Looking Up Michele Sullivan, 2020-02-25 Imagine being born into a world where fitting in was never an option. Michele Sullivan, one of the most powerful women in philanthropy, was born with a rare form of dwarfism. Meaning she has spent her entire life looking up. As the first female president of the Caterpillar Foundation, she has used her unique point of view to impact countless lives around the world. As a child, Michele decided to live a life of meaning, by: Tailoring her differences into something more suitable for the world. Hiding from the world and live on the fringe. Embracing her differences to turn them into assets. Recognize that there was a strength within her that could help others. Looking Up is the story of how Michele became the smallest woman at the largest earth-moving manufacturer in the world. While her height has presented challenges that are different from most, it has allowed her to see things that others do not, literally and figuratively. Embedded in this narrative are unique (and often hilarious) takeaways for individuals about the importance of making the first move, being wrong at first, choosing intimacy over influence, and learning that asking for help is a strength, not a weakness.

**Fire Weather** John Vaillant, 2023-05-23 #1 NATIONAL BESTSELLER WINNER OF THE BAILLIE GIFFORD PRIZE FOR NONFICTION • FINALIST FOR THE HILARY WESTON WRITERS' TRUST PRIZE FOR NONFICTION • FINALIST FOR THE NATIONAL BOOK AWARD IN NONFICTION • ONE OF THE NEW YORK TIMES' TOP TEN BOOKS OF THE YEAR • A stunning account of the colossal wildfire at Fort McMurray, and a panoramic exploration of the rapidly changing relationship between fire and humankind from the award-winning, best-selling author of *The Tiger* and *The Golden Spruce*. Named a Best Book of the Year by *The Guardian* • *TIME* • *The Globe and Mail* • *The New Yorker* • *Financial Times* • *CBC* • *Smithsonian* • *Air Mail Weekly* • *Slate* • *NPR* • *Toronto Star* • *The Washington Post* • *The Times* • *Orion Magazine* In May 2016, Fort McMurray, the hub of Canada's petroleum industry and America's biggest foreign supplier, was overrun by wildfire. The multi-billion-dollar disaster melted vehicles, turned entire neighborhoods into firebombs, and drove 88,000 people from their homes in a single afternoon. Through the lens of this apocalyptic conflagration—the wildfire equivalent of Hurricane Katrina—John Vaillant warns that this was not a unique event but a shocking preview of what we must prepare for in a hotter, more flammable world. For hundreds of millennia, fire has been a partner in our

evolution, shaping culture, civilization, and, very likely, our brains. Fire has enabled us to cook our food, defend and heat our homes, and power the machines that drive our titanic economy. Yet this volatile energy source has always threatened to elude our control, and in our new age of intensifying climate change, we are seeing its destructive power unleashed in previously unimaginable ways. With masterly prose and a cinematic eye, Vaillant takes us on a riveting journey through the intertwined histories of North America's oil industry and the birth of climate science, to the unprecedented devastation wrought by modern forest fires, and into lives forever changed by these disasters. John Vaillant's urgent work is a book for—and from—our new century of fire, which has only just begun.

**Colossal Caterpillar : The Ultimate Earthmover** Eric C. Orlemann, This awe-inspiring collection covers the largest, top-of-the-line mining equipment in each of the manufacturer's five major classes; haulers, wheel loaders, hydraulic shovels, graders, and bulldozers. Design, development, and production histories are accompanied by the stories of these gargantuan machines in service, as well as details of the Herculean efforts required for their assembly. Incredible modern color photography from both the author and the Caterpillar archives provide shots of the equipment in action and production, not to mention detail shots to help explain their working componentry.

*Keeping Ontario Moving* Robert Bradford, 2015-05-09 A comprehensive history of roads and road-building in Ontario. In this beautifully illustrated book, virtually every facet of the road building industry in Ontario is discussed, from labour relations to safety, politics, and financing. Follow the history of road-building technology from the first crude trails hacked through dense forests by homesteaders to the corduroy roads, planks roads, stone roads, macadam pavements, hot mix asphalt pavements, and concrete roads. See how the engineering and construction of bridges has progressed from the first jack pine logs placed across a stream to the complex structures that span international waters and thousands of rivers today. Follow the development of construction equipment from the first steam shovels and cable-operated machines of the late 1800s to diesel-powered machines in the 1940s and later hydraulics. Meet the companies that made the equipment and the people who sold and rented it. From the 1930s forward the early story of roads is told largely by the people who lived and made the history. Over 120 contractors, engineers, government officials, and others were interviewed and the last eighty years of the industry's history unfolds in the way they remember it. Share their memories and stories, some hilarious and some tragic, as they talk about their projects, their businesses, their successes, and their hardships.

