They appear and mutilate everything, then disappear without a trace. Another issue is that something has punched a hole in the universe. Life on Matagorda Island Wayne H. McAlister, 2004-07-01 From most people’s point of view, a barrier beach is a paradox: appealing to visit but appalling to live on. An enjoyable day’s excursion requires shade, dark glasses, sunblock, drinking water, food, and, of course, a shower afterward. Take all those amenities away and consider existing alone on the island fulltime, even during hurricanes. When Wayne and Martha McAlister moved to Matagorda Island, a wildlife refuge off the central Texas coast, they anticipated staying perhaps five years. But sent to take up duties with the U.S. Fish and Wildlife Service, Wayne McAlister fell under the island’s spell the moment he stepped out of his aging house trailer and met his first Matagorda rattlesnake. Seven years later, the McAlisters were still observing the flora and fauna of Matagorda. Except for the road and some occasional fence posts, the island appears untouched by humans. In *Life on Matagorda Island*, Wayne McAlister shows what life was like amid such isolation. McAlister revels in the ghostly twinkles of nights on the beach, as luminescent comb jellies, sea walnuts, and glow worms light up every crest of wave. He watches hungry whooping cranes snatch striped mullet trapped in tidal pools; hunts for Hurter’s spadefoots, reclusive amphibians that surface during warm deluges; and sinks to his knees in the sand, flashlight in hand, to catch a glimpse of a whip eel’s sharp snout. Not all observations are limited to the psammobionts—the creatures of the sand. McAlister recounts petting a fatbellied coyote pup and handing out kitchen scraps to wild turkeys. Badgers make their home on Matagorda Island, as do alligators, raccoons, and hundreds of varieties of insects, including the aggravating salt marsh mosquito. But McAlister doesn’t merely observe: he tells why and how. Why oysters spit, why pistol shrimp snap, or how debris from offshore boats affects the beach environment. He also relates the more sinister aspects of living on a barrier island, such as finding himself ankledeep in quicksand. But it’s all in a day’s work—or play—to the McAlisters, as they balance their lifestyle with the will of the island and its nonhuman inhabitants. “We try to stay in the background, enthralled observers,” McAlister writes. “We do not belong, can never truly belong, but we can coexist and commingle. Close enough.”

Nature First Zahid Ameer,2019-12-14 To make life easier, mankind has invented scissors for shearing, rods for fishing, pliers for gripping, sieves for filtering, pots for storing, hypodermic syringes for injection, nutcrackers for opening shells. Biogenesis Adair Hart,2018-05-26 There is always something scarier out there After a successful first mission and a month off, Blake Brown and crew head out on a new mission to the remote Zolidack system. A classified research facility has been sighted with the presence of illegal cargo that relates to what they found on their previous mission. The problem is the system is controlled by the Fredorian Defense Force, a group who dislikes Earthborn of any stripe. The facility is operated by the Dorostatic Initiatives Corporation, which is recovering from a genetic engineering scandal and hates any government intrusion, Earthborn or not. Getting to the facility is one challenge. Dealing with a new crew problem while doing it is another. To make matters worse, brutal, bug-like Rogundan mercenary slavers have been spotted in the system. Blake and crew will do all they can to investigate the facility while navigating both internal and external threats. If there's one thing Earthborn can do well, it's adapt, and Blake and crew will show everyone how it's done.

When Wilks's team departs on their mission, a trained assassin trails them. And what follows is no less than guerrilla warfare on the aliens' planet--and alien conquest on Earth! Nightmare Asylum: Wilks, Billie, and Bueller were the last survivors of a devastating assault on the aliens' home planet. But once their return to the solar system made them refugees once more, fleeing Earth and its alien infestation in a desperate attempt to stay alive. Now, in an otherwise unmanned military transport, they hurtle through space. Destination: unknown. Little do they know that the cargo they carry with them is a legacy of death that they will ultimately have to face. Nor do they know that they head toward a remote colony and military outpost. This pocket of humanity at the very edges of space is at the mercy of a general names Spears with an agenda all his own. Now Billie, Wilks, and Bueller face a new nightmare, and it is nothing they could ever have imagined: a gift of madness from an alien world, unbalanced mind, and the experiences of a mysterious pilot named Lieutenant Ellen Ripley. The Female War: Lieutenant Ellen Ripley awoke from her long journey in space with a hole in her memory and an overwhelming drive to survive. When she meets Wilks and Billie, two battered veterans in the war against the aliens she realizes she's found two comrades in arms--and she's ready to take up the fight.
