The Autograph Seeker Tony V Francis,

Perspectives on Grammar Writing Thomas E. Payne, David J. Weber, 2007-10-04 With over half the languages of the world currently in danger of extinction within a century, the need for high quality grammatical descriptions is more urgent than ever. Potential grammar writers, however, often find themselves paralyzed by the daunting task of describing a language. The papers in the present volume (originally published in *Studies in Language* 30:2 (2006)) provide suggestions and encouragement - from experienced grammar writers and users - regarding concrete methods for approaching the task of writing a descriptive grammar of a language. Salient themes emerging from the papers in this volume include: The necessity of community involvement in grammatical descriptions; The link between a grammar and the other products of a program of language documentation (a dictionary and collection of texts); The complementary functions of elicited vs. naturally occurring data; and grammatical description as 'art' as well as 'science'.

Choctaw Language and Culture Marcia Haag, Henry Willis, 2001 Choctaw Language and Culture combines a beginning language and grammar text with a selection of essays on Choctaw history, language, and culture from prehistoric times to the present. In part one of the book, Chahta Anumpa, Marcia Haag, a linguist, and Henry Willis, a native speaker and Choctaw instructor, present the Choctaw language. Each chapter begins with a conversation or a Choctaw story. Designed for classroom use and to preserve the rich heritage of the Choctaw language, the lessons introduce new words, explain sentence construction and correct usage, and provide exercises in grammar and composition. Part two, Kanihmicchi-hosh Okchayat Il-asha (The Way We Live), contains essays on Choctaw history and culture written especially for this volume by leading scholars in anthropology, history, linguistics, archaeology, and Native American studies. Beginning with The Ancient Ones, the chapters describe Choctaw prehistory, daily life before contact, ritual and religion, trade, removal to Indian Territory, schools, newspapers, and contemporary life.

Cash, Clothes, and Construction Kate Maclean, 2023-11-28 A groundbreaking feminist perspective on Movimiento al Socialismo (MAS) rule in Bolivia and the country's radical transformation under Evo Morales The presidency of Evo Morales in Bolivia (2006-2019) has produced considerable academic scholarship, much of it focused on indigenous social movements or extractivism, and often triumphalist about the successes of Morales's Movimiento al Socialismo (MAS). Turning a new lens on the movement, *Cash, Clothes, and Construction* presents the first gender-based analysis of "pluri-economy," a central pillar of Bolivia's program under Morales, evaluating the potential of this vision of "an economy where all economies fit" to embrace feminist critiques of capitalism and economic diversity. Based on more than twelve years of empirical research exploring the remarkable transformations in Bolivia since 2006, this book focuses on three sectors—finance, clothing, and construction—in which indigenous women have defied gendered expectations. Kate Maclean presents detailed case studies of women selling secondhand high street clothes from the United States in the vast, peri-urban markets of Bolivian cities; Aymaran designers of new pollera (traditional Andean dress) fashions, one of whom exhibited her collection in New York City; and the powerful and rich chola paceña, whose real estate investments have transformed the cultural maps of La Paz and El Alto. *Cash, Clothes, and Construction* offers a gendered analysis of

the mission of MAS to dismantle neoliberalism and decolonize politics and economy from the perspective of the Indigenous women who have radically transformed Bolivia's economy from the ground up.

Reciprocal Constructions Vladimir P. Nedjalkov, 2007-11-06 This monograph constitutes the first comprehensive investigation of reciprocal constructions and related phenomena in the world's languages. Reciprocal constructions (of the type The two boys hit each other, The poets admire each other's poems) have often been the subject of language-particular studies, but it is only in this work that a truly global comparative picture emerges. Nine stage-setting chapters dealing with general and theoretical matters are followed by 40 chapters containing in-depth descriptions of reciprocals in individual languages by renowned specialists. The introductory papers provide a conceptual and terminological framework that allows the authors of the individual chapters to characterize their languages in comparable terms, making it easy for the reader to see points of commonality between languages and constructions that have never been compared before. This set of volumes is an indispensable starting point and will be a lasting reference work for any future studies of reciprocals.

Spanish in Four Continents Carmen Silva-Corvalán, 1997-04-01 This collection is the first to examine the effects of bilingualism and multilingualism on the development of dialectal varieties of Spanish in Africa, America, Asia and Europe. Nineteen essays investigate a variety of complex situations of contact between Spanish and typologically different languages, including Basque, Bantu languages, English, and Quechua. The overall picture that evolves clearly indicates that although influence from the contact languages may lead to different dialects, the core grammar of Spanish remains intact. Silva-Corvalán's volume makes an important contribution both to sociolinguistics in general, and to Spanish linguistics in particular. The contributors address theoretical and empirical issues that advance our knowledge of what is a possible linguistic change, how languages change, and how changes spread in society in situations of intensive bilingualism and language contact, a situation that appears to be the norm rather than the exception in the world.

In the Shadow of Angkor Frank Stewart, Sharon May, 2004-05-31 Nearly two million people died in Cambodia between 1975 and 1979 as a result of the Khmer Rouge's genocidal regime. Principios de Microeconomía Iván Rivera, 2015-01-03 Este volumen introduce al lector a la microeconomía, que es el fundamento del análisis económico en cualquier sociedad. A diferencia de otros textos introductorios, este libro desarrolla tres características nuevas para la enseñanza elemental de la economía: los ejemplos están relacionados al sistema económico del Perú, su lenguaje es simple y directo y su cobertura es la de un texto avanzado. Además, el autor comunica las ideas utilizando el razonamiento lógico y apelando a los gráficos en un intento por usar sistemáticamente el sentido común para explicar la mayoría de los temas desarrollados. Además de cubrir los temas clásicos de oferta, demanda y estructuras de mercado, el texto explica de manera sencilla temas complejos como el riesgo y la incertidumbre, la información incompleta, las externalidades públicas y privadas y la nueva economía conductual, lo que permite al lector una visión actualizada del estado actual de la microeconomía y sus principales aplicaciones.

Handbook of Quantifiers in Natural Language: Volume II Denis Paperno, Edward L. Keenan, 2017-06-30 This work presents the structure, distribution and semantic interpretation of quantificational expressions in languages from diverse language families and typological profiles. The current volume pays special attention to underrepresented languages of different status and endangerment level. Languages covered include American and Russian Sign Languages, and sixteen spoken languages from Africa, Australia, Papua, the Americas, and different parts of Asia. The articles respond to a questionnaire the editors constructed to enable detailed crosslinguistic comparison of numerous features. They offer comparable information on semantic classes of quantifiers (generalized existential, generalized universal, proportional, partitive), syntactically complex quantifiers (intensive modification, Boolean compounds, exception phrases, etc.), and several more specific issues such as quantifier scope ambiguities, floating quantifiers, and binary (type 2) quantifiers. The book is intended for semanticists, logicians interested in quantification in natural language, and general linguists as articles are meant to be descriptive and theory independent. The book continues and expands the coverage of the Handbook of Quantifiers in Natural Language (2012) by the same editors, and extends the earlier work in Matthewson (2008), Gil et al. (2013) and Bach et al (1995).
