Iron Arm John Joseph Timothy Sweet,2006-12 - A detailed study of Italy's long-ignored tank force - Explores the intersection of technology, war, and society in Mussolini's Italy - Second only to Germany in number of tank divisions, first to create an armored corps Though overshadowed by Germany's more famous Afrika Korps, Italian tanks formed a large part of the Axis armored force that the Allies confronted--and ultimately defeated--in North Africa in the early years of World War II. Those tanks were the product of two decades of debate and development as the Italian military struggled to produce a modern, mechanized army in the aftermath of World War I. For a time, Italy stood near the front of the world's tank forces--but once war came, Mussolini's iron arm failed as an effective military force. This is the story of its rise and fall.

Italian Light Tanks Filippo Cappellano,Pier Paolo Battistelli,2012-06-20 The Italian army, unlike those of the British and French, did not use tanks in combat during World War I and, by November 1918, only one training unit equipped with French Schneider and Renault tanks had been formed. Consequently, during the 1920s the Italian army had just one single tank type in its armoured inventory - the Fiat 3000. Only in 1927 was the first tank unit formed as a branch of the infantry and not as an independent organization, while the cavalry rejected the idea of both tanks and armoured cars and decided to stand by the use of horses for its mounted units. Between 1933 and March 1939, a further 2,724 CV 33 / L 3 tanks were built, 1,216 of which were exported all over the world. By the time Italy entered the war in June 1940, the army had 1,284 light tanks, 855 of which were in combat units, including three armoured divisions. Variants of the CV 33 / L 3 tanks included flame-throwers, bridge-layers, recovery vehicles, and a radio command tank. Some L 3 tanks were still in use in 1945, by both the Germans and the German-allied Italian units of the Repubblica Sociale.

Bren Gun Carrier Robert Jackson,2019-10-30 A guide that blends the history behind this British tank with resources for military vehicle modeling enthusiasts. One of the most versatile fighting vehicles in the British army and many other forces for a quarter of a century, the Universal Carrier—more popularly known by its original title of Bren Gun Carrier—was developed as a fast and agile infantry-support vehicle. In this volume of Pen & Sword's LandCraft series, Robert Jackson traces its design and manufacturing history and describes its operational role throughout its long career. The Bren Carrier served in every theater of the Second World War, from northwest Europe, North Africa and the Soviet Union to the Far East. Then, with the war over, it was operated by many belligerents in a string of other conflicts around the world, including Israel's struggle for independence and the war in Korea. A selection of archive photographs showing the Bren Carrier in action gives a graphic impression of how adaptable it was and records the variety of equipment it could carry. The book is an excellent source for the modeler, providing details of available kits together with specially commissioned color profiles which illustrate how the Bren Carriers used by different units and armies appeared.

La Ultima Cruzada Bob Cordery,2018-02-22 This book has been written in direct response to the numerous requests for a revised and improved version of the previous £ and now long out-of-print £ second edition. Unlike the previous book, this edition presents the data it contains thematically in the hope that it will enable readers to quickly find the information they are looking for. LA ULTIMA CRUZADA is intended to be a sourcebook of information that will be useful to military historians and wargamers with an interest in the Spanish Civil War. The book comprises six parts: Part 1: The major political parties and main events of the Spanish Civil War Part 2: The Armies of the Spanish Civil War Part 3: The Navies of the Spanish Civil War Part 4: The Air Forces of the Spanish Civil War Part 5: The Spanish Police and Security Forces Part 6: Uniforms of the Spanish Civil War There is also a bibliography.

Iron Hulls, Iron Hearts Ian W Walker,2012-10-01 The campaign in North Africa during World War Two was one of the most important of the conflict. The allies fought for control of North Africa against the German Afrika Korps led by Rommel. But the part played by Mussolini's Italian troops, and in particular the armoured divisions, in support of the Germans is not so well known. This painstakingly researched book looks in detail at the role

of Mussolini's three armoured divisions - Ariete, Littorio and Centauro - and the invaluable part they played in Rommel's offensive between 1941 and 1943. Indeed, the author is able to show that on many occasions the presence and performance of the Italian armoured divisions was crucial to the success of the axis campaign.

