CCTV Inga Kroener,2016-04-08 Central state and non-covert surveillance began in earnest at the start of the twentieth century. By the start of the twenty-first century, the UK was one of the most surveilled societies on earth. This groundbreaking volume by Inga Kroener analyses the particular combination of factors that have created this surveillance state. Kroener argues against the inevitability of the rise of CCTV that is so often found in this literature, to map out the early history of CCTV, tracing its development from a tool for education, safety and transport during the 1950s, to one of politics in the 1970s and 1980s, to eventually become a tool of surveillance during the 1990s. Within this analysis, the complex role of the public in 'allowing' the widespread and rapid dissemination of CCTV is discussed and the representation of CCTV in the media is also studied. This volume will be of interest to all scholars working in the fields of surveillance studies; science, technology and society departments; and social historians more generally.

Setting the Watch Beatrice von Silva-Tarouca Larsen,2011-01-28 Many liberals consider CCTV surveillance in public places - particularly when it is as extensive as it is in England - to be an infringement of important privacy-based rights. An influential report by the House of Lords in 2009 also took this view. However there has been little public, or academic, discussion of the underlying principles and ethical issues. What rights of privacy or anonymity do people have when abroad in public space? What is the rationale for these rights? In what respect does CCTV surveillance compromise them? To what extent does the state's interest in crime prevention warrant encroachment upon such privacy and anonymity rights? This book offers the first extended, systematic treatment of these issues. In it, the author develops a theory concerning the rationale for the entitlement to privacy and anonymity in public space, based on notions of liberty and dignity. She examines how CCTV surveillance may compromise these rights, drawing on everyday conventions of civil inattention among people in the public domain. She also considers whether and to what extent crime-control concerns could justify overriding these entitlements. The author's conclusion is that CCTV surveillance should be appropriate only in certain restrictively-defined situations. The book ends with a proposal for a scheme of CCTV surveillance that reflects this conclusion.

Surveillance Practices and Mental Health Suki Desai,2021-12-30 This book examines how CCTV cameras expose the patient body inside the mental health ward, especially the relationship between staff and patients as surveillance subjects. A key aspect of the book is that existing surveillance literature and mental health literature have largely ignored the influence of CCTV cameras on patient and staff experiences inside mental health wards. Research findings for this book suggest that camera use inside mental health wards is based on a perception of the violent nature of the mental health patient. This perception not only influences ethical mental health practice inside the ward but also impacts how patients experience the ward. It is not known how and why CCTV camera use has expanded to its uses inside mental health wards. These include not only communal areas of the ward but also patient bedrooms. The research, therefore, examines how and why camera technology was introduced inside three Psychiatric Intensive Care Mental Health Units located in England, UK. Aimed at both undergraduate and postgraduate students, this book will appeal to sociology, mental health, and surveillance studies students, as well as practitioners in mental health nursing, caseworkers and social caregivers.

CCTV and Policing Benjamin Jervis Goold,2004 This text presents a comprehensive assessment of the impact of CCTV on the police in Britain. The volume examines how the police in Britain first became involved in public area surveillance and how they have since attempted to use CCTV technology to prevent, respond to, and investigate crime.

CCTV Vlado Damjanovski,2013-09-23 The new edition of CCTV, a high-level professional reference, is expanded to cover all video compression techniques used in the ever-increasing assortment of digital video recorders (DVRs) available on the market today. In addition to demystifying DVR technology, the third edition also clarifies the technology of data networking and explains various compression techniques. Along with all this, the book retains the particulars that made the previous editions convenient and valuable, including details of CCD cameras, lenses, coaxial cables, fiber-optics, and system design. Updated to address digital techniques, networking, and the Internet in closed-circuit television Includes brand new sections on CCTV networking, digital video recorders (DVRs), various video compression techniques, and understanding pixels and digital image quality Fully illustrated with dozens of photographs, tables, checklists, charts, diagrams, and instructions

CCTV for Security Professionals Alan Matchett,2002-12-23 CCTV for Security Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. * Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. * Establishes a common language

for security professionals, CCTV system designers and sales personnel to use as a basis for system design. * Provides a clear explanation of the design process and design principles.

