Santiago Levy Algazi

The Ottoman Empire, 1300-1650 Colin Imber, 2019-01-05

This highly-praised and authoritative account surveys the history of the Ottoman Empire from its obscure origins in the 14th century, through its rise to world-power status in the 16th century, to the troubled times of the 17th century. Going beyond a simple narrative of Ottoman achievements and key events, Colin Imber uses original sources and research, as well as the rapidly growing body of modern scholarship on the subject, to show how the Sultans governed their realms and the limits on their authority. A helpful chronological introduction provides the context, while separate chapters deal with the inner politics of the dynasty, the court and central government, the provinces, the law courts and legal system, and the army and fleet. Revised, updated and expanded, this new edition now also features a separate chapter on the Arab provinces and incorporates the most recent developments in the field throughout. New to this Edition: - An increased focus on religion, and on non-Muslim communities - More on the provinces and culture - An expanded taxation chapter, with more on charitable trusts, trade and the economy - Updated references throughout

Under-Rewarded Efforts Santiago Levy Algazi, 2018-07-11

Why has an economy that has done so many things right failed to grow fast? Under-Rewarded Efforts traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and simultaneously align entrepreneurs' and workers' incentives to raise productivity.

Economic and Demographic Change in Preindustrial

Japan, 1600-1868 Susan B. Hanley, Kozo Yamamura, 2015-03-08

According to the Marxist interpretation still dominant in Japanese studies, the last century and a half of the Tokugawa period was a time of economic and demographic stagnation. Professors Hanley and Yamamura argue that a more satisfactory explanation can be provided within the framework of modern economic theory, and they advance and test three important new hypotheses in this book. The authors suggest that the Japanese economy grew throughout the Tokugawa period, though slowly by modern standards and unevenly. This growth, they show, tended to exceed the rate of population increase even in the poorer regions, thus raising the living standard despite major famines. Population growth was controlled by a variety of methods, including abortion and infanticide, for the primary purpose of raising the standard of living. Contrary to the prevailing view of scholars, thus, the conclusions advanced here indicate that the basis for Japan's rapid industrialization in the Meiji period was in many ways already established during the latter part of the Tokugawa period. The authors' analysis combines original fieldwork with study of data based on findings of the postwar years. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Russia is a vivid reconstruction of life in one of the garrison towns built on Muscovy's southern steppe frontier in the early Seventeenth-century to defend against Tatar raids. It focuses on how the colonization process shaped power relations in a particular southern garrison community, both at the village level, within the land commune, and at the district level, between the general garrison community and the appointed officials representing state authority.