The Western Desert Campaign 1940-41 Glenn Wahlert,2010-07-01 While the North African campaign has been studied in detail over the years, much of this study has been dedicated to the battles between the British 8th Army and Rommel's Afrika Korps. There has been little serious study of Wavell's campaign against Italian forces in 1940- 41, nor of the role played by the Australian 6th Division in the eventual Italian defeat. Part of this can be attributed to wartime propaganda that labelled the Italian Army dilettantes and mocked their courage. The truth is much different. Many Italian units showed incredible bravery, and the Australian assaults on fortress towns such as Bardia were far from a walkover. Today's aspiring military commanders need look no further than the early Western Desert campaign for historical examples of brilliant leadership, detailed planning, deception, surprise, manoeuvre warfare and relentless pursuit, all against overwhelming odds.

Girls und Panzer Vol. 2 GIRLS und PANZER Projekt,Ryohichi Saitaniya,2019-11-14 Yukari Akiyama and the girls of the Ooarai Girls' Academy are up against the prestigious St. Gloriana Women's Academy in their first practice match. The game will test Miho Nishizumi's leadership skills as team captain and the Ooarai team itself. Can Miho's new style of Tankery take her friends to the next level in the Tankery National Tournament?

Fallen Eagles: The Italian 10th Army In The Opening Campaign In The Western Desert, June 1940 Major Howard R. Christie,2015-11-06 The Italian Army developed a sound and unique combined arms doctrine for mechanized warfare in 1938. This new doctrine was called the "War of Rapid Decision." It involved the use of mechanized warfare in the Italian version of the blitzkrieg. This doctrine evolved from the lessons learned in the Italian-Ethiopian War of 1935 to 1936 and the Spanish Civil War of 1936-1939. With Italy's entry into World War II, military operations ensued along the Libyan-Egyptian border between the Italian 10th Army and a much smaller British Western Desert Force. The Italian Army in Libya outnumbered the British Army in Egypt by a ratio of four to one. The setting seemed to be ideal for the employment of the War of Rapid Decisions. Moreover, Marshal Rodolfo Graziani, who was the commander of the Italian 10th Army in North Africa during its first campaign in the western desert, had pioneered this new form of mechanized warfare during the Ethiopian War. Surprisingly, the Italian forces in Libya did not employ their new doctrine, reverting instead to more conventional techniques of "mass." It was Graziani's failure to utilize the doctrine which he had helped to develop that led to Italy's embarrassing defeat in 1941.

Axis Tanks of the Second World War Michael Green,2017-07-30 This pictorial history presents an in-depth study of the various tanks built and deployed by the Axis Alliance during WWII. Though Nazi Panzer tanks have become a ubiquitous symbol of Axis Alliance combat, the Japanese Army had more tanks than Germany in 1938. These included the Type 95 light tank and the Type 89 and 97 medium tanks. Other Axis powers, including Italy, Romania and Hungary also built their own tanks. The latter was responsible for the Toldi and Turan light tank series. In this informative collection of wartime photographs, military expert Michael Green discusses how the Axis powers drew on British and French tank designs in the period leading up to the Second World War. The Carden-Loyd tankette suspension was used as a model for the Panzer 1 series as well as the light Italian and Japanese tanks. German engineering talent then produced the ingenious designs of the Panzer II, III and IV series and, later in the War, the Panther Medium and Tiger heavy tanks.

1914-1938 Armored Fighting Vehicles George Bradford,2010-09-20 George Bradford's latest collection of scale drawings of armored fighting vehicles focuses on the years from World War I to the eve of World War II.

"Ironsides" Harold A. Skaarup,2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved

and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

Spanish Civil War Tanks Steven J. Zaloga, 2011-12-20 The tanks used during the Spanish Civil War are not often examined in any great detail, and are often labeled as little more than test vehicles in a convenient proving ground before World War II. But, with groundbreaking research, armor expert Steven J Zaloga has taken a fresh look at the tanks deployed in Spain, examining how future tanks and armored tactics were shaped and honed by the crews' experiences, and how Germany was able to benefit from these lessons while their Soviet opponents were not. Based on recently uncovered records of Soviet tankers in Spain and rare archival accounts, this book describes the various tanks deployed in Spain, including the PzKpfw I and the T-26.

