Editing Humanity Kevin Davies,2020-10-06 One of the world's leading experts on genetics unravels one of the most important breakthroughs in modern science and medicine. If our genes are, to a great extent, our destiny, then what would happen if mankind could engineer and alter the very essence of our DNA coding? Millions might be spared the devastating effects of hereditary disease or the challenges of disability, whether it was the pain of sickle-cell anemia to the ravages of Huntington's disease. But this power to "play God" also raises major ethical questions and poses threats for potential misuse. For decades, these questions have lived exclusively in the realm of science fiction, but as Kevin Davies powerfully reveals in his new book, this is all about to change. Engrossing and page-turning, *Editing Humanity* takes readers inside the fascinating world of a new gene editing technology called CRISPR, a high-powered genetic toolkit that enables scientists to not only engineer but to edit the DNA of any organism down to the individual building blocks of the genetic code. Davies introduces readers to arguably the most profound scientific breakthrough of our time. He tracks the scientists on the front lines of its research to the patients whose powerful stories bring the narrative movingly to human scale. Though the birth of the "CRISPR babies" in China made international news, there is much more to the story of CRISPR than headlines seemingly ripped from science fiction. In *Editing Humanity*, Davies sheds light on the implications that this new technology can have on our everyday lives and in the lives of generations to come.

The respective contributions cover a wide range of industries, including banking, pharmaceuticals, and airline business services, and present both theoretical and empirical studies that highlight economy-wide risks and opportunities for European companies. The book is divided into four parts, the first of which provides a critical assessment of the competitiveness and performance of European companies, while the second examines decision-making approaches at financial institutions; the third and fourth parts address the macroeconomic risks and opportunities for business development in Europe. Intended for scholars, political decision-makers, and practitioners, the book offers new perspectives on Central and Southeast European financial and business research.

Public Management and the Metagovernance of Hierarchies, Networks and Markets Louis Meuleman,2008-04-03 Public managers can, to a certain extent, choose between various management paradigms which are provided by public and business administration scholars and by politicians as well. How do they find their way in this confusing supermarket of competing ideas? This book explores how public managers in Western bureaucracies deal with the mutually undermining ideas of hierarchical, network and market governance. Do they possess a specific logic of action, a rationale, when they combine and switch between these governance styles? This chapter sets the scene for the book as a whole and presents the research topic and the research question. 1.1 Problem setting Since the Second World War, Western public administration systems have changed drastically. The hierarchical style of governing of the 1950s to the 1970s was partly replaced by market mechanisms, from the 1980s onwards. In the 1990s, a third style of governing, based on networks, further enriched the range of possible steering, coordination and organisation interventions. In the new millennium, public sector organisations seem to apply complex and varying mixtures of all three styles of what we will define as governance in a broad sense. This development has brought about two problems.

The Management of Technical Change A. Booth,2006-11-14 This book examines the management of technical change in manufacturing and services through an explicit political-economic framework. It examines the management of automation in Britain and America since 1950, and it applies the same useful framework to explore the impact of Japanization on both Britain and the US in the 1980s and 1990s.

Alignment and Alignment Change in the Indo-European Family Eystein Dahl,2022-08-26 This volume brings together work from leading specialists in Indo-European languages to explore the macro- and micro-dynamic factors that contribute to variation and change in alignment and argument realization. Alignment is taken to include both basic alignment patterns associated with major construction types, as well as various valency-decreasing constructions such as passives, anticausatives, and impersonals. The chapters explore synchronic and diachronic aspects of alignment morphosyntax based on data from Anatolian, Indo-Iranian, Greek, Italic, Armenian, and Slavic. All have a strong empirical focus, drawing on both qualitative and quantitative methods, and range from broad comparative studies to detailed investigations of specific constructions in individual languages. The book is one of very few studies to examine variation and change in alignment typology across languages in a single family. It contributes to a greater understanding of the roles played by analogy/extension, reanalysis, and areal factors in alignment change, and demonstrates the extent of variation found in the morphosyntax of argument realization in genetically-related languages.

Climate Change and American Policy John R. Burch, Jr.,2016-08-04 Climate change has long been a contentious issue, even before its official acknowledgment as a global threat in 1979. Government policies have varied widely, from Barack Obama's dedication to environmentalism to George W. Bush's tacit minimizing of the problem to Republican officials' refusal to acknowledge the scientific evidence supporting anthropogenic climate change. Presented chronologically, this collection of important policy-shaping documents shows how the views of both advocates and deniers of climate change have developed over the past four decades.

Trapdoor Vixen Phillips,2020-03-31 Raven De Winter: loner, loser, poet with a razor blade, trapped in a tormented relationship for the sake of his

young son. Pegasus Belmont: melancholy dreamer, haunted by the smile of his dead mother, silver wings tattooed on his shoulder blades like a wish. Both have their own secrets, their own reasons for trying to deny the intensity of their feelings for one another, but how long can this charade really last? Set amid the smoke-filled bars and rainy back streets of late 90s Melbourne, Trapdoor is a love story whispered to the heart of a lonely night; a contemporary, dark + lyrical new-adult novel featuring queer characters, written by Vixen Phillips. Sometimes, if you wish hard enough, dreams can come true, even if you should wake to find them gone like shadows in the morning. And soon, it will be dawn...