**The New California Wine** Jon Bonné, 2013-11-05 A comprehensive guide to the must-know wines and producers of California's new generation, and the story of the iconoclastic young winemakers who have changed the face of California viniculture in recent years. The New California Wine is the untold story of the California wine industry: the young, innovative producers who are rewriting the rules of contemporary winemaking; their quest to express the uniqueness of California terroir; and the continuing battle to move the state away from the overly-technocratic, reactionary practices of its recent past. Jon Bonné writes from the front lines of the California wine revolution, where he has access to the fascinating

stories, philosophies, and techniques of top producers. Part narrative, part authoritative purchasing reference, *The New California Wine* is a necessary addition to any wine lover's bookshelf.

**This Side of Night** J. Todd Scott,2020-05-05 The vicious Mexican cartel war boils over into the Big Bend in the explosive novel from the author of *The Far Empty* and *High White Sun*. In the Mexican borderlands, a busload of student protesters is gunned down in broad daylight, a violent act blamed on the Nemesio cartel. But its aging leader, Fox Uno, sees the attack for what it is: another salvo in the long-running battle for control of Nemesio itself; perhaps by a rival cartel, or maybe someone closer to home... Across the Rio Grande, Sheriff Chris Cherry and his deputies America Reynosa and Danny Ford find themselves caught in Fox Uno's escalating war with the recent discovery of five dead men at the river's edge. But when El Paso DEA agent Joe Garrison's own Nemesio investigation leads him into the heart of the Big Bend, he's not ready to accept the cartel leader's retreat or defeat. Not only does he suspect a high-profile drug task force in a neighboring county is corrupt, he can't shake lingering doubts about the loyalty and motives of the young deputy, Ame Reynosa. And he won't let Sheriff Cherry ignore them either. In this pitiless land it's kill or be killed, where everyone will make one final bloody stand to decide the fate of Nemesio, the law in the Big Bend, and most of all, the future of America Reynosa.

**Lost River** J. Todd Scott,2021-06-29 A blistering crime novel of the opioid epidemic--and its cops, villains, and victims--written by a twenty-five-year veteran of the DEA. Angel, Kentucky: Just another one of America's forgotten places, where opportunities vanished long ago, and the opioid crisis has reached a fever pitch. When this small town is rocked by the vicious killing of an entire infamous local crime family, the bloody aftermath brings together three people already struggling with Angel's drug epidemic: Trey, a young medic-in-training with secrets to hide; Special Agent Casey Alexander, a DEA agent who won't let the local law or small-town way of doing things stand in her way; and Paul Mayfield, a former police chief who's had to watch his own young wife succumb to addiction. Over the course of twenty-four hours, loyalties are tested, the corrupt are exposed, and the horrible truth of the largest drug operation in the region is revealed. And though Angel will never be the same again, a lucky few may still find hope.

**The Patch** Chris Turner,2017-09-19 Bestselling author Chris Turner brings readers onto the streets of Fort McMurray, showing the many ways the oilsands impact our lives and demanding that we ask the question: In order to both fuel the world and to save it, what do we do about the Patch? In its heyday, the oilsands represented an industrial triumph and the culmination of a century of innovation, experiment, engineering, policy, and finance. Fort McMurray was a boomtown, the centre of a new gold rush, and the oilsands were reshaping the global energy, political, and financial landscapes. The future seemed limitless for the city and those who drew their wealth from the bitumen-rich wilderness. But in 2008, a new narrative for the oilsands emerged. As financial markets collapsed and the scientific reality of the Patch's effect on the environment became clear, the region turned into a boogeyman and a lightning rod for the global movement combatting climate change. Suddenly, the streets of Fort McMurray were the front line of a high-stakes collision between two conflicting worldviews—one of industrial triumph and another of environmental stewardship—each backed by major players on the world stage. The Patch is the seminal account of this ongoing conflict, showing just how far the oilsands reaches into all of our lives. From Fort Mac to the Bakken shale country of North Dakota, from Houston to London, from Saudi Arabia to the shores of Brazil, the whole world is connected in this enterprise. And it requires us to ask the question: In order to both fuel the world and to save it, what do we do about the Patch?
