Evliya Çelebi in Bitlis Dankoff,2023-11-27 In 1655 and 1656 Evliya Celebi found himself three different times in the eastern Anatolian town of Bitlis, the center of a quasi-independent Kurdish khanate having a long and tumultuous relationship with the Ottoman state. The account of Evliya's adventures in Bitlis, including a major expedition against the khan mounted by Evliya's patron Melek Ahmed Pasha, the Ottoman governor of Van, forms a coherent narrative which deserves to be studied on its own. The centerpiece of the book is a critical edition of three long extracts, amounting to forty-three folios of the autograph ms., from volumes IV and V of the Seyahat- name, along with an annotated English translation on facing pages. The introduction discusses the narratological, historical, and linguistic aspects of the text, and there is a complete index of proper names.

Cemberlitas Hamami in Istanbul Nina Macaraig,2018-11-14 Bathhouses (hamams) play a prominent role in Turkish culture, because of their architectural value and social function as places of hygiene, relaxation and interaction. Continuously shaped by social and historical change, the life story of Mimar Sinan's Cemberlitas HamamA in Istanbul provides an important example: established in 1583/4, it was modernized during the Turkish Republic (since 1923) and is now a tourist attraction. As a social space shared by tourists and Turks, it is a critical site through which to investigate how global tourism affects local traditions and how places provide a nucleus of cultural belonging in a globalized world. This original study, taking a biographical approach to tell the story of a Turkish bathhouse, contributes to the fields of Islamic, Ottoman and modern Turkish cultural, architectural, social and economic history.

An Ottoman Mentality Robert Dankoff,2006-05-01 In his huge travel account, Evliya Çelebi provides materials for getting at Ottoman perceptions of the world, not only in areas like geography, topography, administration, urban institutions, and social and economic systems, but also in such domains as religion, folklore, sexual relations, dream interpretation, and conceptions of the self. In six chapters the author examines: Evliya's treatment of Istanbul and Cairo as the two capital cities of the Ottoman world; his geographical horizons and notions of tolerance; his attitudes toward government, justice and specific Ottoman institutions; his social status as gentleman, character type as dervish, office as caller-to-prayer and avocation as traveller; his use of various narrative styles; and his relation with his audience in the two registers of persuasion and amusement. An Afterword situates Evliya in relation to other intellectual trends in the Ottoman world of the seventeenth century.

Seismic Structural Health Monitoring Maria Pina Limongelli,Mehmet Çelebi,2019-04-24 This book includes a collection of state-of-the-art contributions addressing both theoretical developments in, and successful applications of, seismic structural health monitoring (S2HM). Over the past few decades, Seismic SHM has expanded considerably, due to the growing demand among various stakeholders (owners, managers and engineering professionals) and researchers. The discipline has matured in the process, as can be seen by the number of S2HM systems currently installed worldwide. Furthermore, the responses recorded by S2HM systems hold great potential, both with regard to the management of emergency situations and to ordinary maintenance needs. The book's 17 chapters, prepared by leading international experts, are divided into four major sections. The first comprises six chapters describing the specific requirements of S2HM systems for different types of civil structures and infrastructures (buildings, bridges, cultural heritage, dams, structures with base isolation devices) and for monitoring different phenomena (e.g. soil-structure interaction and excessive drift). The second section describes available methods and computational tools for data processing, while the third is dedicated to hardware and software tools for S2HM. In the book's closing section, five chapters report on state-of-the-art applications of S2HM around the world.

Ottoman Explorations of the Nile Robert Dankoff,Nuran Tezcan,Michael D. Sheridan,2018-02-15 Before the time of Napoleon, the most ambitious effort to explore and map the Nile was undertaken by the Ottomans, as attested by two monumental documents: an elaborate map, with 475 rubrics, and a lengthy travel account. Both were achieved at about the same time—c. 1685—and both by the same man. Evliya Çelebi's account of his Nile journeys, in the tenth volume of his Book of Travels (Seyahatname), has been known to the scholarly world since 1938, when that volume was first published. The map, held in the Vatican Library, has been studied since at least 1949. Numerous new critical editions of both the map and the text have been published over the

years, each expounding upon the last in an attempt to reach a definitive version. The Ottoman Explorations of the Nile provides a more accurate translation of the original travel account. Furthermore, the maps themselves are reproduced in greater detail and vivid color, and there are more cross-references to the text than in any previous edition. This volume gives equal weight and attention to the two parts that make up this extraordinary historical document, allowing readers to study the map or the text independently, while also using each to elucidate and accentuate the details of the other.
