Greenglow Ronald Evans,2015-04-28 This book describes an exciting, but unfinished scientific adventure story. It tells of the epic struggle by scientists to wrest the secrets from nature of how to control the force of electromagnetism and how to control aerodynamic forces. Control of the force of gravity has yet to be achieved. Analogies suggest where a breakthrough might be made. Greenglow & the search for gravity control follows the attempts mankind has made over the years to understand gravity as well as looking at more recent experiments to control it. The book is written by an engineer, who worked in the aerospace industry, and who persuaded BAE Systems to sponsor Project Greenglow, a small research programme aimed at investigating some ideas for controlling gravity. Based on analogies in nature, the book provides a road map for scientists, engineers and the general public who want to know more about gravity and our search to control it. Discovering nature's secrets is an exciting, but unfinished story – there is much we still don't know. The book describes the quest by scientists to gain control of gravity and electromagnetism, the two long-range forces of nature. Faraday discovered the secret of electromagnetic control. Newton began the search for gravity control, later continued by Einstein, but it eluded them. One day the secret will be discovered either by careful experimentation or, as is often the case, by stumbling across it by chance. In the future it is expected that gravity control will underpin a new method of propulsion and this book concludes with a look at some possible forms. Greenglow is a fascinating read for any aerospace engineers, physicists, experimental research scientists, science journalists, science historians, futurologists, UFO enthusiasts, Star Trekkies and general public interested in the breakthrough in understanding of how to control gravity.

Poem of the Man-God Volume 1 (The Gospel As Revealed to Me) Maria Valtorta,2021-07-29 Written between the years 1944 and 1947 by the visionary Maria Valtorta, The Poem of the Man-God (recently retitled in its original Italian to The Gospel As Revealed to Me) is considered one of the greatest works of private revelation to date. Penned in the same style as Ven. Anne Catherine Emmerich and Ven. Mary of Agreda, this work brings a level of detail and intimacy not found in the former's writings. Although it reads as a novel, it is regarded by many as one of the greatest commentaries on Scripture in history, expounding upon many areas of the New Testament that has, at present, remained unexplored or obscure. Most strikingly, it reveals the personalities of Jesus and His Apostles in awe-inspiring detail, and leaves the reader with a greater sense of love and closeness to the second Person of the Holy Trinity. In point of fact, this book moved Mother Teresa so much that she carried with her for spiritual reading, and recommended it, on numerous occasions, to those who asked about it. And when the children of Medjugorje asked Mary what She thought of the book, She said it was the truth and to read it if a person wants to know Jesus. Despite its controversial history with certain Vatican officials, in the final analysis, the verbal approval by pope Pius XII is more than sufficient for Catholics to read it in good conscience. For those who desire to know Jesus Christ in a more intimate and personal way, there is little else that compares to this work.