PURPUREA Raffaele Carlucci,

Armoured Warfare and Hitler's Allies, 1941-1945 Anthony Tucker-Jones, 2013-07-19 This WWII pictorial history sheds light on the armored fighting vehicles built and deployed by Italy, Hungary and other Axis powers on the Eastern Front. In discussions of Second World War military vehicles, German, American and British tanks are given the most focus. Meanwhile, the tanks, self-propelled guns and armored cars built and deployed by Hitler's Axis allies, have been almost forgotten. Both the rarity of these fighting vehicles and the vital roles they played in battle make them a fascinating subject of photographic history. This selection of previously unpublished wartime photographs provides a visual record of the armored forces thrown into action by Hitler's allies on the Eastern Front from 1941 to 1945. Illustrated here are the panzers deployed by Bulgaria, Finland, Slovakia, Hungary, Italy and Romania on the Eastern Front and in the Balkans. Hungary's home-made armor included the Toldi and Turán tanks and Zrínyi self-propelled guns. The Italians produced CV-33 tankettes, Semovente self-propelled guns, Autoblinda and Lancia armored cars and a series of tanks. Romanian and Czech tanks and assault guns were also deployed.

Tanks Richard Ogorkiewicz, 2015-02-20 From an internationally acclaimed expert in the field comes a detailed, analytical and comprehensive account of the worldwide evolution of tanks, from their inception a century ago to the present day. With new ideas stemming from the latest academic research, this study presents a reappraisal of the development of tanks and their evolution during World War I and how the surge in technological development during World War II and the subsequent Cold War drove developments in armour in Europe and America, transforming tanks into fast, resilient and powerful fighting machines. From the primitive, bizarre-looking Mark V to the Matilda and from the menacing King Tiger to the superlative M1 Abrams, Professor Ogorkiewicz shows how tanks gradually acquired the enhanced capabilities that enabled them to become what they are today – the core of combined-arms, mechanized warfare.

The Wehrmacht Strikes Back Robert Walters, 2020-11-06 After shattering the French armies in a lightning blitzkrieg campaign, the Germans turn their attention on Gibraltar as part of their new Mediterranean or strategic policy, a concept based on overrunning Egypt, then moving east and south, capturing the Persian Gulf area, as well as all East Africa in an alliance with France. After moving their forces down through neutral Spain, they soon engage the powerful British fortress guarding the Strait of Gibraltar, long a symbol of British power and

Tanks of the Second World War Thomas Anderson,2017-01-31 This book lists all the important tanks used in the Second World War, both by the Allied (England, France, Russia and the USA) and Axis Powers (Germany, Italy and Japan). Thomas Anderson, an expert on the history of the Second World War, offers an in-depth volume detailing the vehicles, their use in battle and relevant technical specifications. This comprehensive survey is full of authentic eyewitness accounts as well as being profusely illustrated with many photographs having never been published before.

Mussolini, Mustard Gas and the Fascist Way of War Charles Stephenson,2024-03-30 In early October 1935 and without any declaration of war some two hundred thousand men, comprising soldiers and airmen of the Italian armed forces, Fascist 'Blackshirt' Militia, Eritrean ascari and Somali dubats, invaded the independent state of Ethiopia (Abyssinia). It was an operation entirely of choice, the chooser being Il Duce: Benito Mussolini. The resultant conflict is often described as a colonial war. while it was certainly launched with the intent of turning Ethiopia into an Italian possession, it was in fact a war of aggression against an independent, sovereign, state with membership of the League of Nations. A state that had, according to one of its nineteenth-century rulers, been 'for fourteen centuries a Christian island in a sea of pagans'. The swiftness of the Italian victory resulted from their possession and ruthless use of technology; most particularly aircraft, mustard gas, and motorisation/mechanisation. Since they were fighting an enemy who possessed none of these things, then they were able to wage, indeed inaugurate, what the prominent military theorist JFC Fuller dubbed 'totalitarian warfare' or, as it became known a few years later, total war. This, he opined, was the Fascist, the scientific, way of making war. In his considered view, the Fascist Army that waged it was 'a scientific military instrument.' This book examines that campaign in military and political terms.
