Ivory Vikings: The Mystery of the Most Famous Chessmen in the World and the Woman Who Made Them Nancy Marie Brown,2015-09-01 In the early 1800's, on a Hebridean beach in Scotland, the sea exposed an ancient treasure cache: 93 chessmen carved from walrus ivory. Norse netsuke, each face individual, each full of quirks, the Lewis Chessmen are probably the most famous chess pieces in the world. Harry played Wizard's Chess with them in Harry Potter and the Sorcerer's Stone. Housed at the British Museum, they are among its most visited and beloved objects. Questions abounded: Who carved them? Where? Nancy Marie Brown's Ivory Vikings explores these mysteries by connecting medieval Icelandic sagas with modern archaeology, art history, forensics, and the history of board games. In the process, Ivory Vikings presents a vivid history of the 400 years when the Vikings ruled the North Atlantic, and the sea-road connected countries and islands we think of as far apart and culturally distinct: Norway and Scotland, Ireland and Iceland, and Greenland and North America. The story of the Lewis chessmen explains the economic lure behind the Viking voyages to the west in the 800s and 900s. And finally, it brings from the shadows an extraordinarily talented woman artist of the twelfth century: Margret the Adroit of Iceland.

Having left behind his adult life in Edinburgh--including his wife and his career in the police force--the former Detective Inspector is intent on repairing past relationships and restoring his parents' derelict cottage. His plans are interrupted when an unidentified corpse is recovered from a Lewis peat bog. The only clue to its identity is a DNA match to a local farmer, the now-senile Tormod Macdonald--the father of Fin's childhood sweetheart, Marsaili--a man who has claimed throughout his life to be an only child, practically an orphan. **The Lewis Chessmen** Irving Finkel,Clive Hodgson,2014-03-03 The Lewis Chessmen were found on the Isle of Lewis in mysterious circumstances.

Consisting of elaborately worked walrus ivory and whales teeth in the form of seated kings and queens, bishops, knights, warders and pawns, this curious chess set is strongly influenced by Norse culture. Of the 93 pieces known to us today, 11 pieces are in Edinburgh at the National Museum of Scotland, and 82 are in the British Museum, where they have delighted generations of visitors with their wonderfully expressive details. In this engaging story, Irving Finkel follows the many adventures of the chessmen after they came to light on a Scottish beach in the nineteenth century. It ends with the big surprise that befell them in September 1993, when they were all temporarily reunited for the first time since their separation, at a Special Exhibition of Chessmen at the British Museum.

The Lewis Chessmen James Robinson,2004 The Lewis chessmen were found hidden on the Isle of Lewis, Scotland, in the early nineteenth century. Probably made in Norway around AD 1150-1200, they consist of elaborately worked walrus ivory in the forms of seated kings and queens, mitred bishops, knights on their mounts, standing warders and pawns. This book takes a look at the many theories surrounding the ownership of the pieces, why they were hidden and how exactly they were discovered, and places them in the wider context of the ancient game of chess and secular culture of the Middle Ages.

But when they journey to the ramshackle mansion, they make a horrifying discovery.
