Okinawan-English Wordbook Mitsugu Sakihara,2006-06-30 The Okinawan-English Wordbook, written by the late Mitsugu Sakihara, historian and native speaker of the Naha dialect of Okinawa, is an all-new concise dictionary of the modern Okinawan language with definitions and explanations in English. The first substantive Okinawan-English lexicon in more than a century, it represents a much-needed addition to the library of reference materials on the language. The Wordbook opens to lay user and linguist alike an area heretofore accessible almost exclusively in Japanese works and adds to the general body of scholarship on various Ryukyuan languages and dialects by providing a succinct but comprehensive picture of modern colloquial Okinawan. The current work comprises nearly 10,000 entries, many with encyclopedic discussion, drawn from a wide variety of sources in addition to the author's native knowledge and from numerous areas of interest, with emphasis on the cultural traditions of Okinawa. Entries reflect both contemporary Naha usage and archaisms and areal variants when these are of cultural, historical, or linguistic interest. Thus, in addition to being a comprehensive portrait of the modern Okinawan language, the Wordbook serves as an implicit introduction to the rich field of Japanese dialect studies. Prefatory material discusses the phonology of Okinawan and the romanization scheme employed in the book, with particular attention to phonological features of the language likely to be unfamiliar to native English speakers and those acquainted only with Japanese. A general introduction to the conjugation of verbs and adjectives in Okinawan is made as well.

The Bride was a Boy Chii,2018-05-01 ' Drawn in the style of diary comics with an upbeat, adorable

Her story starts with her childhood and follows the ups and downs of exploring her sexuality, gender, and transition--as well as falling in love with a man who's head over heels for her. Now they want to get married, so Chii's about to embark on a new adventure: becoming a bride! '

Striving With Grace Aaron J Kleist, 2008-11-29 The question of whether or not our decisions and efforts make a difference in an uncertain and uncontrollable world had enormous significance for writers in Anglo-Saxon England. *Striving with Grace* looks at seven authors who wrote either in Latin or Old English, and the ways in which they sought to resolve this fundamental question. For Anglo-Saxon England, as for so much of the medieval West, the problem of individual will was complicated by a widespread theistic tradition that influenced writers, thinkers, and their hypotheses. Aaron J Kleist examines the many factors that produced strikingly different, though often complementary, explanations of free will in early England. Having first established the perspectives of Augustine, he considers two Church Fathers who rivalled Augustine's impact on early England, Gregory the Great and the Venerable Bede, and reconstructs their influence on later English writers. He goes on to examine Alfred the Great's Old English *Boethius* and Lantfred of Winchester's *Carmen de libero arbitrio*, and the debt that both texts owe to Boethius' classic *De consolazione Philosophiae*. Finally, Kleist discusses Wulfstan the Homilist and Ælfric of Eynsham, two seminal writers of late Anglo-Saxon England. *Striving with Grace* shows that all of these authors, despite striking differences in their sources and logic, underscore humanity's need for grace even as they labour to affirm the legitimacy of human effort.

The Anime Machine Thomas Lamarre, 2013-11-30 Despite the longevity of animation and its significance within the history of cinema, film theorists have focused on live-action motion pictures and largely ignored hand-drawn and computer-generated movies. Thomas Lamarre contends that the history, techniques, and complex visual language of animation, particularly Japanese animation, demands serious and sustained engagement, and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation, showing how anime fundamentally differs from other visual media. The *Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically “animetic” effects—the multiplanar image, the distributive field of vision, exploded projection, modulation, and other techniques of character animation—through close analysis of major films and television series, studios, animators, and directors, as well as Japanese theories of animation. Lamarre first addresses the technology of anime: the cells on which the images are drawn, the animation stand at which the animator works, the layers of drawings in a frame, the techniques of drawing and blurring lines, how characters are made to move. He then examines foundational works of anime, including the films and television series of Miyazaki Hayao and Anno Hideaki, the multimedia art of Murakami Takashi, and CLAMP’s manga and anime adaptations, to illuminate the profound connections between animators, characters, spectators, and technology. Working at the intersection of the philosophy of technology and the history of thought, Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the “animetic machine” encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us.

A Brief History of Imbecility Takamura Kotaro, 1992-07-01 Takamura Kotaro (1883-1956) drew on his studies in New York, London, and Paris to lay the foundations in Japan for Western-style Japanese sculpture through his intricate wood carvings and powerful bronzes. But Takamura also composed poems infused with startling energy, directness, and narrative clarity. Among the first to use the vernacular masterfully in verse, he has long been recognized as one of Japan's premier modern poets. Takamura thus stood in the confluence of two artistic currents, both shaping and being shaped by them. His personal experiences, from exultation to tragedy, found expression through this dynamic. Hiroaki Sato now captures a lucid picture of Takamura's eloquent struggle with art and with life. Originally published in 1980 as *Chieko and Other Poems*, this expanded volume includes a new introduction and a new selection of Takamura's essays on art and other subjects. The poetry included here is divided into three parts: *The Journey* represents a chronology of the poet's life; *Chieko* is a selection of poems about Takamura's wife which describes his devotion to her for more than thirty years through courtship and marriage, during her illness and insanity, and continuing after her death; and *A Brief History of Imbecility* is a sequence of twenty autobiographical poems composed in 1947. The essays, appearing in English for the first time, offer a more complete understanding of Takamura's relationship to art, his complex experience of Paris, and his views on beauty and creativity. Included here are *The Latter Half of Chieko's Life*, a moving prose

complement to the Chieko poems, and A Last Glance at the Third Ministry of Education Art Exhibition, a scathing review of the modern art world, the first of its kind in Japan.

Religion and Ecology in India and Southeast Asia David L. Gosling, 2001 Religion and Ecology in India and Southeast Asia examines how Hindu and Buddhist traditions could play a crucial role in solving ecological problems in those regions. Considering these traditions from both a historical and contemporary perspective, Gosling bases his arguments on extensive fieldwork and frames it by the socio-political context of religious change in India and Southeast Asia.
