses on cyprinid species that are bred in hatcheries and used in aquaculture and restocking activities. Introduced and threatened species of cyprinids in Asia are also discussed. We are well aware that we have not covered many other cyprinid species that are utilized by people in Asia in various ways: wild species in capture fisheries, self-recruiting species in aquaculture ponds and other water bodies, and aquarist species.

Diseases of Carp and Other Cyprinid Fishes David Hoole, David Bucke, Peter Burgess, Ian Wellby, 2008-04-15 Cyprinids rank as one of the most commercially important groups of freshwater fishes and are exploited for many purposes; as a human food source, especially in Europe and Asia; as sport fish; and as ornamental fish for ponds and aquaria. Certain species are also cultured as bait fish and several of the small cyprinids such as the zebra fish have become internationally accepted laboratory models for toxicology testing and molecular research. A thorough understanding of cyprinid health and diseases is fundamental to the successful management and exploitation of these fishes for freshwater fisheries, pisciculture and ornamental productions. This practical guide to disease diagnosis, prevention and control includes numerous colour plates and covers a comprehensive array of diseases - infectious and non-infectious - of cultivated and wild cyprinids.

Summary Report of the Asian Regional Workshop on Carp Hatchery and Nursery Technology Robert C. May, Roger S. V. Pullin, V. G. Jhingran, 1984-01-01

Gorda, Food and Agriculture Organization of the United Nations, 2001 Common carp is one of the oldest cultured and most domesticated fish in the world, and is a very adaptable species in both the wild and in culture conditions.