Digital CCTV Emily M. Harwood, 2007-07-31 The effects of digital technology on the security industry require constant vigilance by security distributors, sales staff, and installation professionals. Today and for the foreseeable future, all security professionals must have at least a basic understanding of digital technology. Digital CCTV addresses this new challenge. Topics covered include compression variables such as Lossless and Lossy, which are explained by reviewing Huffman and Run Length Encoding (RLE), and by relating these forms of compression to ZIP and Stuffit, which are commonly used in personal computers. A review of JPEG, motion JPEG, MPEG and wavelet compression schemes among others, with a comparison of the merits of each, is also provided. As Digital CCTV traces the stream of digital video flow from the computer industry through compression, transmission, display and storage, and explains how analog video signal is converted into a digital signal, the reader will learn and understand the mysteries of digital science. * Explains industry concepts, acronyms and buzzwords accurately and clearly * Covers history, current complexities, and the future effects of digital science * Provides practical information about how digital video works, how digital video is stored and transmitted, what digital systems can and cannot accomplish, and what to expect from digital video equipment in modern CCTV systems

The Maximum Surveillance Society Gary Armstrong, Clive Norris, 2020-12-17 The use of Closed-Circuit Television, or CCTV, has dramatically increased over the past decade, but its presence is often so subtle as to go unnoticed. Should we unthinkingly accept that increased surveillance is in the public's best interests, or does this mean that 'Big Brother' is finally watching us? This book asks provocative questions about the rise of the maximum surveillance society. Is crime control the principal motivation behind increased surveillance or are the reasons more complex? Does surveillance violate peoples' right of privacy? Who gets surveilled and why? What are its implications for social control? Does surveillance actually reduce crime? What will developments in technology mean for the future of surveillance? What rights do individuals under surveillance have? How is the information gathered through CCTV used by the authorities? Based on extensive fieldwork on automated surveillance in Britain over a two-year period, this book not only attempts to answer these vexing questions, but also provides a wealth of detailed information about the reasoning behind and effects of social control.

Surveillance, Closed Circuit Television and Social Control Clive Norris, Jade Moran, 2016-12-05 The rise of CCTV camera surveillance in Britain has been dramatic. Practically every major city now boasts a CCTV system aimed at, among other things, preventing, detecting and reducing the fear of crime. Increasingly these developments are mirrored in villages, shopping malls, residential estates, transport systems, schools and hospitals throughout the country. In short, for the majority of citizens it is now impossible to avoid being monitored and recorded as we move through public space. Surveillance, CCTV and Social Control represents the first systematic attempt to account for this phenomenon. It brings together leading researchers from the fields of anthropology, criminology, evaluation, geography, sociology and urban planning to explore the development, impact and implications of CCTV surveillance. Accordingly attention is

directed to a number of key questions. How does CCTV fit with the trends of late modernity? Does CCTV reduce crime or merely shift it elsewhere? How should CCTV be evaluated? What is the significance of CCTV for women's safety? How adequate is the regulation of CCTV? In the light of recent technological developments what is the future of CCTV surveillance?

Cctv to Prevent Crime? Susanne Grolle, 2009-06 Essay from the year 2008 in the subject Sociology - Law, Delinquency, Abnormal Behavior, grade: 2.0, University of Münster, course: Experiencing the city, language: English, abstract: The appearance of surveillance cameras in public areas in the UK (streets, parks, car parks, shopping malls etc) is obvious to everyone using these kinds of spaces. They are used to watch people's activities and behaviour and, if necessary react towards crime or anti-social behaviour. The UK is by far the most advanced country in Europe in regards to public surveillance research and installation. In the last decade the coverage has grown dramatically. In 1990 there were three town centre schemes with approximately 100 cameras and in 2002 there were approximately 500 schemes with around 40,000 cameras. The impression can be made that it is used as a general tool to prevent crime and promote a safer and cleaner community. But is it as effective as it promises to be and to what extent does it effect people's perception and activity in neighbourhoods and cities? To what extent does CCTV influences the urban designer work? What needs to be considered when implementing CCTV in existing and new developments? This paper will help to understand the complexity of this question and issues related with its context. One approach to the topic lays in the question: Why do people feel scared and insecure in public areas? The 'fear of crime' has become an important issue to consider within urban design and town planning. Being afraid of being a victim of crime can be positive if it leads to increased crime prevention, but it can also affect people's quality of life in a negative way. This fear gets projected on the appearance of places and their users which lead towards banning beggars and on-street traders. In the argument about public surveillance, it is often mentioned that constant camera monitoring is reducing this 'fear of crime'.

CCTV Vlado Damjanovski, 2005-08-04 Closed circuit television (CCTV) is experiencing a leap in technology using digital techniques, networking and the Internet. The new edition of this high-level professional reference retains the particulars that made the first edition a success, including the details of CCD cameras, lenses, coaxial cables, fiber-optics, and system design, but it is expanded to cover all video compression techniques used in the ever increasing assortment of digital video recorders (DVRs) available on the market today. This new edition of the book CCTV demystifies DVR technology. It also serves to clarify the technology of data networking. The theoretical section explains the various compression techniques. Networking is also a new and unknown area for many CCTV installers and this is explained in a brand new section. New edition more accessible

