A House Divided Nicole Ciacchella, The first book in the epic suspenseful romantic fantasy Astoran Asunder series. Contains mature content. Cianne Wyland leads a double life. No one in House Staerleigh would suspect that the meek woman on whom they heap their disdain is a gatherer of secrets. Determined to uncover whether the House's upper echelon—including her own father—are engaging in illicit activities in a grasp for control of the House, Cianne has made an art of slipping into their homes to rifle through their private lives. Kila an Movis is an Enforcer. Gods-gifted with an extraordinary ability to piece together physical clues, he's entrusted with protecting the vulnerable from crime. But his habit of expressing his opinions a little too freely earned him a nine-year banishment to the wilds, and he's determined to be more circumspect upon his return to the trade city. When someone close to Cianne dies and Kila is called out to investigate the scene, her world and his collide once more. His long absence hasn't driven the memory of him from her heart, but the woman he encounters isn't the child he remembers. Unwilling to trust anyone else, Cianne enlists Kila's help. The deeper they dig, the more secrets they unearth about her father, the other House members, and her entire life—until Cianne discovers that House Staerleigh is built on a foundation of lies.

Ice Age Cave Faunas of North America Blaine W. Schubert,Jim I. Mead,Russell William Graham,Denver Museum of Nature and Science,2003-11-10 This book gathers the findings of a number of studies on North American cave paleontology. Although not intended to be all-inclusive, Ice Age Cave Faunas of North America contains contributions that range from overviews of the significance of cave fossils to reports about new localities and studies of specific vertebrate groups. These essays describe how cave remains record the evolutionary patterns of organisms and their biogeography, how they can help reconstruct past ecosystems and climatic fluctuations, how they provide an important record of the evolution of modern ecosystems, and even how some of these caves contain traces of human activity. The book's eclectic nature should appeal to students, professional and amateur paleontologists, biologists, geologists, speleologists, and cavers. The contributors are Ticul Alvarez, Joaquin Arroyo-Cabrales, Christopher J. Bell, Larry L. Coats, Jennifer Glennon, Wulf Gose, Frederick Grady, Russell Wm. Graham, Timothy H. Heaton, Carmen J. Jans-Langel, Ernest L. Lundelius, Jr., H. Gregory McDonald, Jim I. Mead, Oscar J. Polaco, Blaine W. Schubert, Holmes A. Semken, Jr., and Alisa J. Winkler.

Caves and Karst of the Greenbrier Valley in West Virginia William B. White, 2017-11-20

The focus of this book is on the more than 2000 caves of the Greenbrier Valley of West Virginia of which the 14 with lengths greater than 10 km have an aggregate length of 639 km. The major caves form the core part of sub-basins which drain to big springs and ultimately to the Greenbrier River. Individual chapters of this book describe each of the major caves and its associated drainage basin. The caves are formed in the Mississippian Greenbrier Limestone in a setting of undulating gentle folds. Fractures, lineaments and confining layers within the limestone are the main controlling factors. The caves underlie an extensive sinkhole plain which may relate to a major erosion surface. The caves are habitat for both aquatic and terrestrial organisms which are cataloged and described as are the paleontological remains found in some of the caves. The sinkhole plain of the Greenbrier karst and the underlying complex of cave systems are the end result of at least a ten million year history of landscape evolution which can be traced through the evolving sequence of cave passages and which is described in this book.
