Cruise Ships Peter C. Smith, 2014-03-31 Peter C. Smith presents us here with the second release in his visually splendid Cruise Ships series. Whilst his first book concerned itself with the large-scale ships currently cruising through our seas (those weighing 40,000 GT and more) this volume focusses on the other end of the market; the ships that weigh in at less than 40,000 GT, but which are often much more stylish and aesthetically pleasing than their larger-scale counterparts. The elegant interiors and luxurious features on display in today's vast fleet of cruise liners remain unrecorded in all but holiday brochures. This book carries on in the tradition of Peter's last release, giving a complete overview of the best of these ships, the cream of the crop, so to speak. Each colour profile includes external and interior views of the featured ship. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers. It serves as an impressive visual tribute to the best of the smaller scale fleet currently cruising globally. As seen in the Bedford Times & Citizen.

World Investment Report 2019 United Nations Conference on Trade and Development, 2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates

on investment treaties, their reform and investment dispute settlement cases.

The Offshore Drilling Industry and Rig Construction in the Gulf of Mexico Mark J

Kaiser, Brian F Snyder, 2013-08-23 Jackups, semisubmersibles and drillships are the marine vessels used to drill offshore wells and are referred to collectively as mobile offshore drilling units (MODUs). MODUs are supplied through newbuild construction and operate throughout the world in highly competitive regional markets. The Offshore Drilling Industry and Rig Construction Market in the Gulf of Mexico examines the global MODU service and construction industry and describes the economic impacts of rig construction in the United States. The industrial organization and major players in the contract drilling and construction markets are described and categorized. Dayrates in the contract drilling market are evaluated and hypotheses regarding dayrate factors are tested. Models of contractor decision-making are developed, including a net-present value model of newbuilding investment and stacking decisions, and market capitalization models are derived. Jackup construction shipyards and processes are reviewed along with estimates of labor, equipment, and material cost in U.S. construction. Derivation of newbuild and replacement cost functions completes the treatise. The comprehensive and authoritative coverage of The Offshore Drilling Industry and Rig Construction Market in the Gulf of Mexico makes it an ideal reference for engineers, industry professionals, policy analysts, government regulators, academics and other readers wanting to learn more about this important and fascinating industry.
