China Lake Grenade Launcher Hardmod Carlyle Nicolao,2011-10-06 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. The China Lake Model (or China Lake Pump-Action Grenade Launcher) is a pump-action grenade launcher that was developed by the Special Projects Division of the China Lake Naval Weapons Center, which provided equipment to Navy SEALs. The M79 and XM148 grenade launchers, and the repeating T148E1 grenade launcher were unreliable, so a request was made to China Lake engineers. SEAL Teams were pleased with the resultant pump-action grenade launcher, since the tubular magazine held three 40x46mm grenades, and so with one grenade in the chamber, four grenades could rapidly be fired before reloading. In fact a skilled operator could fire four aimed shots before the first one landed.

US Grenade Launchers Gordon L. Rottman,2017-09-21 In an effort to provide the US infantryman with more firepower to cover the range gap between the hand grenade and the light mortar, the 40mm M79 grenade launcher – a shoulder-fired, single-shot weapon – entered service with US forces in 1961. Reliable, easy to use, and lethally effective, the M79 soon became an iconic symbol of the Vietnam War and had a profound influence on small-unit tactics. As the Vietnam conflict continued, it was joined on the front line by experimental models such as the magazine-fed T148E1, as well as two launchers intended to be fitted under the barrel of the new M16 assault rifle: Colt's XM148 and AAI Corporation's M203. The M203 remains in US Army service today, while the US Marine Corps now also fields the M32 multiple grenade launcher – like the M79, a standalone weapon. Featuring full-colour artwork, this is the story of the rugged and formidable grenade launchers that equipped the United States and its allies in Vietnam and beyond from the 1960s to the present day.

The Chinese QLZ87 Automatic Grenade Launcher Timothy Yan,2014-08-21 The QLZ87 is a direct gas impingement operated, selective fire grenade launcher chambered for the Chinese 35 x 32SR mm cartridge. Authored by Timothy Yan, “The Chinese QLZ87 Automatic Grenade Launcher” examines the development history and technical capability of this automatic grenade launcher (AGL) and its ammunition, as well as a brief look at other Chinese-developed AGLs.

Small Arms for Urban Combat Russell C. Tilstra,2014-01-10 The urbanization of warfare has necessitated the kind of precision targeting that only small arms can deliver. Precision Guided Firearm Fouad Sabry,2022-08-18 What Is Precision Guided Firearm Long-range rifle systems known as precision guided weapons (PGFs) are meant to increase the accuracy

of firing at targets at longer ranges via the use of target tracking, heads-up displays, and improved fire control. The introduction of PGF technology to small weapons, which was inspired by missile lock-on and fighter jet technology, reduces various causes of marksman mistake, such as mis-aim, trigger jerk, and shot setup miscalculation. At extreme ranges of 1,100 meters or farther, PGFs have the potential to greatly boost the first shot success probability (FSSP). Caseless Ammunition Fouad Sabry, 2022-08-12 What Is Caseless Ammunition Caseless ammunition, also known as caseless cartridges, is a type of weapon-cartridge configuration that does away with the cartridge case. The cartridge case is the component of a weapon-cartridge that is typically responsible for holding the primer, propellant, and projectile together as a single unit. Instead of using a cartridge case, the propellant and primer are attached to the projectile in some other fashion, such as either inside or outside the projectile, depending on the arrangement. This eliminates the need for the cartridge case. Grunt Slang in Vietnam Gordon L. Rottman, 2020-02-04 A look at how combat, culture, and military tradition influenced soldiers' language in Vietnam from the award-winning, USA Today-best-selling author. The slang, or unique vocabulary, of the soldiers and marines serving in Vietnam, was a mishmash of words and phrases whose origins reached back to the Korean War, World War II, and even earlier. Additionally, it was influenced by the United States' rapidly changing protest culture, ideological and poetical doctrine, ethical and cultural conflicts, racialism, and drug culture. This "slanguage" was rendered even more complex by the Pidgin Vietnamese-English

spoken by Americans and Vietnamese alike. But perhaps most importantly, it reflected the soldiers' actual daily lives, played out in the jungles, swamps, and hills of Vietnam.

Guns of the Special Forces, 2001-2015 Leigh Neville, 2016-03-31 An in-depth look at the weaponry employed by Special Forces units around the world following the September 11th attacks. In the years since 9/11, Special Forces of many nations have been in almost constant action in covert, high risk operations around the globe. These include the two long conflicts in Iraq and Afghanistan, fighting nationalist insurgents and jihadist terrorists, as well as other lesser-known operations. The weapons used by SF are a constant source of interest and speculation, as are SF training, methods and vehicles. The armories of these elite units have developed rapidly to meet their demands and the ever more sophisticated threat. They include for example suppressed piston-driven carbines, programmable grenade launchers that airburst behind hidden enemy, and sniper rifles of extreme accuracy and range. This highly researched book gives the reader a privileged insight into this secret world, exploring the custom-built weapons that operators carry on capture/kill missions in the 21st Century. Praise for Guns of Special Forces "A cut above most of the books that purport to review special ops weapons. Its limitation to the War on Terror years allows coverage of the many weapon developments that have taken place as special operations units have been constantly deployed and in action over the last decade and a half." —SWAT Magazine