The Surveillance Web Mike McCahill, 2013-01-11 The rise of CCTV and surveillance technologies has been one of the key developments in contemporary society, but its impact has often been analysed in a fragmented manner. This book addresses this issue by providing a detailed, micro-sociological account of the construction of a CCTV network in one English city. It differs from previous studies (which have concentrated on open street CCTV systems) in documenting and analysing the use of visual surveillance systems in a number of different locations and institutional settings, including the industrial workplace, shopping malls, high-rise housing schemes, and hospitals. It is concerned not just with abstract categories of 'grand theory' but seeks to explain how people living in contemporary society experience these changes. The Surveillance Web situates the growth of visual surveillance systems in the context of many of the key concerns of theorists of modernity, and makes a key contribution to understanding the nature of the relationship between surveillance and society. Its starting point is to view the relationship

between surveillance and society as a two way process: the book looks at both the social impact of visual surveillance systems, and at how the impact of these technologies is shaped by existing social relations, political practice and cultural traditions. provides a richly textured account and analysis of the introduction of visual surveillance technologies (CCTV) in an English city explores the impact of the introduction and use of visual surveillance systems in a wide variety of locales and institutional settings, both public and private makes a key contribution to theoretical debates over the relationship between surveillance systems and society, one of the central concerns of theorists of modernity

Effectiveness of CCTV in Crime Prevention Peterson Kelly, 2014-09-22 Essay from the year 2012 in the subject Information Management, grade: A, University of Cambridge, language: English, abstract: Closed-circuit television utilizes video cameras in surveillance of a particular area using a limited number of surveillance monitors. Almost all video cameras fit in the usage as the CCTV cameras, although the ones used must have high definition for accuracy in monitoring mainly in banks, supermarkets, casinos, airports, military institutions, and convenience stores. In most cases, the cameras function in deterring crime from occurrence and minimizing the levels in places where it cannot stop completely. According to Jewitt (2007), in many parts of America, Europe, and Asia, CCTV surveillance proved one of the best ways of crime prevention as the criminal cases decreased proportionately as more of the cameras came into existence. However, the comfort from their use lasted no long s the people soon went back to the old ways. Old crimes started to resurface thus a good number of people began to lose faith in the cameras. This paper evaluates how effectively CCTV can help deal with the criminal cases with the goal of determining the relevance and benefits of their application and use. On one front, CCTV does a great job in prevention and reduction of the criminal activities committed throughout the economy. However, paradoxically, there are factors that reduce the effectiveness of the cameras. The surveillance prevents crime to high levels due to various factors. First, the cameras provide evidence of crime hence it deems easier to track the criminals (Murphy, 1999 p. 396). Previously, proving crimes presented some of the greatest challenges to the courts in many countries thus many criminals did not face any charges for their crimes, which encouraged more crimes. However, security surveillance changed the whole game and as long as they installed them on scene before the occurrence of the crime, evidence tracking deems more specific and reliable due to the unity of direction in investigations. In tests for their efficiency, the cameras reduced theft and general crimes in the casinos and the parking lots in the United Kingdom by over 51% thus they proved efficient in crime prevention. The few people attempting crime with the cameras find themselves in court with clear evidence of their acts and mostly get conviction. [...]

Closed Circuit Television Joe Cieszynski, 2006-12-28 Closed Circuit Television (CCTV) surveillance remains a growing industry in response to increased security threats, and whilst new developments have brought clearer images, digital recording and high speed data transmission, effective security systems still rely upon proper specification and installation by engineers with an in depth knowledge of CCTV principles and technology. Surveillance, Closed Circuit Television, and Social Control Clive Norris, Jade Moran, Gary Armstrong, 1998 There are now thousands of CCTV surveillance cameras monitoring public space in British cities. Surveillance, CCTV and Social Control explores the social and criminological implications of the rise of the mass surveillance society.

Eyes Everywhere Aaron Doyle, Randy Lippert, David Lyon, 2013-03-01 In many countries camera surveillance has become commonplace, and ordinary citizens and consumers are increasingly aware that they are under surveillance in everyday life. Camera surveillance is typically perceived as the archetype of contemporary surveillance technologies and processes. While there is sometimes fierce debate about their introduction, many others take the cameras for granted or even applaud their deployment. Yet what the presence of surveillance cameras actually achieves is still very much in question. International evidence shows that they have very little effect in deterring crime and in 'making people feel safer', but they do serve to place certain groups under greater official scrutiny and to extend the reach of today's 'surveillance society'. *Eyes Everywhere* provides the first international perspective on the development of camera surveillance. It scrutinizes the quiet but massive expansion of camera surveillance around the world in recent years, focusing especially on Canada, the UK and the USA but also including less-debated but important contexts such as Brazil, China, Japan, Mexico, South Africa and Turkey. Containing both broad overviews and illuminating case-studies, including cameras in taxi-cabs and at mega-events such as the Olympics, the book offers a valuable oversight on the status of camera surveillance in the second decade of the twenty-first century. The book will be fascinating reading for students and scholars of camera surveillance as well as policy makers and practitioners from the police, chambers of commerce, private security firms and privacy- and data-protection agencies.
